

# CITATION REPORT

List of articles citing

A data-driven linear formulation of the optimal demand response scheduling problem for an industrial air separation unit

DOI: 10.1016/j.ces.2022.117468

Chemical Engineering Science, 2022, , 117468.

**Version:** 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
7	Optimization of co-production air separation unit based on MILP under multi-product deterministic demand. <b>2022</b> , 325, 119850		0
6	Grid-responsive smart manufacturing: A perspective for an interconnected energy future in the industrial sector.		1
5	An Integrated Stochastic Deep Learning Short-Term Production Scheduling Optimal Control Framework for General Batch Processes.		0
4	A grid view on the dynamics of processes participating in demand response programs. <b>2023</b> , 169, 108070		0
3	Scheduling optimization and risk analysis for energy-intensive industries under uncertain electricity market to facilitate financial planning. <b>2023</b> , 174, 108234		0
2	Reduced order modeling of a pressure column of an air separation unit using the Dynamic Edmister Method. <b>2023</b> , 174, 108250		0
1	Optimization of oxygen system scheduling in hybrid action space based on deep reinforcement learning. <b>2023</b> , 171, 108168		0
