Version: 2024-04-29

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
1954	Imaging exoplanets. 761-764		
1953	The Origin of the Atmosphere and of the Oceans. **2006**, 29-68		1
1952	RECENT PROGRESS IN THE THEORY OF COMPACT X-RAY SOURCESfn1. **1975**, 262, 331-360		9
1951	Outbursts of the recurrent nova T Coronae Borealis. **1976**, 262, 271-272		49
1950	Theory of Dwarf Novae. **1976**, 73, 173-192		
1949	Numerical Simulation of Mass Transfer and Accretion Disc Flow in Binary Systems. **1976**, 73, 237-252		2
1948	Accretion Processes in Close Binaries. **1976**, 73, 225-235		
1947	Mass Transfer in Semi-Detached Binaries. **1976**, 73, 253-264		
1946	Accretion-disk scenarios of the precursor peak in X-ray transients. **1976**, 261, 211-213		3
1945	Accretion flows in the magnetospheres of Vela X-1, AO535 + 26 and Her X-1. **1976**, 262, 356-360		54
1944	The spectrum of Cyg X-1 – A theoretical model. **1976**, 39, 487-494		9
1943	Theoretical Processes in Star Formation. **1977**, 75, 213-232		6
1942	Structure and Appearance of Envelopes around Protostars. **1977**, 42, 38-64		
1941	Collapse Dynamics and Collapse Models. **1977**, 75, 249-267		1
1940	NEUTRON STAR AND DEGENERATE DWARF MODELS OF X-RAY BURSTS*. **1977**, 302, 261-299		18
1939	Physics of the primitive solar accretion disk. **1978**, 18, 5-40		367
1938	Circumstellar disks and planetary formation. **1978**, 19, 207-210		

1937	Collapse of the presolar nebula. **1978**, 19, 229-236	18
1936	On the interaction between a strong stellar wind and a surrounding disk nebula. **1978**, 19, 261-277	30
1935	On the angular momentum in star formation. **1978**, 54, 253-261	2
1934	Planetensysteme in der Entstehungsphase. **1978**, 65, 590-591	
1933	Recurrent activity in galactic nuclei. **1978**, 275, 278-282	16
1932	The dynamical evolution and origin of the Martian moons. **1978**, 22, 193-210	50
1931	A finite-particle scheme for three-dimensional gas dynamics. **1978**, 27, 397-409	18
1930	The velocity dispersion in Saturn's rings. **1978**, 34, 227-239	275
1929	Gravity Power. **1978**, 17, 185-191	96
1928	Medium Resolution Spectroscopy at 1-2 Microns. **1979**, 47, 239-246	
1927	Time-Dependent Accretion Disks in Dwarf Novae. **1979**, 53, 510-517	
1926	Infrared astronomy. **1979**, 42, 87-157	6
1925	Gas drag in primordial circumplanetary envelopes: A mechanism for satellite capture. **1979**, 37, 587-611	196
1924	Structure and evolution of isolated giant gaseous protoplanets. **1979**, 38, 367-391	74
1923	Axisymmetric accretion flows very near black holes and Rosen-collapsed objects. **1979**, 10, 671-679	1
1922	The interaction between giant gaseous protoplanets and the primitive solar nebula. **1979**, 21, 173-183	14
1921	A tidal theory for the origin of the solar nebula. **1979**, 20, 61-101	12
1920	SS433 massive black hole?. **1979**, 278, 719-720	17

1919	Accretion on massive black holes in galactic nuclei. **1979**, 280, 214-215	15
1918	Stellar Evolution and Close Binaries. **1980**, 5, 27-44	7
1917	Star Formation in the Nuclei of Normal Galaxies. **1980**, 5, 209-222	
1916	A gravitational kinetic theory for planetesimals. **1980**, 44, 154-171	39
1915	Physical studies of the planetary rings. **1980**, 26, 39-96	13
1914	Sweeping of the Jovian resonances and the evolution of the asteroids. **1980**, 44, 722-729	21
1913	What Do We Know About Algol?. **1980**, 88, 217-219	1
1912	The Evolution of Giant Molecular Clouds. **1980**, 87, 137-149	1
1911	Accretion and Chemical Structure of Algols. **1980**, 88, 211-215	2
1910	1D, 2D and 3D Collapse of Interstellar Clouds. **1980**, 58, 235-246	1
1909	Dissipation of the Primordial Terrestrial Atmosphere Due to Irradiation of the Solar EUV. **1980**, 64, 1968-1985	67
1908	On the radial structure of Saturn's rings. **1981**, 8, 641-643	79
1907	On the formation of protostellar disks. **1981**, 48, 353-376	278
1906	Numerical experiments on the stability of preplanetary disks. **1981**, 48, 377-392	58
1905	Orbital inclination of Iapetus and the rotation of the Laplacian plane. **1981**, 46, 97-107	30
1904	Solar nebula dispersal and the stability of the planetary system. **1981**, 47, 234-264	128
1903	On the role of the magnetic field and turbulence in the evolution of the presolar nebula. **1981**, 1, 49-53	12
1902	Moonlets in Saturn's rings?. **1981**, 292, 707-711	67

1901	Cosmogonic aspects of the evolution of planetary systems. **1981**, 1, 21-36	2
1900	Stellar rotation and magnetic stars. **1981**, 44, 831-891	20
1899	Dynamical Constraints on the Formation and Evolution of Planetary Bodies. **1982**, 10, 61-108	70
1898	Numerical Calculations for Accretion Disks in Close Binary Systems. **1982**, 69, 219-230	1
1897	Viscous Dissipation in Jets. **1982**, 97, 223-225	
1896	Nucleation and condensation in the primitive solar nebula. **1982**, 52, 1-13	48
1895	Formation of the galilean satellites in a gaseous nebula. **1982**, 52, 14-39	182
1894	A Hypothesis on the Hydromagnetic Activity of T Tau, Type Stars and Related Objects. **1982**, 303, 251-261	13
1893	Starn's rings and bimodality of Keplerian systems. **1982**, 26, 171-196	23
1892	A model of two-stream non-radial accretion for binary X-ray pulsars. **1982**, 82, 343-361	16
1891	Sharp edges of planetary rings. **1982**, 299, 209-211	83
1890	Collisions in self-gravitating clouds of planetesimals. **1983**, 28, 267-303	15
1889	Dissipation of thick accretion disks. **1983**, 93, 295-303	1
1888	On disk accretion. **1983**, 90, 79-107	5
1887	Models of the formation of the solar nebula. **1983**, 53, 26-40	49
1886	Some cosmochemical consequences of a turbulent protoplanetary cloud. **1983**, 53, 41-54	61
1885	Origin of the atmospheres of the terrestrial planets. **1983**, 56, 195-201	99
1884	Alpha Beta Discs. **1983**, 72, 55-67	

1883	The Continuum Energy Distribution of the Old-Nova GK Per (1901). **1983**, 72, 127-131	
1882	On Activities of UV Cet-Type Flare Stars and of T Tau-Type Stars. **1983**, 71, 487-495	
1881	Magnetic Accretion Model for the Activities of Very Young Stars. **1983**, 71, 625-627	2
1880	Cataclysmic Variable Stars*. **1984**, 80, 127-137	
1879	Binary Statistics and Star Formation*. **1984**, 80, 41-70	
1878	Mass transfer and accretion in close binaries: A review. **1984**, 27, 149-169	3
1877	A kinetic model for rapid flows of granular materials. **1984**, 19, 177-186	27
1876	X-ray emission from non-Keplerian magnetically dominated accretion disks. **1984**, 7, 689-698	
1875	Structure, stability and evolution of Saturn's rings. **1984**, 309, 333-335	277
1874	Structure of the satellitary accretion disk of Saturn. **1984**, 59, 376-391	14
1873	Radial migration of preplanetary material: Implications for the accretion time scale problem. **1984**, 60, 29-39	60
1872	Self-similar problems of the time-dependant discs accretion and the nature of the temporary X-ray sources. **1984**, 3, 305-313	18
1871	Binary statistics and star formation. **1984**, 99, 41-70	23
1870	Cataclysmic variable stars. **1984**, 99, 127-137	5
1869	Flat rotation curves according to the fragmentation/shear flow model of galaxy formation. **1984**, 105, 109-130	6
1868	Can newly-forming stars act like Mini-QSOs?. **1984**, 98, 275-280	16
1867	Theory of extragalactic radio sources. **1984**, 56, 255-351	1281
1866	On the formation of meteoritic chondrules by aerodynamic drag heating in the solar nebula. **1984**, 70, 11-26	71

1865 Cataclysmic Variables. **1984**, T7, 101-107 1

1864 Titan and the Dispersal of the Proto-Saturnian Nebula. **1984**, 5, 459-461

1863 Mass loss from solar-type stars. **1985**, 100, 587-597 4

1862 Approximate rotation curve solutions for the evolution of a viscous protogalactic disk. **1985**, 111, 139-155 6

1861 A model for symbiotic star Z Andromedae. **1985**, 110, 277-291 2

1860 Saturn's rings Dynamical processes. **1985**, 5, 121-124

1859 A granular flow model for dense planetary rings. **1985**, 63, 406-420 109

1858 Protostellar angular momentum transport by spiral density waves. **1985**, 64, 435-447 11

1857 ASTROPHYSICS OF NEUTRON STARS AND BLACK HOLES. **1985**, 210-238

1856 Cataclysmic novae. **1985**, 48, 483-530 7

1855 Toward a Unified Theory of Active Galactic Nucleia. **1986**, 470, 51-70 1

1854 The origin of comets. **1986**, 29, 53-112 43

1853 Magnetodynamic phenomena in the solar and stellar outer atmospheres. **1986**, 118, 127-148 12

1852 Classical Algol systems (invited review). **1986**, 118, 241-255 4

1851 The effects of self-gravity on the solar nebula. **1986**, 118, 515-521 1

1850 An indicator of galactic violence. **1986**, 126, 255-267 2

1849 Stellar vs. solar activity: The case of pre-main sequence stars. **1987**, 117-138 4

1848 Non linear waves in two dimensional keplerian flows. **1987**, 38, 69-104

1847	Circumstellar maher of young low-mass stars: Observations versus theory. **1987**, 122, 23-38	4
1846	Star Formation: From OB Associations to Protostars. **1987**, 115, 1-18	88
1845	Accretion Disk Boundary Layers: Their Structure and Stability. **1987**, 93, 315-320	
1844	Theoretical Spectra of Cataclysmic Variables. **1987**, 93, 341-349	
1843	The Evolution of Rapidly Rotating B Stars (Review Paper). **1987**, 92, 486-499	
1842	Accretion disk boundary layers: Their structure and stability. **1987**, 130, 315-320	2
1841	Theoretical spectra of cataclysmic variables. **1987**, 130, 341-349	3
1840	Accretion disc models around compact objects. **1987**, 137, 77-84	
1839	On the physics of resonant disk-satellite interaction. **1987**, 69, 157-175	111
1838	Scattering properties of a moonlet (satellite) embedded in a particle ring: Application to the rings of Saturn. **1987**, 71, 69-77	13
1837	Origin of the Moon-The Collision Hypothesis. **1987**, 15, 271-315	195
1836	Self-similar processes in accretion discs. **1988**, 8, 163-169	4
1835	Photometric investigation of the Herbig Ae/Be star MWC 297. I. Quasisimultaneous UBVRIJHK observations. **1988**, 28, 313-320	4
1834	Estimate of the spectral classes of the T Tau type stars HL Tau and DG Tau. **1988**, 28, 91-94	
1833	On the hydrodynamics of accretion discs. **1988**, 141, 347-351	
1832	Formation of binary systems and protoplanetary discs: A unified approach. **1988**, 145, 183-221	
1831	The role of presolar dust in the formation of the solar system. **1988**, 40, 165-211	38
1830	Stability of particulate discs. **1988**, 43, 61-86	7

1829	General method describing self-similar regimes of nonstationary disc accretion. A possibility of self-organization. **1988**, 8, 141-150	3
1828	Chemical processes in the early solar system: A discussion of meteorites and astrophysical models. **1988**, 32, 1-21	5
1827	Infrared spectra of young stellar objects. **1988**, 164-170	2
