#	ARTICLE	IF	CITATIONS
1	Repeated subarachnoid administrations of autologous mesenchymal stromal cells supported in autologous plasma improve quality of life in patients suffering incomplete spinal cord injury. <i>Cytotherapy</i> , 2017, 19, 349-359.	0.3	99
2	Functional Recovery of Chronic Paraplegic Pigs After Autologous Transplantation of Bone Marrow Stromal Cells. <i>Transplantation</i> , 2008, 86, 845-853.	0.5	88
3	Intrathecal administration of autologous mesenchymal stromal cells for spinal cord injury: Safety and efficacy of the 100/3 guideline. <i>Cytotherapy</i> , 2018, 20, 806-819.	0.3	84
4	An approach to personalized cell therapy in chronic complete paraplegia: The Puerta de Hierro phase I/II clinical trial. <i>Cytotherapy</i> , 2016, 18, 1025-1036.	0.3	83
5	Delayed intralesional transplantation of bone marrow stromal cells increases endogenous neurogenesis and promotes functional recovery after severe traumatic brain injury. <i>Brain Injury</i> , 2009, 23, 760-769.	0.6	50
6	Cell-Based Therapies for Traumatic Brain Injury: Therapeutic Treatments and Clinical Trials. <i>Biomedicines</i> , 2021, 9, 669.	1.4	27
7	Failure of Delayed Intravenous Administration of Bone Marrow Stromal Cells after Traumatic Brain Injury. <i>Journal of Neurotrauma</i> , 2012, 29, 394-400.	1.7	15
8	Progressive increase in brain glucose metabolism after intrathecal administration of autologous mesenchymal stromal cells in patients with diffuse axonal injury. <i>Cytotherapy</i> , 2017, 19, 88-94.	0.3	15
9	Is the subarachnoid administration of mesenchymal stromal cells a useful strategy to treat chronic brain damage?. <i>Cytotherapy</i> , 2014, 16, 1501-1510.	0.3	11
10	The severity of brain damage determines bone marrow stromal cell therapy efficacy in a traumatic brain injury model. <i>Journal of Trauma</i> , 2012, 72, 1203-1212.	2.3	10
11	Platelet-rich plasma-derived scaffolds increase the benefit of delayed mesenchymal stromal cell therapy after severe traumatic brain injury. <i>Cytotherapy</i> , 2018, 20, 314-321.	0.3	10
