#	ARTICLE	IF	CITATIONS
1	Long-term effects of fecal microbiota transplantation (FMT) in patients with irritable bowel syndrome. <i>Neurogastroenterology and Motility</i> , 2022, 34, e14200.	3.0	25
2	Gastric function in diabetic gastroparesis assessed by ultrasound and scintigraphy. <i>Neurogastroenterology and Motility</i> , 2022, 34, e14235.	3.0	11
3	Gut bless you: The microbiota-gut-brain axis in irritable bowel syndrome. <i>World Journal of Gastroenterology</i> , 2022, 28, 412-431.	3.3	37
4	Changes in colonic enteroendocrine cells of patients with irritable bowel syndrome following fecal microbiota transplantation. <i>Scandinavian Journal of Gastroenterology</i> , 2022, 57, 792-796.	1.5	9
5	Irritable bowel syndrome patients who are not likely to respond to fecal microbiota transplantation. <i>Neurogastroenterology and Motility</i> , 2022, , e14353.	3.0	7
6	The fecal microbiota transplantation response differs between patients with severe and moderate irritable bowel symptoms. <i>Scandinavian Journal of Gastroenterology</i> , 2022, 57, 1036-1045.	1.5	7
7	Efficacy of Fecal Microbiota Transplantation for Patients With Irritable Bowel Syndrome at 3 Years After Transplantation. <i>Gastroenterology</i> , 2022, 163, 982-994.e14.	1.3	35
8	Effects of high intake of cod or salmon on gut microbiota profile, faecal output and serum concentrations of lipids and bile acids in overweight adults: a randomised clinical trial. <i>European Journal of Nutrition</i> , 2021, 60, 2231-2248.	3.9	9
9	Changes in fecal short-chain fatty acids following fecal microbiota transplantation in patients with irritable bowel syndrome. <i>Neurogastroenterology and Motility</i> , 2021, 33, e13983.	3.0	37
10	Ultrasound imaging for assessing functions of the GI tract. <i>Physiological Measurement</i> , 2021, 42, 024002.	2.1	8
11	Gastroparesis Symptoms Associated with Intestinal Hypomotility: An Explorative Study Using Wireless Motility Capsule. <i>Clinical and Experimental Gastroenterology</i> , 2021, Volume 14, 133-144.	2.3	3
12	United European Gastroenterology (UEG) and European Society for Neurogastroenterology and Motility (ESNM) consensus on functional dyspepsia. <i>United European Gastroenterology Journal</i> , 2021, 9, 307-331.	3.8	62
13	Gastrointestinal Ultrasound in Functional Disorders of the Gastrointestinal Tract - EFSUMB Consensus Statement. <i>Ultrasound International Open</i> , 2021, 07, E14-E24.	0.6	8
14	Responses to faecal microbiota transplantation in female and male patients with irritable bowel syndrome. <i>World Journal of Gastroenterology</i> , 2021, 27, 2219-2237.	3.3	22
15	The Effects of Fecal Microbiota Transplantation on the Symptoms and the Duodenal Neurogenin 3, Musashi 1, and Enteroendocrine Cells in Patients With Diarrhea-Predominant Irritable Bowel Syndrome. <i>Frontiers in Cellular and Infection Microbiology</i> , 2021, 11, 524851.	3.9	10
16	Current status of fecal microbiota transplantation for irritable bowel syndrome. <i>Neurogastroenterology and Motility</i> , 2021, 33, e14157.	3.0	29
17	United European Gastroenterology (UEG) and European Society for Neurogastroenterology and Motility (ESNM) consensus on functional dyspepsia. <i>Neurogastroenterology and Motility</i> , 2021, 33, e14238.	3.0	21
18	Possible role of peptide YY (PYY) in the pathophysiology of irritable bowel syndrome (IBS). <i>Neuropeptides</i> , 2020, 79, 101973.	2.2	30

#	ARTICLE	IF	CITATIONS
19	Efficacy of faecal microbiota transplantation for patients with irritable bowel syndrome in a randomised, double-blind, placebo-controlled study. <i>Gut</i> , 2020, 69, 859-867.	12.1	291
20	Study protocol of the Bergen brain-gut-microbiota-axis study. <i>Medicine (United States)</i> , 2020, 99, e21950.	1.0	11
21	Acute effects of whey protein on energy intake, appetite and gastric emptying in younger and older, obese men. <i>Nutrition and Diabetes</i> , 2020, 10, 37.	3.2	8
22	Supplementation with Low Doses of a Cod Protein Hydrolysate on Glucose Regulation and Lipid Metabolism in Adults with Metabolic Syndrome: A Randomized, Double-Blind Study. <i>Nutrients</i> , 2020, 12, 1991.	4.1	9
23	The Effect of Supplementation with Low Doses of a Cod Protein Hydrolysate on Satiety Hormones and Inflammatory Biomarkers in Adults with Metabolic Syndrome: A Randomized, Double-Blind Study. <i>Nutrients</i> , 2020, 12, 3421.	4.1	4
24	Comparative expression profiling in the intestine of patients with <i>Giardia</i> -induced postinfectious functional gastrointestinal disorders. <i>Neurogastroenterology and Motility</i> , 2020, 32, e13868.	3.0	5
25	Abnormal Uroguanylin Immunoreactive Cells Density in the Duodenum of Patients with Diarrhea-Predominant Irritable Bowel Syndrome Changes following Fecal Microbiota Transplantation. <i>Gastroenterology Research and Practice</i> , 2020, 2020, 1-9.	1.5	6
26	Postprandial Symptoms in Patients With Functional Dyspepsia and Irritable Bowel Syndrome: Relations to Ultrasound Measurements and Psychological Factors. <i>Journal of Neurogastroenterology and Motility</i> , 2020, 26, 96-105.	2.4	21
27	Plasma levels of guanylin are reduced in patients with Crohn's disease. <i>Scandinavian Journal of Gastroenterology</i> , 2020, 55, 449-453.	1.5	6
28	Effects of Age on Acute Appetite-Related Responses to Whey-Protein Drinks, Including Energy Intake, Gastric Emptying, Blood Glucose, and Plasma Gut Hormone Concentrations—A Randomized Controlled Trial. <i>Nutrients</i> , 2020, 12, 1008.	4.1	13
29	Density of Musashi1-positive stem cells in the stomach of patients with irritable bowel syndrome. <i>Molecular Medicine Reports</i> , 2020, 22, 3135-3140.	2.4	1
30	Letter: faecal microbiota transplantation for irritable bowel syndrome— which improvements are required?. <i>Alimentary Pharmacology and Therapeutics</i> , 2020, 52, 1752-1753.	3.7	1
31	Diet in Irritable Bowel Syndrome (IBS): Interaction with Gut Microbiota and Gut Hormones. <i>Nutrients</i> , 2019, 11, 1824.	4.1	86
32	Effects of a Cod Protein Hydrolysate Supplement on Symptoms, Gut Integrity Markers and Fecal Fermentation in Patients with Irritable Bowel Syndrome. <i>Nutrients</i> , 2019, 11, 1635.	4.1	10
33	The effect of low dose marine protein hydrolysates on short-term recovery after high intensity performance cycling: a double-blinded crossover study. <i>Journal of the International Society of Sports Nutrition</i> , 2019, 16, 48.	3.9	6
34	Increasing the Dose and/or Repeating Faecal Microbiota Transplantation (FMT) Increases the Response in Patients with Irritable Bowel Syndrome (IBS). <i>Nutrients</i> , 2019, 11, 1415.	4.1	39
35	Clinical response to fecal microbiota transplantation in patients with diarrhea-predominant irritable bowel syndrome is associated with normalization of fecal microbiota composition and short-chain fatty acid levels. <i>Scandinavian Journal of Gastroenterology</i> , 2019, 54, 690-699.	1.5	29
36	Gastric Emptying of Low- and High-Caloric Liquid Meals Measured Using Ultrasonography in Healthy Volunteers. <i>Ultrasound International Open</i> , 2019, 05, E27-E33.	0.6	16

#	ARTICLE	IF	CITATIONS
37	The Effects of a Whey Protein and Guar Gum-Containing Preload on Gastric Emptying, Glycaemia, Small Intestinal Absorption and Blood Pressure in Healthy Older Subjects. <i>Nutrients</i> , 2019, 11, 2666.	4.1	9
38	Supplementation with cod protein hydrolysate in older adults: a dose range cross-over study. <i>Journal of Nutritional Science</i> , 2019, 8, e40.	1.9	16
39	Interobserver Analysis of CEUS-Derived Perfusion in Fibrotic and Inflammatory Crohn's Disease. <i>Ultraschall in Der Medizin</i> , 2019, 40, 76-84.	1.5	17
40	EFSUMB Gastrointestinal Ultrasound (GIUS) Task Force Group: Celiac sprue and other rare gastrointestinal diseases ultrasound features. <i>Medical Ultrasonography</i> , 2019, 21, 299.	0.8	33
41	Acute effect of a cod protein hydrolysate on postprandial acylated ghrelin concentration and sensations associated with appetite in healthy subjects: a double-blind crossover trial. <i>Food and Nutrition Research</i> , 2019, 63, .	2.6	6
42	EFSUMB Recommendations and Clinical Guidelines for Intestinal Ultrasound (GIUS) in Inflammatory Bowel Diseases. <i>Ultraschall in Der Medizin</i> , 2018, 39, 304-317.	1.5	128
43	Does the low FODMAP diet improve symptoms of radiation-induced enteropathy? A pilot study. <i>Scandinavian Journal of Gastroenterology</i> , 2018, 53, 541-548.	1.5	8
44	The kinetics of gut microbial community composition in patients with irritable bowel syndrome following fecal microbiota transplantation. <i>PLoS ONE</i> , 2018, 13, e0194904.	2.5	59
45	Effect of a cod protein hydrolysate on postprandial glucose metabolism in healthy subjects: a double-blind cross-over trial. <i>Journal of Nutritional Science</i> , 2018, 7, e33.	1.9	28
46	Genetic and transcriptional analysis of inflammatory bowel disease-associated pathways in patients with GUCY2C-linked familial diarrhea. <i>Scandinavian Journal of Gastroenterology</i> , 2018, 53, 1264-1273.	1.5	9
47	Acute Effects of Substitution, and Addition, of Carbohydrates and Fat to Protein on Gastric Emptying, Blood Glucose, Gut Hormones, Appetite, and Energy Intake. <i>Nutrients</i> , 2018, 10, 1451.	4.1	21
48	Effects of intraduodenal administration of the artificial sweetener sucralose on blood pressure and superior mesenteric artery blood flow in healthy older subjects. <i>American Journal of Clinical Nutrition</i> , 2018, 108, 156-162.	4.7	7
49	Altered levels of cytokines in patients with irritable bowel syndrome are not correlated with fatigue. <i>International Journal of General Medicine</i> , 2018, Volume 11, 285-291.	1.8	24
50	Effects of Substitution, and Adding of Carbohydrate and Fat to Whey-Protein on Energy Intake, Appetite, Gastric Emptying, Glucose, Insulin, Ghrelin, CCK and GLP-1 in Healthy Older Men: A Randomized Controlled Trial. <i>Nutrients</i> , 2018, 10, 113.	4.1	26
51	Effect of gender on the acute effects of whey protein ingestion on energy intake, appetite, gastric emptying and gut hormone responses in healthy young adults. <i>Nutrition and Diabetes</i> , 2018, 8, 40.	3.2	26
52	Transient elevation of anti-transglutaminase and anti-endomysium antibodies in Giardia infection. <i>Scandinavian Journal of Gastroenterology</i> , 2018, 53, 809-812.	1.5	11
53	Chromogranin A cell density in the large intestine of Asian and European patients with irritable bowel syndrome. <i>Scandinavian Journal of Gastroenterology</i> , 2017, 52, 691-697.	1.5	16
54	The possible role of gastrointestinal endocrine cells in the pathophysiology of irritable bowel syndrome. <i>Expert Review of Gastroenterology and Hepatology</i> , 2017, 11, 139-148.	3.0	24

#	ARTICLE	IF	CITATIONS
55	Enteroendocrine, Musashi 1 and neurogenin 3 cells in the large intestine of Thai and Norwegian patients with irritable bowel syndrome. <i>Scandinavian Journal of Gastroenterology</i> , 2017, 52, 1331-1339.	1.5	10
56	Guanylate Cyclase C Activation Shapes the Intestinal Microbiota in Patients with Familial Diarrhea and Increased Susceptibility for Crohn's Disease. <i>Inflammatory Bowel Diseases</i> , 2017, 23, 1752-1761.	1.9	13
57	Effects of randomized whey-protein loads on energy intake, appetite, gastric emptying, and plasma gut-hormone concentrations in older men and women. <i>American Journal of Clinical Nutrition</i> , 2017, 106, 865-877.	4.7	53
58	Effects of Timing of Whey Protein Intake on Appetite and Energy Intake in Healthy Older Men. <i>Journal of the American Medical Directors Association</i> , 2017, 18, 898.e9-898.e13.	2.5	7
59	EFSUMB Recommendations and Guidelines for Gastrointestinal Ultrasound - Part 1: Examination Techniques and Normal Findings (Short version). <i>Ultraschall in Der Medizin</i> , 2017, 38, 273-284.	1.5	55
60	EFSUMB Recommendations and Guidelines for Gastrointestinal Ultrasound - Part 1: Examination Techniques and Normal Findings (Long version). <i>Ultraschall in Der Medizin</i> , 2017, 38, e1-e15.	1.5	100
61	Prolonged intestinal transit and diarrhea in patients with an activating GUCY2C mutation. <i>PLoS ONE</i> , 2017, 12, e0185496.	2.5	19
62	An activating gucy2c mutation causes impaired contractility and fluid stagnation in the small bowel. <i>Scandinavian Journal of Gastroenterology</i> , 2016, 51, 1308-1315.	1.5	11
63	Validation of a Novel 3-Dimensional Sonographic Method for Assessing Gastric Accommodation in Healthy Adults. <i>Journal of Ultrasound in Medicine</i> , 2016, 35, 1411-1418.	1.7	6
64	Extra-intestinal symptoms in patients with irritable bowel syndrome: related to high total IgE levels and atopic sensitization?. <i>Scandinavian Journal of Gastroenterology</i> , 2016, 51, 908-913.	1.5	9
65	Ultrasound and Point Shear Wave Elastography in Livers of Patients with Primary Sclerosing Cholangitis. <i>Ultrasound in Medicine and Biology</i> , 2016, 42, 2146-2155.	1.5	14
66	Interaction between diet and gastrointestinal endocrine cells. <i>Biomedical Reports</i> , 2016, 4, 651-656.	2.0	26
67	The ultrasound meal accommodation test in 509 patients with functional gastrointestinal disorders. <i>Scandinavian Journal of Gastroenterology</i> , 2016, 51, 788-794.	1.5	15
68	The role of the neuropeptide Y (NPY) family in the pathophysiology of inflammatory bowel disease (IBD). <i>Neuropeptides</i> , 2016, 55, 137-144.	2.2	35
69	Peroral endoscopic pyloromyotomy for primary pyloric stenosis. <i>Endoscopy</i> , 2015, 47, E637-E638.	1.8	5
70	The relation between celiac disease, nonceliac gluten sensitivity and irritable bowel syndrome. <i>Nutrition Journal</i> , 2015, 14, 92.	3.4	53
71	Increased Chromogranin A Cell Density in the Large Intestine of Patients with Irritable Bowel Syndrome after Receiving Dietary Guidance. <i>Gastroenterology Research and Practice</i> , 2015, 2015, 1-8.	1.5	23
72	Densities of rectal peptide YY and somatostatin cells as biomarkers for the diagnosis of irritable bowel syndrome. <i>Peptides</i> , 2015, 67, 12-19.	2.4	18

#	ARTICLE	IF	CITATIONS
73	Lesser suppression of energy intake by orally ingested whey protein in healthy older men compared with young controls. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2015, 309, R845-R854.	1.8	46
74	Acute load-dependent effects of oral whey protein on gastric emptying, gut hormone release, glycemia, appetite, and energy intake in healthy men. <i>American Journal of Clinical Nutrition</i> , 2015, 102, 1574-1584.	4.7	56
75	Reduction in duodenal endocrine cells in irritable bowel syndrome is associated with stem cell abnormalities. <i>World Journal of Gastroenterology</i> , 2015, 21, 9577.	3.3	24
76	Amelioration of Severe TNBS Induced Colitis by Novel AP-1 and NF- $\kappa$ B Inhibitors in Rats. <i>Scientific World Journal</i> , The, 2014, 2014, 1-8.	2.1	15
77	Is irritable bowel syndrome an organic disorder?. <i>World Journal of Gastroenterology</i> , 2014, 20, 384.	3.3	79
78	Chromogranin A cells in the stomachs of patients with sporadic irritable bowel syndrome. <i>Molecular Medicine Reports</i> , 2014, 10, 1753-1757.	2.4	14
79	Stomach antral endocrine cells in patients with irritable bowel syndrome. <i>International Journal of Molecular Medicine</i> , 2014, 34, 967-974.	4.0	17
80	Duodenal Chromogranin A Cell Density as a Biomarker for the Diagnosis of Irritable Bowel Syndrome. <i>Gastroenterology Research and Practice</i> , 2014, 2014, 1-8.	1.5	28
81	Abnormal rectal endocrine cells in patients with irritable bowel syndrome. <i>Regulatory Peptides</i> , 2014, 188, 60-65.	1.9	47
82	Effects of Exogenous Glucagon-Like Peptide-1 on the Blood Pressure, Heart Rate, Mesenteric Blood Flow, and Glycemic Responses to Intraduodenal Glucose in Healthy Older Subjects. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2014, 99, E2628-E2634.	3.6	32
83	Irritable bowel syndrome: recent developments in diagnosis, pathophysiology, and treatment. <i>Expert Review of Gastroenterology and Hepatology</i> , 2014, 8, 435-443.	3.0	36
84	Increased gastric chromogranin A cell density following changes to diets of patients with irritable bowel syndrome. <i>Molecular Medicine Reports</i> , 2014, 10, 2322-2326.	2.4	22
85	Interaction between ingested nutrients and gut endocrine cells in patients with irritable bowel syndrome (Review). <i>International Journal of Molecular Medicine</i> , 2014, 34, 363-371.	4.0	31
86	Endocrine cells in the ileum of patients with irritable bowel syndrome. <i>World Journal of Gastroenterology</i> , 2014, 20, 2383.	3.3	35
87	Endocrine cells in the oxyntic mucosa of the stomach in patients with irritable bowel syndrome. <i>World Journal of Gastrointestinal Endoscopy</i> , 2014, 6, 176.	1.2	25
88	Chronic fatigue syndrome 5 years after giardiasis: differential diagnoses, characteristics and natural course. <i>BMC Gastroenterology</i> , 2013, 13, 28.	2.0	38
89	Quantitative Contrast-Enhanced Ultrasound Comparison Between Inflammatory and Fibrotic Lesions in Patients with Crohn's Disease. <i>Ultrasound in Medicine and Biology</i> , 2013, 39, 1197-1206.	1.5	75
90	A salmon peptide diet alleviates experimental colitis as compared with fish oil. <i>Journal of Nutritional Science</i> , 2013, 2, e2.	1.9	14

#	ARTICLE	IF	CITATIONS
91	Effects of dietary guidance on the symptoms, quality of life and habitual dietary intake of patients with irritable bowel syndrome. <i>Molecular Medicine Reports</i> , 2013, 8, 845-852.	2.4	68
92	The role of peptide YY in gastrointestinal diseases and disorders. <i>International Journal of Molecular Medicine</i> , 2013, 31, 275-282.	4.0	50
93	Parametric ultrasound perfusion analysis combining bolus tracking and replenishment. , 2012, , .		6
94	Diet and effects of diet management on quality of life and symptoms in patients with irritable bowel syndrome. <i>Molecular Medicine Reports</i> , 2012, 5, 1382-90.	2.4	103
95	Chrelin and the Brain-gut Axis as a Pharmacological Target for Appetite Control. <i>Current Pharmaceutical Design</i> , 2012, 18, 768-775.	1.9	29
96	Chromogranin A Cell Density as a Diagnostic Marker for Lymphocytic Colitis. <i>Digestive Diseases and Sciences</i> , 2012, 57, 3154-3159.	2.3	40
97	Immunophenotyping in post-giardiasis functional gastrointestinal disease and chronic fatigue syndrome. <i>BMC Infectious Diseases</i> , 2012, 12, 258.	2.9	16
98	Irritable bowel syndrome the role of gut neuroendocrine peptides. <i>Frontiers in Bioscience - Elite</i> , 2012, E4, 2683-2700.	1.8	55
99	High densities of serotonin and peptide YY cells in the colon of patients with lymphocytic colitis. <i>World Journal of Gastroenterology</i> , 2012, 18, 6070.	3.3	59
100	Effects of a health program comprising reassurance, diet management, probiotics administration and regular exercise on symptoms and quality of life in patients with irritable bowel syndrome. <i>Gastroenterology Insights</i> , 2010, 2, 6.	1.2	19
101	Chromogranin A as a possible tool in the diagnosis of irritable bowel syndrome. <i>Scandinavian Journal of Gastroenterology</i> , 2010, 45, 1435-1439.	1.5	61
102	Development of functional gastrointestinal disorders after <i>Giardia lamblia</i> infection. <i>BMC Gastroenterology</i> , 2009, 9, 27.	2.0	137
103	HYDROSONOGRAPHY OF THE GASTROINTESTINAL TRACT. <i>Advanced Series in Biomechanics</i> , 2005, , 359-377.	0.1	1
104	GASTRIC EMPTYING AND DUODENO-GASTRIC REFLUX ASSESSED BY DUPLEX SONOGRAPHY. <i>Advanced Series in Biomechanics</i> , 2005, , 337-358.	0.1	0
105	In vitro evaluation of three-dimensional ultrasonography based on magnetic scanhead tracking. <i>Ultrasound in Medicine and Biology</i> , 1998, 24, 1161-1167.	1.5	43
