Version: 2024-04-24

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
257	Optical MIMO transmission using Q-ary PPM for atmospheric channels.		6
256	Detection of low gas densities by resonance fluorescence in the vacuum ultraviolet. 1978 , 16, 139-145		16
255	Quantum Fluctuations and Adaptive Spatial Interactions in the Visual System. 1978 , 8, 875-879		2
254	Statistics of integrated speckle pattern due to mixed coherent and diffused light. 1979 , 11, 479-484		2
253	Optical Bilinear Transformations: General Properties. 1979 , 26, 777-799		81
252	Multi-photoelectron fluorescence selective detection of single atoms by laser radiation. 1980 , 22, 245-250		15
251	Signal preprocessing for digital correlators. 1980 , 22, 251-256		11
250	Towards an ideal photon correlator with a SAW-device. 1980 , 22, 113-114		
249	Numerical study on transmission of multimode laser pulses by dye molecules. 1980 , 23, 209-214		
248	Photon Counting Probabilities in Quantum Optics. 1981 , 28, 981-996		244
247	Determination of Lengths and Diameters of Rod-Like Macromolecules by Intensity Fluctuation Spectroscopy. 1981 , 14, 681-686		
246	A Fast Computer-Simulation Method for Generating Values of $n(2)$ in Intensity Fluctuation Spectroscopy. 1981 , 14, 123-129		7
245	Photo-multiplicateur éclairé Par Des Impulsions Subnanosecondes. 1981 , 28, 397-404		
244	Computer Simulation of Level-Crossing Detection by Conventional and Photon Correlation Techniques. 1981 , 14, 279-286		
243	On the approximate statistics of integrated speckle patterns due to mixed coherent and diffused light. 1981 , 13, 345-347		
242	Dead time corrections to photon counting statistics I: Classical theory. 1981 , 17, 203-216		4
241	Solvable models of temporally correlated random walk on a lattice. 1981 , 17, 55-68		7

240	Fluctuation properties of multiplied-Poisson light: Measurement of the photon-counting distribution for radioluminescence radiation from glass. <i>Physical Review A</i> , 1981 , 24, 1651-1654	2.6	19
239	Expansion of Coherence Functions of Stationary, Partially Coherent, Polychromatic Fields. 1982 , 29, 187-195		1
238	Expansions of the Coherence Matrix of a Partially Polarized, Quasi-monochromatic Source. 1982 , 29, 1255-1269		1
237	On the Characterization of Polychromatic Sources That Generate the Same Intensity at the Output Plane. 1982 , 29, 1613-1617		
236	Multiplication noise in the human visual system at threshold: 2. Probit estimation of parameters. 1982 , 43, 87-96		15
235	Détection d'un signal déterministe après réflexions aléatoires. 1983 , 38, 287-296		2
234	Dead time corrections to photocounts and clipped correlations of Gaussian light. 1983 , 20, 547-558		
233	Coherence requirement for partially coherent correlation detection. 1983 , 30, 23-27		4
232	On the Squared Envelope of a Gaussian Process. 1983 , AES-19, 492-495		1
231	Noise in Photon Correlation and Photon Structure Functions. 1983 , 30, 155-166		41
230	Particle-sampling statistics in laser anemometers: sample-and-hold systems and saturable systems. 1983 , 133, 397-411		50
229	Coherence and photon statistics for optical fields generated by Poisson random emissions. <i>Physical Review A</i> , 1983 , 27, 360-374	2.6	31
228	Determination of a Small Number of Particles from Photocount Distribution of Scattered Light. 1983 , 30, 1645-1654		3
227	Brillouin Scattering in Photon Correlation Spectroscopy of Liquids. 1983 , 30, 875-880		14
226	Determination of the Parameters Characterizing a Two Lines Spectrum by Measuring $n(2)(T)$: Rectangular Profiles Approximation. 1983 , 16, 363-377		5
225	Three-dimensional theory of initiation of superfluorescence. <i>Physical Review A</i> , 1984 , 30, 1392-1400	2.6	13
224	Determination of the lifetime of the 5 P122 level of Rb85 through the measurement of $n(2)(T)$. <i>Physical Review A</i> , 1984 , 29, 1938-1943	2.6	13
223	On the photon statistics of light scattered by a small number of particles. 1984 , 34, 862-869		

222	On-line-Steuerung eines lichtelektrischen Sternphotometers. 1984 , 305, 25-29		4
221	Error Improvement in the Analysis of Macromolecules by Photon Statistics. 1984 , 17, 345-351		1
220	Use of time-delay correlators and wave-shaping techniques in the statistical analysis of Barkhausen pulses. 1984 , 43, 274-282		2
219	Normalizing transformations for dead-time-modified Poisson counting distributions. 1985 , 53, 121-124		10
218	Expansions of general stationary stochastic optical fields: General formalism. 1985 , 85, 182-192		1
217	Simultane Bestimmung von elektroforetischer Beweglichkeit und Teilchengröße bei Berlagerter Konvektion an Suspensionen und Emulsionen. 1985 , 263, 342-347		3
216	Measurements of stellar scintillation using photon counting statistics. 1985 , 306, 145-156		4
215	Quantum theory of spatial and temporal coherence properties of stimulated Raman scattering. <i>Physical Review A</i> , 1985 , 32, 332-344	2.6	124
214	A Non-markovian Model of Photodetection of Cavity Radiation. 1985 , 32, 749-766		5
213	Noise properties and time response of the staircase avalanche photodiode. 1985 , 3, 1223-1231		4
212	Power fluctuations in the side modes of injection lasers. 1985 , 3, 205-208		11
211	On the Analysis of Periodic Signals in Spectroscopy by Photon Statistics. 1985 , 39, 718-719		6
210	Analysis of Two Spectral Lines with a Multichannel System or by Measuring $n^{(2)}(T)$: Comparison of Errors. 1985 , 39, 877-880		6
209	Application of Photon Correlation and Multichannel Analysis Techniques to the Measurement of a Two-Line Spectrum: Simultaneous Determination of All Parameters. 1986 , 40, 959-962		8
208	. 1986 , 22, 1184-1193		79
207	Probability of Error and Capacity of PPM Photon Counting Channel. 1986 , 34, 600-605		11
206	A Non-Markov Model of Cavity Radiation and Its Detection. 1986 , 33, 191-205		6
205	Superposition of squeezed coherent states with thermal light. <i>Physical Review A</i> , 1986 , 34, 3466-3469	2.6	59

204	Dead time correction of photon correlation functions. 1986 , 41, 95-102		22
203	Noise in Pulsed Fibre Optical Communication Systems. 1986 , 33, 103-126		2
202	Improvement in laser Doppler velocimetry by the use of time-interval photon statistics. <i>Physical Review A</i> , 1986 , 33, 416-420	2.6	13
201	Semiclassical theory of light detection in the presence of feedback. 1986 , 56, 1136-1139		20
200	Analysis of Two Spectral Lines with Gaussian Profile by Using Photon Statistics. Comparison with Other Profile Shapes. 1986 , 19, 603-616		
199	Non-Standard Normalization of the Second-Order Factorial Moment as a Method of Reducing the Error Involved in Characterizing Spectral Profiles. 1987 , 20, 451-458		
198	Statistical properties of cosmic-ray showers at ground level determined from photomultiplier-tube background registrations. 1987 , 36, 2649-2665		2
197	Photon-counting distribution in squeezed states. <i>Physical Review A</i> , 1987 , 36, 5866-5869	2.6	83
196	Application of photon count statistical measurements to the stationary fluorescence of fluoranthene. 1987 , 91, 1215-1216		
195	Second-order Statistics of Integrated Intensities and of Detected Photoelectrons. 1987 , 34, 91-102		9
194	Approximate Photocounting Statistics of Shot-noise Light with Arbitrary Spectrum. 1987 , 34, 1169-1178		8
193	The Density-matrix Approach to Cavity Radiation and Population Point Process Models. 1987 , 34, 1545-1557		2
192	Correlation techniques in dynamic light scattering. 1987 , 42, 193-213		88
191	Multinomial pulse-number distributions for neural spikes in primary auditory fibers: theory. 1988 , 59, 91-102		6
190	On an inverse problem in quantum statistical physics. 1988 , 38, 705-719		6
189	Noise Characteristics of Solitary Laser Diodes. 1988 , 152-213		8
188	Waiting-time distributions in the photodetection of squeezed light. <i>Physical Review A</i> , 1988 , 38, 2423-2430		29
187	Detailed study of the Fourier transform of the time-interval photon statistics distribution applied to laser Doppler velocimetry. <i>Physical Review A</i> , 1988 , 38, 2910-2920	2.6	11

186	Unified formalism for excess current noise in random-walk models. 1988 , 37, 10143-10149		9
185	Superposition of number eigenstates with thermal light. <i>Physical Review A</i> , 1988 , 37, 3890-3895	2.6	15
184	.		3
183	Expressions of various joint probability distributions of photoelectrons in terms of a photocount distribution $P(n,t_1,t_2)$. <i>Physical Review A</i> , 1988 , 38, 2937-2942	2.6	9
182	Statistical Nuclear Particle Autoradiographic Spectrometry: Identification and Quantum Analysis. 1988 , 24, 14-19		2
181	Probability-density-functional description of photoelectron statistics. <i>Physical Review A</i> , 1989 , 40, 1096-1108	1.6	15
180	Transition between incompatible properties: Dynamical model for quantum measurement. 1989 , 62, 1-4		6
179	Optical signals with thermal noise. <i>Physical Review A</i> , 1989 , 39, 206-213	2.6	23
178	Counting statistics of partial coherent light with Lorentzian spectrum. <i>Physical Review A</i> , 1989 , 40, 1456-1463	1.6	3
177	Biological Activity Measurement on Botanical Specimen Surfaces Using a Temporal Decorrelation Effect of Laser Speckle. 1989 , 36, 165-179		138
176	. 1989 , 25, 1767-1770		21
175	Photoelectron waiting times and atomic state reduction in resonance fluorescence. <i>Physical Review A</i> , 1989 , 39, 1200-1218	2.6	153
174	Characterizing Low Light Level Signals with the Triggered Delayed Photocount Distribution. 1989 , 22, 279-287		2
173	Extensive Measurements on Soot Particles in Laminar Premixed Flames by Quasi Elastic Light Scattering Spectroscopy. 1989 , 67, 17-36		15
172	Quantum Beat Detection by Photon Statistics Techniques. 1989 , 22, 1241-1250		3
171	Detection of on-off modulated optical signals. 1989 , 1-44		
170	Quantum correlations in high-energy multihadron distributions. 1990 , 42, 3025-3036		4
169	Statistical properties of wiggler and bending-magnet radiation from the Brookhaven vacuum-ultraviolet electron storage ring. 1990 , 65, 3393-3396		18

168	Photon-counting statistics of the subthreshold transient degenerate parametric oscillator. <i>Physical Review A</i> , 1990 , 42, 592-598	2.6	7
167	Glauber-Sudarshan P representation of negative binomial states. <i>Physical Review A</i> , 1990 , 41, 519-522	2.6	31
166	Continuous state reduction of correlated photon fields in photodetection processes. <i>Physical Review A</i> , 1990 , 41, 6331-6344	2.6	15
165	Quantum theory for continuous photodetection processes. <i>Physical Review A</i> , 1990 , 41, 3891-3904	2.6	79
164	. 1990 , 8, 478-491		281
163	Photoelectron Counting Theory in Terms of the Wigner and Q Representations of the Light Field. 1991 , 38, 1463-1470		4
162	Bit-error rate for a lightwave communication system incorporating an erbium-doped fibre amplifier. 1991 , 27, 598		28
161	Doubly stochastic Poisson point process driven by fractal shot noise. <i>Physical Review A</i> , 1991 , 43, 4192-4215		47
160	Measurement-induced oscillations of a highly squeezed state between super- and sub-Poissonian photon statistics. 1991 , 66, 1046-1049		28
159	Transient-gain-assisted noise reduction in photodetection of nonclassical light. 1991 , 67, 580-583		3
158	Analysis of Depolarized Light Scattering from a Solution of Rod-Like Macromolecules Through A Laplace Transform Method. 1991 , 24, 1247-1263		1
157	The Measurement of the First-order Factorial Moment of Double-triggered Photocount Distribution as an Alternative to Triple Correlation. 1992 , 39, 1673-1680		3
156	Corpuscular theory of intensity noise with gain compression. <i>Physical Review A</i> , 1992 , 45, 1775-1786	2.6	11
155	Continuous quantum-nondemolition measurement of photon number. <i>Physical Review A</i> , 1992 , 46, 2859-2869	2.6	42
154	Evaluation of the Autocorrelation Function from Measurement of the Photocount Distribution. 1992 , 25, 651-660		
153	Distribution of Stokes Parameters in a Random Linear Scattering. 1992 , 39, 1167-1171		3
152	Coherence and spectral linewidth properties of active grating-coupled, surface-emitting amplified lasers.		1
151	. 1992 , 10, 458-468		6

150	Study of Different Photon Statistics Techniques, Based on Time-Interval Measurement, Applied to Fluorescence Decay Spectroscopy. 1993 , 47, 1251-1255		1
149	. 1993 , 11, 1622-1631		11
148	. 1993 , 5, 105-108		1
147	Experimental Study of Periodically Modulated Light Beams by Measuring the Moment Generating Function of the Number of photopulses. 1993 , 26, 733-744		
146	Theory of noise in optical amplifiers. 1993 , 12, 369-380		4
145	Homodyne photon statistics of the subthreshold degenerate parametric oscillator. <i>Physical Review A</i> , 1993 , 47, 3396-3412	2.6	23
144	The Measurement of the Triggered Probability Density as an Alternative to the Direct Evaluation of the Triple Correlation. 1994 , 41, 563-568		
143	Sine Transform of the Autocorrelation Function Applied to Single-Photon-Decay Spectroscopy.. 1994 , 27, 639-648		1
142	Statistics of photons and de-excited atoms in a micromaser with Poissonian pumping. <i>Physical Review A</i> , 1994 , 50, 783-786	2.6	18
141	Bounds for Bose-Einstein correlation functions. 1994 , 49, 4434-4437		4
140	Application of a Laplace Transform Method to the Study of Binary Mixtures of Spherical and Rod-Like Particles for Low Intensity Levels.. 1994 , 27, 903-919		
139	A nonstationary Poisson point process describes the sequence of action potentials over long time scales in lateral-superior-olive auditory neurons. 1994 , 70, 209-17		38
138	Cornish's expansion analysis of characteristics of a communication system with an optical amplifier. 1994 , 77, 38-47		
137	Thermal coherent states in the Bargmann representation. <i>Physical Review A</i> , 1994 , 50, 3331-3339	2.6	28
136	The evolution and measurement of a population of pairs. 1995 , 32, 1048-1062		6
135	Measurement and the interpretation of quantum mechanics and relativity theory. 1995 , 102, 293-318		3
134	Quantum noise reduction in optical imaging: Role of the spatial coherence of the source. <i>Physical Review A</i> , 1995 , 51, 1656-1661	2.6	2
133	Autocorrelation Central Hole in Clipped Photon-counting Detection Estimation from the Zero-count Probability Density. 1995 , 42, 1459-1465		

132	Displaced negative-binomial mixed states: Generalized thermo-field-dynamics. <i>Physical Review A</i> , 1995 , 51, 2353-2360	2.6	12
131	Photoelectron statistics of solitons corrupted by amplified spontaneous emission. <i>Physical Review A</i> , 1995 , 51, 1662-1668	2.6	
130	Results from the Jet Propulsion Laboratory stratospheric ozone lidar during STOIC 1989. 1995 , 100, 9263		8
129	Statistics of Entangled-Photon Coincidences in Parametric Downconversiona. 1995 , 755, 680-686		17
128	Reconstruction of two-dimensional light intensity distribution from the data of photo-count experiments.
