

Soil health: model programs in the USA

Frontiers of Agricultural Science and Engineering
7, 356

DOI: [10.15302/j-fase-2020340](https://doi.org/10.15302/j-fase-2020340)

Citation Report

#	ARTICLE	IF	CITATIONS
1	Characterization of the belowground microbial community and co-occurrence networks of tobacco plants infected with bacterial wilt disease. <i>World Journal of Microbiology and Biotechnology</i> , 2022, 38, .	3.6	7
2	Effect of fertilization regimes on continuous cropping growth constraints in watermelon is associated with abundance of key ecological clusters in the rhizosphere. <i>Agriculture, Ecosystems and Environment</i> , 2022, 339, 108135.	5.3	15
3	Coordinative Management of Soil Resources and Agricultural Farmland Environment for Food Security and Sustainable Development in China. <i>International Journal of Environmental Research and Public Health</i> , 2023, 20, 3233.	2.6	7
4	Editorial: Soil-root-microbe interactions promote soil and plant health. <i>Frontiers in Microbiology</i> , 0, 14, .	3.5	1
5	Meta-analysis on the effects of types and levels of N, P, and K fertilization on organic carbon in cropland soils. <i>Geoderma</i> , 2023, 437, 116580.	5.1	6
6	Drivers and barriers to adoption of regenerative agriculture: cases studies on lessons learned from organic. <i>International Journal of Agricultural Sustainability</i> , 2024, 22, .	3.5	0
