Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
1679	Collocation, dissipation and [overshoot] for time integration schemes in structural dynamics. <i>Earthquake Engineering and Structural Dynamics</i> , 1978 , 6, 99-117	4	313
1678	Nonlinear static and dynamic analysis of framed structures. 1979 , 10, 879-897		57
1677	Implicit-explicit finite elements in nonlinear transient analysis. 1979 , 17-18, 159-182		212
1676	Recent developments in computer methods for structural analysis. 1980 , 57, 427-439		17
1675	An alpha modification of Newmark's method. 1980 , 15, 1562-1566		345
1674	An alternative single-step algorithm for dynamic problems. <i>Earthquake Engineering and Structural Dynamics</i> , 1980 , 8, 31-40	4	44
1673	A viscous approach to post buckling analysis. 1981 , 3, 187-189		5
1672	The Family of algorithms for time-step integration with improved numerical dissipation. <i>Earthquake Engineering and Structural Dynamics</i> , 1982 , 10, 537-550	4	55
1671	Practical considerations for thermal transient finite element analysis using isoparametric elements. 1982 , 69, 109-126		15
1670	Comparison of Hilber-Hughes-Taylor and Bossak methods for the numerical integration of vibration equations. 1983 , 19, 765-771		18
1669	An element-by-element solution algorithm for problems of structural and solid mechanics. 1983 , 36, 241-254		186
1668	Time integration of the equations of motion of a structural system including damping. 1983 , 21, 1301-1309		3
1667	Broken wire analysis of transmission line systems. 1984 , 18, 1077-1085		7
1666	The role of time integration in suspension bridge dynamics. 1984 , 20, 715-732		4
1665	A further look at Newmark, Houbolt, etc., time-stepping formulae. 1984 , 20, 1009-1017		38
1664	A unified set of single step algorithms part 3: The beta-m method, a generalization of the Newmark scheme. 1985 , 21, 1345-1359		157
1663	Elastic-plastic analysis of a dynamically loaded circumferentially notched round bar. 1985 , 22, 437-452		34

1662	The discretization error of newmark's method for numerical integration in structural dynamics. <i>Earthquake Engineering and Structural Dynamics</i> , 1985 , 13, 43-51	4	5
1661	Errors in response calculations for beams. <i>Earthquake Engineering and Structural Dynamics</i> , 1985 , 13, 293-306	4	1
1660	Computational aspects of a seismic performance test method using on-line computer control. <i>Earthquake Engineering and Structural Dynamics</i> , 1985 , 13, 507-526	4	36
1659	Errors in response calculations for extensional vibrations of bars. <i>Earthquake Engineering and Structural Dynamics</i> , 1986 , 14, 121-132	4	
1658	Linear dynamic analysis of mechanical systems in the medium frequency range. 1986 , 23, 605-637		19
1657	Dynamic stress intensity factors for ultrasonic fatigue test specimens. 1986 , 23, 795-806		3
1656	On the equivalence of alternative finite element schemes in the time domain. 1986 , 3, 45-60		5
1655	Cumulative experimental errors in pseudodynamic tests. <i>Earthquake Engineering and Structural Dynamics</i> , 1987 , 15, 409-424	4	94
1654	Elimination of spurious higher-mode response in pseudodynamic tests. <i>Earthquake Engineering and Structural Dynamics</i> , 1987 , 15, 425-445	4	80
1653	An error analysis of truncated starting conditions in step-by-step time integration: Consequences for structural dynamics. <i>Earthquake Engineering and Structural Dynamics</i> , 1987 , 15, 901-910	4	35
1652	On the effect of natural damping on the stability of a time-stepping scheme. 1987 , 3, 141-144		1
1651	The analysis of aerodynamic flutter of suspension bridges. 1988 , 30, 593-600		33
1650	Assessment of dynamic response FD algorithms by beam and plate FE computations. 1988 , 10, 175-182		
1649	Development of an implicit method with numerical dissipation from a generalized single-step algorithm for structural dynamics. 1988 , 67, 367-385		137
1648	Practical performance of the and comparison with other dissipative algorithms in structural dynamics. 1988 , 67, 87-110		40
1647	Aerodynamic flutter analysis of suspension bridges by a modal technique. 1989 , 11, 75-82		98
1646	Significant characteristics of three-dimensional flexible riser analysis. 1989 , 11, 223-233		10
1645	A computational procedure for interaction of high-speed vehicles on flexible structures without assuming known vehicle nominal motion. 1989 , 76, 207-244		26

1644	A generalized least-squares family of algorithms for transient dynamic analysis. <i>Earthquake Engineering and Structural Dynamics</i> , 1989 , 18, 539-550	4	27
1643	An improved implicit-explicit time integration method for structural dynamics. <i>Earthquake Engineering and Structural Dynamics</i> , 1989 , 18, 643-653	4	72
1642	Extended comparison of the Hilber-Hughes-Taylor β method and the. 1989 , 76, 87-93		20
1641	Time integration of the equations of motion in mechanism analysis. 1989 , 33, 801-820		128
1640	A survey of direct time-integration methods in computational structural dynamicsII. Implicit methods. 1989 , 32, 1387-1401		247
1639	Finite element analysis of wave propagation in an elastic half-space under step loading. 1989 , 32, 721-735		14
1638	Optimal pretensioned forces for cable networks. 1989 , 33, 1349-1354		7
1637	β method of numerical integration. 1989 , 5, 321-336		7
1636	Weighting functions in single-step algorithms for a non-linear equation. 1990 , 6, 447-455		1
1635	Assessment of errors in the newmark method in structural dynamics. <i>Earthquake Engineering and Structural Dynamics</i> , 1990 , 19, 457-467	4	8
1634	On the accuracy of an implicit algorithm for pseudodynamic tests. <i>Earthquake Engineering and Structural Dynamics</i> , 1990 , 19, 631-651	4	31
1633	Higher derivative explicit one step methods for non-linear dynamic problems. Part I: Design and theory. 1990 , 29, 275-290		43
1632	Partial hybrid stress element for transient analysis of thick laminated composite plates. 1990 , 29, 1787-1796		7
1631	Space-time finite element methods for second-order hyperbolic equations. 1990 , 84, 327-348		217
1630	On the accuracy of direct integration methods for structural dynamics. 1990 , 13, 479-490		
1629	Experimental Error Effects in Pseudodynamic Testing. 1990 , 116, 805-821		55
1628	Error Analysis for Pseudodynamic Test Method. I: Analysis. 1990 , 116, 1618-1637		35
1627	APPLICATION OF TIME DOMAIN BOUNDARY-FINITE ELEMENT HYBRID METHOD TO DYNAMIC ANALYSIS OF SEDIMENT-FILLED VALLEYS. 1991 , 1991, 107-116		1

1626	Dynamic instability of suspension bridges. 1991 , 41, 1321-1328		16
1625	Limitations on linear multistep methods for structural dynamics. <i>Earthquake Engineering and Structural Dynamics</i> , 1991 , 20, 191-196	4	17
1624	Implicit time integration for pseudodynamic tests. <i>Earthquake Engineering and Structural Dynamics</i> , 1991 , 20, 551-576	4	111
1623	On enhancement of accuracy in direct integration dynamic response problems. <i>Earthquake Engineering and Structural Dynamics</i> , 1991 , 20, 699-703	4	12
1622	Implicit time integration for pseudodynamic tests: Convergence and energy dissipation. <i>Earthquake Engineering and Structural Dynamics</i> , 1991 , 20, 809-819	4	18
1621	A post-correction integration algorithm for non-linear dynamic analysis of structures. <i>Earthquake Engineering and Structural Dynamics</i> , 1991 , 20, 1083-1097	4	3
1620	LARGE DISPLACEMENT ANALYSIS OF SUBMERGED MULTIBODY SYSTEMS. 1992 , 9, 609-634		4
1619	Stability analysis of elemental explicit-implicit partitions by Fourier methods. 1992 , 95, 87-96		14
1618	Algorithms for static and dynamic multiplicative plasticity that preserve the classical return mapping schemes of the infinitesimal theory. 1992 , 99, 61-112		550
1617	Improved numerical dissipation for time integration algorithms in conduction heat transfer. 1992 , 97, 149-156		6
1616	Combined beam elements for large dynamic motion of whipping pipes with fluid-structure interaction. 1992 , 11, 117-152		7
1615	Exact energy-momentum conserving algorithms and symplectic schemes for nonlinear dynamics. 1992 , 100, 63-116		267
1614	A numerical solution procedure for exterior wave problems. 1992 , 43, 77-84		9
1613	Time finite element methods for structural dynamics. 1992 , 33, 307-331		120
1612	On a stress resultant geometrically exact shell model. Part VI: Conserving algorithms for non-linear dynamics. 1992 , 34, 117-164		82
1611	Seismic response analysis of alluvial valley with two dipping layers by a boundary element-finite element coupling method. 1992 , 35, 1753-1769		1
1610	Assessment of the accuracy of the newmark method in transient analysis of wave propagation problems. <i>Earthquake Engineering and Structural Dynamics</i> , 1992 , 21, 987-1004	4	21
1609	An analysis of the crack tip fields in a ductile three-point bend specimen subjected to impact loading. 1993 , 45, 717-728		1

1608	A simple time-step control scheme. 1993 , 9, 873-881		7
1607	Seismic cracking and energy dissipation in concrete gravity dams. <i>Earthquake Engineering and Structural Dynamics</i> , 1993 , 22, 991-1007	4	89
