| # | Article                                                                                                                                                                                                    | IF  | CITATIONS |
|---|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1 | Construction of graphitic carbon quantum dots-modified yolk–shell Co3O4 microsphere for high-performance lithium storage. Journal of Materials Science, 2022, 57, 3586-3600.                               | 3.7 | 2         |
| 2 | Outstanding catalytic performance of metal-free peroxymonosulfate activator: Important role of chrysotile. Separation and Purification Technology, 2022, 287, 120526.                                      | 7.9 | 12        |
| 3 | Activation of Peroxymonosulfate by Chrysotile to Degrade Dyes in Water: Performance Enhancement and Activation Mechanism. Minerals (Basel, Switzerland), 2021, 11, 400.                                    | 2.0 | 6         |
| 4 | High-Efficiency Catalysis of Peroxymonosulfate by MgO for the Degradation of Organic Pollutants. Minerals (Basel, Switzerland), 2020, 10, 2.                                                               | 2.0 | 28        |
| 5 | A novel carbon nanotube–magnesium oxide composite with excellent recyclability to efficiently activate peroxymonosulfate for Rhodamine B degradation. Journal of Materials Science, 2020, 55, 11267-11283. | 3.7 | 27        |
