

Lance Becker

List of Publications by Citations

Source: <https://exaly.com/author-pdf/981936/lance-becker-publications-by-citations.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
95	Presenting Characteristics, Comorbidities, and Outcomes Among 5700 Patients Hospitalized With COVID-19 in the New York City Area. <i>JAMA - Journal of the American Medical Association</i> , 2020 , 323, 2052-2059	27.4	5108
94	Chest compression rates during cardiopulmonary resuscitation are suboptimal: a prospective study during in-hospital cardiac arrest. <i>Circulation</i> , 2005 , 111, 428-34	16.7	547
93	Effects of compression depth and pre-shock pauses predict defibrillation failure during cardiac arrest. <i>Resuscitation</i> , 2006 , 71, 137-45	4	509
92	Resuscitation after cardiac arrest: a 3-phase time-sensitive model. <i>JAMA - Journal of the American Medical Association</i> , 2002 , 288, 3035-8	27.4	411
91	Incidence of treated cardiac arrest in hospitalized patients in the United States. <i>Critical Care Medicine</i> , 2011 , 39, 2401-6	1.4	321
90	Intra-arrest cooling improves outcomes in a murine cardiac arrest model. <i>Circulation</i> , 2004 , 109, 2786-91	16.7	299
89	Improved outcome of extracorporeal cardiopulmonary resuscitation for out-of-hospital cardiac arrest--a comparison with that for extracorporeal rescue for in-hospital cardiac arrest. <i>Resuscitation</i> , 2014 , 85, 1219-24	4	143
88	Extracorporeal life support as rescue strategy for out-of-hospital and emergency department cardiac arrest. <i>Resuscitation</i> , 2014 , 85, 1527-32	4	96
87	Effect of Ascorbic Acid, Corticosteroids, and Thiamine on Organ Injury in Septic Shock: The ACTS Randomized Clinical Trial. <i>JAMA - Journal of the American Medical Association</i> , 2020 , 324, 642-650	27.4	83
86	Cardiac arrest: resuscitation and reperfusion. <i>Circulation Research</i> , 2015 , 116, 2041-9	15.7	76
85	Ascorbic acid, corticosteroids, and thiamine in sepsis: a review of the biologic rationale and the present state of clinical evaluation. <i>Critical Care</i> , 2018 , 22, 283	10.8	68
84	Comprehensive analysis of phospholipids in the brain, heart, kidney, and liver: brain phospholipids are least enriched with polyunsaturated fatty acids. <i>Molecular and Cellular Biochemistry</i> , 2018 , 442, 187-201	4.2	53
83	Association of Public Health Initiatives With Outcomes for Out-of-Hospital Cardiac Arrest at Home and in Public Locations. <i>JAMA Cardiology</i> , 2017 , 2, 1226-1235	16.2	46
82	Strategies to Improve Survival From Cardiac Arrest: A Report From the Institute of Medicine. <i>JAMA - Journal of the American Medical Association</i> , 2015 , 314, 223-4	27.4	38
81	Extracorporeal Cardiopulmonary Resuscitation in Adults. Interim Guideline Consensus Statement From the Extracorporeal Life Support Organization. <i>ASAIO Journal</i> , 2021 , 67, 221-228	3.6	38
80	Video-Only Cardiopulmonary Resuscitation Education for High-Risk Families Before Hospital Discharge: A Multicenter Pragmatic Trial. <i>Circulation: Cardiovascular Quality and Outcomes</i> , 2016 , 9, 740-748	5.8	26
79	Phospholipid alterations in the brain and heart in a rat model of asphyxia-induced cardiac arrest and cardiopulmonary bypass resuscitation. <i>Molecular and Cellular Biochemistry</i> , 2015 , 408, 273-81	4.2	25

78	The Responses of Tissues from the Brain, Heart, Kidney, and Liver to Resuscitation following Prolonged Cardiac Arrest by Examining Mitochondrial Respiration in Rats. <i>Oxidative Medicine and Cellular Longevity</i> , 2016 , 2016, 7463407	6.7	24
77	Public knowledge of automatic external defibrillators in a large U.S. urban community. <i>Resuscitation</i> , 2015 , 92, 101-6	4	23
76	Enhanced Macrophage Pannexin 1 Expression and Hemichannel Activation Exacerbates Lethal Experimental Sepsis. <i>Scientific Reports</i> , 2019 , 9, 160	4.9	20
75	Tissue-Specific Metabolic Profiles After Prolonged Cardiac Arrest Reveal Brain Metabolome Dysfunction Predominantly After Resuscitation. <i>Journal of the American Heart Association</i> , 2019 , 8, e012809	6.09	18
74	An early experience on the effect of solid organ transplant status on hospitalized COVID-19 patients. <i>American Journal of Transplantation</i> , 2021 , 21, 2522-2531	8.7	18
73	Quantitative estimation of nerve fiber engagement by vagus nerve stimulation using physiological markers. <i>Brain Stimulation</i> , 2020 , 13, 1617-1630	5.1	16
72	Examination of physiological function and biochemical disorders in a rat model of prolonged asphyxia-induced cardiac arrest followed by cardio pulmonary bypass resuscitation. <i>PLoS ONE</i> , 2014 , 9, e112012	3.7	15
71	Dissociated Oxygen Consumption and Carbon Dioxide Production in the Post-Cardiac Arrest Rat: A Novel Metabolic Phenotype. <i>Journal of the American Heart Association</i> , 2018 , 7,	6	13
70	Challenges and Inconsistencies in Using Lysophosphatidic Acid as a Biomarker for Ovarian Cancer. <i>Cancers</i> , 2019 , 11,	6.6	12
69	Identification of tetranectin-targeting monoclonal antibodies to treat potentially lethal sepsis. <i>Science Translational Medicine</i> , 2020 , 12,	17.5	12
68	Low temperature increases capillary blood refill time following mechanical fingertip compression of healthy volunteers: prospective cohort study. <i>Journal of Clinical Monitoring and Computing</i> , 2019 , 33, 259-267	2	11
67	Vagus Nerve Stimulation and the Cardiovascular System. <i>Cold Spring Harbor Perspectives in Medicine</i> , 2020 , 10,	5.4	11
66	The role of decreased cardiolipin and impaired electron transport chain in brain damage due to cardiac arrest. <i>Neurochemistry International</i> , 2018 , 120, 200-205	4.4	11
65	Increased access to urgent care centers decreases low acuity diagnoses in a nearby hospital emergency department. <i>American Journal of Emergency Medicine</i> , 2019 , 37, 486-488	2.9	10
64	Does training level affect the accuracy of visual assessment of capillary refill time?. <i>Critical Care</i> , 2019 , 23, 157	10.8	9
63	Developing a kinematic understanding of chest compressions: the impact of depth and release time on blood flow during cardiopulmonary resuscitation. <i>BioMedical Engineering OnLine</i> , 2015 , 14, 102	4.1	9
62	Increased Survival Time With SS-31 After Prolonged Cardiac Arrest in Rats. <i>Heart Lung and Circulation</i> , 2019 , 28, 505-508	1.8	9
61	A pilot study of respiratory rate derived from a wearable biosensor compared with capnography in emergency department patients. <i>Open Access Emergency Medicine</i> , 2019 , 11, 103-108	1.9	8

60	Time to intra-arrest therapeutic hypothermia in out-of-hospital cardiac arrest patients and its association with neurologic outcome: a propensity matched sub-analysis of the PRINCESS trial. <i>Intensive Care Medicine</i> , 2020 , 46, 1361-1370	14.5	8
59	Near-Infrared Spectroscopy Assessments of Regional Cerebral Oxygen Saturation for the Prediction of Clinical Outcomes in Patients With Cardiac Arrest: A Review of Clinical Impact, Evolution, and Future Directions. <i>Frontiers in Medicine</i> , 2020 , 7, 587930	4.9	8
58	Comparison of point-of-care peripheral perfusion assessment using pulse oximetry sensor with manual capillary refill time: clinical pilot study in the emergency department. <i>Journal of Intensive Care</i> , 2019 , 7, 52	7	8
57	Evaluation of accuracy of capillary refill index with pneumatic fingertip compression. <i>Journal of Clinical Monitoring and Computing</i> , 2021 , 35, 135-145	2	8
56	Potential of lysophosphatidylinositol as a prognostic indicator of cardiac arrest using a rat model. <i>Biomarkers</i> , 2017 , 22, 755-763	2.6	7
55	Blood refill time: Clinical bedside monitoring of peripheral blood perfusion using pulse oximetry sensor and mechanical compression. <i>American Journal of Emergency Medicine</i> , 2018 , 36, 2310-2312	2.9	7
54	Plasma metabolomics supports the use of long-duration cardiac arrest rodent model to study human disease by demonstrating similar metabolic alterations. <i>Scientific Reports</i> , 2020 , 10, 19707	4.9	7
53	Mitochondrial transplantation therapy for ischemia reperfusion injury: a systematic review of animal and human studies. <i>Journal of Translational Medicine</i> , 2021 , 19, 214	8.5	7
52	The effects of early high-volume hemofiltration on prolonged cardiac arrest in rats with reperfusion by cardiopulmonary bypass: a randomized controlled animal study. <i>Intensive Care Medicine Experimental</i> , 2016 , 4, 25	3.7	6
51	Effect of compression waveform and resuscitation duration on blood flow and pressure in swine: One waveform does not optimally serve. <i>Resuscitation</i> , 2018 , 131, 55-62	4	6
50	Combination of cardiac and thoracic pump theories in rodent cardiopulmonary resuscitation: a new method of three-side chest compression. <i>Intensive Care Medicine Experimental</i> , 2019 , 7, 62	3.7	6
49	Impact of the 2010 resuscitation guidelines training on layperson chest compressions. <i>World Journal of Emergency Medicine</i> , 2015 , 6, 270-6	1.9	6
48	DHA-supplemented diet increases the survival of rats following asphyxia-induced cardiac arrest and cardiopulmonary bypass resuscitation. <i>Scientific Reports</i> , 2016 , 6, 36545	4.9	6
47	Mechanical, Team-Focused, Video-Reviewed Cardiopulmonary Resuscitation Improves Return of Spontaneous Circulation After Emergency Department Implementation. <i>Journal of the American Heart Association</i> , 2020 , 9, e014420	6	5
46	Comparing phospholipid profiles of mitochondria and whole tissue: Higher PUFA content in mitochondria is driven by increased phosphatidylcholine unsaturation. <i>Journal of Chromatography B: Analytical Technologies in the Biomedical and Life Sciences</i> , 2018 , 1093-1094, 147-157	3.2	5
45	Recent advances in personalizing cardiac arrest resuscitation. <i>F1000Research</i> , 2019 , 8,	3.6	5
44	The standardized method and clinical experience may improve the reliability of visually assessed capillary refill time. <i>American Journal of Emergency Medicine</i> , 2021 , 44, 284-290	2.9	5
43	Defibrillation in the movies: a missed opportunity for public health education. <i>Resuscitation</i> , 2014 , 85, 1795-8	4	4

42	Relative Ratios Enhance the Diagnostic Power of Phospholipids in Distinguishing Benign and Cancerous Ovarian Masses. <i>Cancers</i> , 2019 , 12,	6.6	4
41	A walk through the progression of resuscitation medicine. <i>Annals of the New York Academy of Sciences</i> , 2020 ,	6.5	4
40	Traumatic and hemorrhagic complications after extracorporeal cardiopulmonary resuscitation for out-of-hospital cardiac arrest. <i>Resuscitation</i> , 2020 , 157, 225-229	4	4
39	Pharmacological Approach for Neuroprotection After Cardiac Arrest-A Narrative Review of Current Therapies and Future Neuroprotective Cocktail. <i>Frontiers in Medicine</i> , 2021 , 8, 636651	4.9	4
38	Adult out-of-hospital cardiac arrest in philadelphia from 2008-2012: An epidemiological study. <i>Resuscitation</i> , 2017 , 115, 17-22	4	3
37	Using a mobile app and mobile workforce to validate data about emergency public health resources. <i>Emergency Medicine Journal</i> , 2014 , 31, 545-548	1.5	3
36	Resuscitation Using ECPR During In-Hospital Cardiac Arrest (RESCUE-IHCA) Mortality Prediction Score and External Validation.. <i>JACC: Cardiovascular Interventions</i> , 2022 , 15, 237-237	5	3
35	Let Sleeping Patients Lie, avoiding unnecessary overnight vitals monitoring using a clinically based deep-learning model. <i>Npj Digital Medicine</i> , 2020 , 3, 149	15.7	3
34	Advances in the Approaches Using Peripheral Perfusion for Monitoring Hemodynamic Status. <i>Frontiers in Medicine</i> , 2020 , 7, 614326	4.9	3
33	Prospective analysis of SARS-CoV-2 dissemination to environmental surfaces during endoscopic procedures. <i>Endoscopy International Open</i> , 2021 , 9, E701-E705	3	3
32	Developing dual hemofiltration plus cardiopulmonary bypass in rodents. <i>Journal of Surgical Research</i> , 2015 , 195, 196-203	2.5	2
31	Potential impacts of a novel integrated extracorporeal-CPR workflow using an interventional radiology and immediate whole-body computed tomography system in the emergency department. <i>BMC Cardiovascular Disorders</i> , 2020 , 20, 23	2.3	2
30	Volume infusion cooling increases end-tidal carbon dioxide and results in faster and deeper cooling during intra-cardiopulmonary resuscitation hypothermia induction. <i>Intensive Care Medicine Experimental</i> , 2015 , 3, 37	3.7	2
29	Intubated COVID-19 predictive (ICOP) score for early mortality after intubation in patients with COVID-19. <i>Scientific Reports</i> , 2021 , 11, 21124	4.9	2
28	Effectiveness of SARS-CoV-2 Decontamination and Containment in a COVID-19 ICU. <i>International Journal of Environmental Research and Public Health</i> , 2021 , 18,	4.6	2
27	Performance of Emergency Heart Failure Mortality Risk Grade in the Emergency Department. <i>Western Journal of Emergency Medicine</i> , 2021 , 22, 672-677	3.3	2
26	Patient Preference and Risk Assessment in Opioid Prescribing Disparities: A Secondary Analysis of a Randomized Clinical Trial. <i>JAMA Network Open</i> , 2021 , 4, e2118801	10.4	2
25	Evaluation of the Quality of Chest Compression with Oxyhemoglobin Level by Near-Infrared Spectroscopy in a Rat Asphyxia Cardiac Arrest Model. <i>Advances in Experimental Medicine and Biology</i> , 2021 , 1269, 265-269	3.6	2

24	The evaluation of pituitary damage associated with cardiac arrest: An experimental rodent model. <i>Scientific Reports</i> , 2021 , 11, 629	4.9	2
23	Cyclosporine for Reperfusion Injury After Cardiac Arrest: Too Little Too Late?. <i>JAMA Cardiology</i> , 2016 , 1, 566-7	16.2	1
22	Hydrogen gas with extracorporeal cardiopulmonary resuscitation improves survival after prolonged cardiac arrest in rats. <i>Journal of Translational Medicine</i> , 2021 , 19, 462	8.5	1
21	Increased plasma disequilibrium between pro- and anti-oxidants during the early phase resuscitation after cardiac arrest is associated with increased levels of oxidative stress end-products. <i>Molecular Medicine</i> , 2021 , 27, 135	6.2	1
20	Increased Emergency Department Hallway Length of Stay is Associated with Development of Delirium. <i>Western Journal of Emergency Medicine</i> , 2021 , 22, 726-735	3.3	1
19	Understanding physiologic phospholipid maintenance in the context of brain mitochondrial phospholipid alterations after cardiac arrest. <i>Mitochondrion</i> , 2021 , 60, 112-120	4.9	1
18	Cardiopulmonary resuscitation in special circumstances. <i>Lancet, The</i> , 2021 , 398, 1257-1268	4.0	1
17	Effect of Adrenaline on Cerebral Blood Oxygenation Measured by NIRS in a Rat Asphyxia Cardiac Arrest Model. <i>Advances in Experimental Medicine and Biology</i> , 2021 , 1269, 39-43	3.6	1
16	A Multicentered Randomized Controlled Trial Comparing the Effectiveness of Pain Treatment Communication Tools in Emergency Department Patients With Back or Kidney Stone Pain.. <i>American Journal of Public Health</i> , 2022 , 112, S45-S55	5.1	0
15	Monitoring the tissue perfusion during hemorrhagic shock and resuscitation: tissue-to-arterial carbon dioxide partial pressure gradient in a pig model. <i>Journal of Translational Medicine</i> , 2021 , 19, 390	8.5	0
14	Towards Personalized Closed-Loop Mechanical CPR: A Model Relating Carotid Blood Flow to Chest Compression Rate and Duration. <i>IEEE Transactions on Biomedical Engineering</i> , 2020 , 67, 1253-1262	5	0
13	Agreement between actual and synthesized right-sided and posterior electrocardiographic leads in identifying ischemia. <i>American Journal of Emergency Medicine</i> , 2020 , 38, 1346-1351	2.9	0
12	Supervised Machine Learning Applied to Automate Flash and Prolonged Capillary Refill Detection by Pulse Oximetry. <i>Frontiers in Physiology</i> , 2020 , 11, 564589	4.6	0
11	A method for measuring the molecular ratio of inhalation to exhalation and effect of inspired oxygen levels on oxygen consumption. <i>Scientific Reports</i> , 2021 , 11, 12815	4.9	0
10	Assessment of Cerebral Blood Oxygenation by Near-Infrared Spectroscopy before and after Resuscitation in a Rat Asphyxia Cardiac Arrest Model. <i>Advances in Experimental Medicine and Biology</i> , 2021 , 1269, 311-315	3.6	0
9	Brain monitoring using near-infrared spectroscopy to predict outcome after cardiac arrest: a novel phenotype in a rat model of cardiac arrest. <i>Journal of Intensive Care</i> , 2021 , 9, 4	7	0
8	The interplay between bystander cardiopulmonary resuscitation and ambient temperature on neurological outcome after cardiac arrest: A nationwide observational cohort study. <i>Resuscitation</i> , 2021 , 164, 46-53	4	0
7	Inhaled Gases as Therapies for Post-Cardiac Arrest Syndrome: A Narrative Review of Recent Developments. <i>Frontiers in Medicine</i> , 2020 , 7, 586229	4.9	0

6	Metformin-mediated mitochondrial protection post-cardiac arrest improves EEG activity and confers neuroprotection and survival benefit.. <i>FASEB Journal</i> , 2022 , 36, e22307	0.9	o
5	Bilateral Spontaneous Pneumothorax in a COVID-19 and HIV-Positive Patient: A Case Report.. <i>Frontiers in Medicine</i> , 2021 , 8, 698268	4.9	o
4	Renal Transplant Artery Inflow Stenosis Treated with Femorofemoral Bypass. <i>International Journal of Angiology</i> , 2021 , 30, 310-312	1.1	
3	Acuity patterns of heart failure among emergency departments in a large health system. <i>American Journal of Emergency Medicine</i> , 2021 , 43, 21-26	2.9	
2	Effect of Adrenaline on Cerebral Blood Oxygenation Measured by NIRS in a Rat Asphyxia Cardiac Arrest Model. <i>Advances in Experimental Medicine and Biology</i> , 2021 , 1269, 277-281	3.6	
1	COVID-19-Associated Portal Vein Thrombosis Post-Cholecystitis. <i>International Journal of Angiology</i> ,	1.1
