**Version:** 2024-04-11

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
3	Automated machine learning-based model for the prediction of delirium in patients after surgery for degenerative spinal disease.		1
2	Development and validation of a nomogram to predict postoperative delirium in type B aortic dissection patients underwent thoracic endovascular aortic repair. 9,		0
1	Effects of inflammation and oxidative stress on postoperative delirium in cardiac surgery. 9,		0
