

# Przemyslaw Duda

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/99285/przemyslaw-duda-publications-by-year.pdf>

**Version:** 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

16  
papers

192  
citations

7

| #  | Paper                                                                                                                                                                                                                                                                                | IF  | Citations |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 16 | Effects of the Mutant TP53 Reactivator APR-246 on Therapeutic Sensitivity of Pancreatic Cancer Cells in the Presence and Absence of WT-TP53.. <i>Cells</i> , <b>2022</b> , 11,                                                                                                       | 7.9 | 1         |
| 15 | Wild type and gain of function mutant TP53 can regulate the sensitivity of pancreatic cancer cells to chemotherapeutic drugs, EGFR/Ras/Raf/MEK, and PI3K/mTORC1/GSK-3 pathway inhibitors, nutraceuticals and alter metabolic properties.. <i>Aging</i> , <b>2022</b> , 14, 3365-3386 | 5.6 | 0         |
| 14 | A novel remitting leukodystrophy associated with a variant in. <i>Brain Communications</i> , <b>2021</b> , 3, fcab036                                                                                                                                                                | 4.5 | 1         |
| 13 | GSK-3 Can Regulate the Sensitivity of MIA-PaCa-2 Pancreatic and MCF-7 Breast Cancer Cells to Chemotherapeutic Drugs, Targeted Therapeutics and Nutraceuticals. <i>Cells</i> , <b>2021</b> , 10,                                                                                      | 7.9 | 7         |
| 12 | GSK3 as a Regulator of Cytoskeleton Architecture: Consequences for Health and Disease. <i>Cells</i> , <b>2021</b> , 10,                                                                                                                                                              | 7.9 | 3         |
| 11 | GSK3 Activity in Reward Circuit Functioning and Addiction. <i>NeuroSci</i> , <b>2021</b> , 2, 443-466                                                                                                                                                                                | 1.7 |           |
| 10 | Targeting GSK3 and Associated Signaling Pathways Involved in Cancer. <i>Cells</i> , <b>2020</b> , 9,                                                                                                                                                                                 | 7.9 | 67        |
| 9  | GSK-3 and miRs: Master regulators of therapeutic sensitivity of cancer cells. <i>Biochimica Et Biophysica Acta - Molecular Cell Research</i> , <b>2020</b> , 1867, 118770                                                                                                            | 4.9 | 5         |
| 8  | Fructose 1,6-Bisphosphatase 2 Plays a Crucial Role in the Induction and Maintenance of Long-Term Potentiation. <i>Cells</i> , <b>2020</b> , 9,                                                                                                                                       | 7.9 | 3         |
| 7  | GSK3 A Master Player in Depressive Disorder Pathogenesis and Treatment Responsiveness. <i>Cells</i> , <b>2020</b> , 9,                                                                                                                                                               | 7.9 | 19        |
| 6  | Iridophoroma associated with the Lemon Frost colour morph of the leopard gecko ( <i>Eublepharis macularius</i> ). <i>Scientific Reports</i> , <b>2020</b> , 10, 5734                                                                                                                 | 4.9 | 2         |
| 5  | GSK3 and miRNA in neural tissue: From brain development to neurodegenerative diseases. <i>Biochimica Et Biophysica Acta - Molecular Cell Research</i> , <b>2020</b> , 1867, 118696                                                                                                   | 4.9 | 4         |
| 4  | The Reverse Warburg Effect is Associated with Fbp2-Dependent Hif1 Regulation in Cancer Cells Stimulated by Fibroblasts. <i>Cells</i> , <b>2020</b> , 9,                                                                                                                              | 7.9 | 8         |
| 3  | Fructose-1,6-bisphosphatase: From a glucose metabolism enzyme to multifaceted regulator of a cell fate. <i>Advances in Biological Regulation</i> , <b>2019</b> , 72, 41-50                                                                                                           | 6.2 | 11        |
| 2  | Global quantitative TPA-based proteomics of mouse brain structures reveals significant alterations in expression of proteins involved in neuronal plasticity during aging. <i>Aging</i> , <b>2018</b> , 10, 1682-1697                                                                | 5.6 | 8         |
| 1  | Targeting GSK3 signaling as a potential therapy of neurodegenerative diseases and aging. <i>Expert Opinion on Therapeutic Targets</i> , <b>2018</b> , 22, 833-848                                                                                                                    | 6.4 | 52        |
