

CITATION REPORT

List of articles citing

Single-Junction Organic Solar Cells with 19.17% Efficiency Enabled by Introducing One Asymmetric Guest Acceptor.

DOI: 10.1002/adma.202110147
Advanced Materials, 2022, , e2110147.

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
206	Efficient All-Polymer Solar Cells with Sequentially Processed Active Layers. 2022 , 14, 2058		0
205	Thermal Annealing Effect on Non-Fused Ring Acceptor Based Bulk Heterojunction Investigated by Transient Absorption Spectroscopy. 2022 , 100129		
204	Achieving 15.81% and 15.29% efficiency of all-polymer solar cells based on layer-by-layer and bulk heterojunction structures.		14
203	Recent advances in small molecular design for high performance non-fullerene organic solar cells.		1
202	Ultrafast Carrier Dynamics of Non-fullerene Acceptors with Different Planarity: Impact of Steric Hindrance. 5860-5866		0
201	Improved Current Density and Fill Factor of Non-fullerene Organic Solar Cells Prepared under Solvent Vapor Atmosphere.		2
200	Binary Organic Solar Cells Breaking 19% via Manipulating Vertical Component Distribution. <i>Advanced Materials</i> , 2204718	24	58
199	Hammer throw-like hybrid cyclic and alkyl chains: a new side chain engineering for over 18% efficiency organic solar cells. 2022 , 107538		4
198	Highly efficient layer-by-layer deposition solar cells achieved with halogen-free solvents and molecular engineering of non-fullerene acceptors. 2022 , 448, 137621		0
197	Peripheral Halogenation Engineering Controls Molecular Stacking to Enable Highly Efficient Organic Solar Cells.		9
196	High-Performance Ternary Solar Cells by Introducing One Medium Bandgap Acceptor with Complementary Absorption, Reducing Energy Disorder and Enhancing Glass Transition Temperature.		1
195	A?ADAA? extended small-molecule photovoltaic donor based on fluorene-diketopyrrolopyrrole with an end-group fluorination effect.		1
194	Achieving over 18 % Efficiency Organic Solar Cell Enabled by a ZnO-Based Hybrid Electron Transport Layer with an Operational Lifetime up to 5 Years.		5
193	Fine-tuned Morphology Based on Two Well-miscible Polymer Donors Enables Higher Open-circuit Voltage and Enhanced Stability for Highly Efficient Ternary All-Polymer Solar Cells. 2200411		1
192	Achieving over 18 % Efficiency Organic Solar Cell Enabled by a ZnO-Based Hybrid Electron Transport Layer with an Operational Lifetime up to 5 Years.		0
191	Recent Progress of Y6-Derived Asymmetric Fused Ring Electron Acceptors. 2205115		18
190	Non-fullerene acceptors with alkoxy side chains and different halogenated end groups for efficient organic solar cells. 2022 , 205, 110525		

189	15.28% efficiency of conventional layer-by-layer all-polymer solar cells superior to bulk heterojunction or inverted cells. 2022 , 450, 138146	4
188	Organic/inorganic hybrid cathode interlayer materials for efficient organic solar cells.	
187	Highly Efficient Organic Solar Cells Enabled by the Incorporation of a Sulfonated Graphene Doped PEDOT:PSS Interlayer. 2022 , 14, 34814-34821	3
186	Vertical Stratification Engineering of Insulating Poly(aryl ether)s Enables 18.6% Organic Solar Cells with Improved Stability. 2927-2936	3
185	Renewed Prospects for Organic Photovoltaics.	25
184	Achieving and Understanding of Highly Efficient Ternary Organic Photovoltaics: From Morphology and Energy Loss to Working Mechanism. 2200828	2
183	Over 19.2% Efficiency of Organic Solar Cells Enabled by Precisely Tuning the Charge Transfer State Via Donor Alloy Strategy. 2203606	9
182	Balancing the selective absorption and photon-to-electron conversion for semitransparent organic photovoltaics with 5.0% light utilization efficiency. 2205844	8
181	Passivating the Interfacial Chemical Reaction via Self-Assembly Layer for Efficient and Stable Inverted Nonfullerene Organic Solar Cells. 2200486	
180	Nonfullerene acceptors with cyano-modified terminal groups for organic solar cells: Effect of substitution position on photovoltaic properties. 2022 , 206, 110661	
179	Intrachain and Interchain Excited-State Dynamics of Temperature-Dependent Aggregation Copolymer in Solution.	1
178	Modification on the Quinoxaline Unit to Achieve High Open-Circuit Voltage and Morphology Optimization for Organic Solar Cells. 3432-3438	1
177	Simulation of Light-Trapping Characteristics of Self-Assembled Nano-Ridges in Ternary Organic Film. 2022 , 12, 1340	0
176	Recent advances of nonfullerene acceptors in organic solar cells. 2022 , 103, 107802	2
175	Semitransparent polymer solar cell/triboelectric nanogenerator hybrid systems: Synergistic solar and raindrop energy conversion for window-integrated applications. 2022 , 103, 107776	2
174	Improving the performance of PM6 donor polymer by random ternary copolymerization of BDD and DTBT segments. 2023 , 451, 139046	2
173	N-type small molecule electron transport materials with D-A-D conjugated core for non-fullerene organic solar cells. 2023 , 452, 139260	1
172	Organic photovoltaic cells offer ultrahigh VOC of 1.2V under AM 1.5G light and a high efficiency of 21.2% under indoor light. 2023 , 451, 139080	2

171	An acceptor with an asymmetric and extended conjugated backbone for high-efficiency organic solar cells with low nonradiative energy loss. 2022 , 10, 16714-16721	1
170	Computational chemistry-assisted design of a non-fullerene acceptor enables 17.4% efficiency in high-boiling-point solvent processed binary organic solar cells.	1
169	Terpolymerization strategy to achieve high-efficiency organic solar cells via construction of D1AD1D2-type polymer donors.	0
168	Asymmetric side-chain substitution enables a 3D network acceptor with hydrogen bond assisted crystal packing and enhanced electronic coupling for efficient organic solar cells.	8
167	High-Performance Pseudo-bilayer Ternary Organic Solar Cells with PC71BM as the Third Component.	2
166	n-Type polymer electron acceptors for organic solar cells.	0
165	Isomeric non-fullerene acceptors for high-efficiency organic solar cells.	0
164	Over 17% efficiency all-small-molecule organic solar cells based on an organic molecular donor employing a 2D side chain symmetry breaking strategy.	8
163	Branched alkyl-chain engineering of chlorinated asymmetrical acceptors for improved organic photovoltaic performance.	0
162	Side chain engineering of indacenodithieno[3,2-b]thiophene (IDTT)-based wide bandgap polymers for non-fullerene organic photovoltaics.	1
161	Rationally regulating the bridge of small molecule acceptors for efficient organic solar cells. 2022 , 10, 17808-17816	0
160	Charge Transfer Regulated by Domain Differences between Host and Guest Donors in Ternary Organic Solar Cells.	0
159	?????????????. 2022 ,	0
158	Sequential Processing Enables 17% All-Polymer Solar Cells via Non-Halogen Organic Solvent. 2022 , 27, 5739	0
157	Low-Temperature UVO-Sintered ZnO/SnO ₂ as Robust Cathode Buffer Layer for Ternary Organic Solar Cells. 2022 , 12, 3149	0
156	High-Efficiency Ternary Sequential Solution Deposition Structure Organic Solar Cells with Two Polymer Donors. 2022 , 139462	1
155	Direct Observation of Increased Free Carrier Generation Owing to Reduced Exciton Binding Energies in Polymerized Small-Molecule Acceptors. 2022 , 13, 8816-8824	1
154	Efficient Non-Fullerene Solar Cells Enabled by a Temperature-Dependent Terpolymer with Controlled Aggregation and Orientation. 2022 , 5, 11866-11873	0

153	Side Chain Length and Interaction Mediated Charge Transport Networks of Non-Fullerene Acceptors for Efficient Organic Solar Cells. 2022 , 4, 2009-2018	1
152	Asymmetric Non-Fullerene Small Molecule Acceptor with Unidirectional π -Bridge and Extended Terminal Group for High-Efficiency Organic Solar Cells. 2022 , 23, 10079	0
151	Molecular engineering of Y-series acceptors for nonfullerene organic solar cells.	2
150	Improving the Molecular Packing Order and Vertical Phase Separation of the P3HT:O-IDTBR Blend by Extending the Crystallization Period of O-IDTBR. 2022 , 14, 44685-44696	0
149	18.9% Efficient Organic Solar Cells Based on n-Doped Bulk-Heterojunction and Halogen-Substituted Self-Assembled Monolayers as Hole Extracting Interlayers. 2202503	3
148	Impact of isomers on the photovoltaic properties of polymerized small-molecule acceptors. 2022 , 100008	0
147	Simultaneous Optimization of Efficiency, Stretchability, and Stability in All-polymer Solar Cells via Aggregation Control.	6
146	Fluorine-Substituted π -Bridge through a Simple Method for Efficient Polymer Donor. 2200697	0
145	Halogenated thiophenes serve as solvent additives in mediating morphology and achieving efficient organic solar cells.	0
144	An alloy small molecule acceptor for green printing organic solar cells overcoming the scaling lag of efficiency.	1
143	Noncovalent molecular interactions, charge transport and photovoltaic performance of asymmetric M-series acceptors with dichlorinated end groups.	1
142	Self-Organized Anode Interlayer Enables PEDOT:PSS-Free Structure for Thick-Film Organic Solar Cells over 16% Efficiency. 2200682	1
141	Charge generation in organic solar cells: Journey toward 20% power conversion efficiency.	1
140	Improving the Performance of Polymer Solar Cells with Benzo[ghi]perylene-triimide-Based Small-Molecules as Interfacial Layers. 2022 , 14, 4466	0
139	Recent progress in solution-processed flexible organic photovoltaics. 2022 , 6,	0
138	Deciphering the Role of Side-Chain Engineering and Solvent Vapor Annealing for Binary All-Small-Molecule Organic Solar Cells. 2210549	2
137	Passivating the Defects and Modulating the Surface Energy of ZnO Cathode Interlayer for Efficient Non-fullerene Organic Solar Cells.	0
136	Self-Aggregated Light-Trapping Nanodots for Highly Efficient Organic Solar Cells. 2205128	0

135	Designing High-Performance Wide Bandgap Polymer Donors by the Synergistic Effect of Introducing Carboxylate and Fluoro Substituents. 3927-3935	0
134	Simple Approach for Synthesizing a Fluorinated Polymer Donor Enables Promoted Efficiency in Polymer Solar Cells.	0
133	Highly efficient and stable binary all-polymer solar cells enabled by sequential deposition processing tuned microstructures.	0
132	Dithieno[2,3-e:3',2'-Pq]isoindole-7,9(8H)-dione and Dithieno[3',2':5,6;2',3':7,8]naphtho[2,3-d]imidazol-9(10H)-one based wide bandgap copolymer for efficient polymer solar cells.	0
131	Weak Electron-Deficient Building Block Containing OB <- N Bonds for Polymer Donors.	0
130	Small-Molecule Acceptor with Unsymmetric Substituents and Fused Rings for High-Performance Organic Solar Cells with Enhanced Mobility and Reduced Energy Losses.	0
129	What's Next for Organic Solar Cells? The Frontiers and Challenges. 2200149	0
128	18.66% efficiency of polymer solar cells employing two non-fullerene acceptors with fluorine or chlorine substitution.	2
127	Benzotriazole-Based Polymer Acceptor for High-Efficiency All-Polymer Solar Cells with High Photocurrent and Low Voltage Loss. 2203044	1
126	Atomic Optimization on Pyran-Fused Nonfullerene Acceptor Enables Organic Solar Cells With an Efficiency Approaching 16% and Reduced Energy Loss. 2211140	0
125	Tethered Small-Molecule Acceptors Simultaneously Enhances the Efficiency and Stability of Polymer Solar Cells. 2206563	1
124	Extended Chlorinated Non-fullerene Acceptors Achieving High Performance Organic Solar Cells.	1
123	High-performance semitransparent organic solar cells based on sequentially processed heterojunction.	1
122	Realizing 18.03% Efficiency and Good Junction Characteristics in Organic Solar Cells via Hydrogen-bonding Interaction between Glucose and ZnO Electron Transport Layer.	0
121	Wide-bandgap polymer donors for non-fullerene organic solar cells. 2022 , 11, 17-30	0
120	Recent progress in flexible electrodes and textile shaped devices for organic solar cells.	0
119	Crystal structures in state-of-the-art non-fullerene electron acceptors.	0
118	Side chain isomerization enables high efficiency and thickness tolerant organic solar cells.	1

117	Calixarenes enabling well-adjusted organic-inorganic interface for inverted organic solar cells with 18.25% efficiency and multifold improved photostability under max power point tracking.	0
116	Microscopic investigation into higher efficiency and stability of inverted organic solar cells compared to conventional cells.	0
115	Nonfullerene Acceptors Based on Naphthalene Substituted Thieno[3,2-b]thiophene Core for Efficient Organic Solar Cells. 2022 , 92, 2354-2362	0
114	High-Performance Green Thick-Film Ternary Organic Solar Cells Enabled by Crystallinity Regulation. 2210534	1
113	High-Performance Ternary Organic Photovoltaics Incorporating Small-Molecule Acceptors with an Unfused-Ring Core. 2022 , 5, 15423-15433	0
112	Refining acceptor aggregation in nonfullerene organic solar cells to achieve high efficiency and superior thermal stability.	3
111	Enhanced Photodynamic of Carriers and Suppressed Charge Recombination Enable Approaching 18% Efficiency in Nonfullerene Organic Solar Cells. 2022 , 14, 54885-54894	0
110	Simple non-fused ring electron acceptors with well-controlled terminal group stacking. 2022 , 3, 101169	1
109	Co-La-Based Hole-Transporting Layers for Binary Organic Solar Cells with 18.82 % Efficiency.	0
108	Co-La-Based Hole-Transporting Layers for Binary Organic Solar Cells with 18.82 % Efficiency.	0
107	Volatile Additive Strategy Triggering 17.48% Efficient Post-Treatment-Free Organic Solar Cells. 2200994	0
106	Over 19% Efficiency Organic Solar Cells by Regulating Multidimensional Intermolecular Interactions. 2208986	7
105	Organic Photovoltaics Utilizing Small-Molecule Donors and Y-series Nonfullerene Acceptors. 2206566	0
104	Small-Molecule Acceptors with Asymmetric Thieno[3,2-c]isochromene Bridged Units for Boosting the Efficiency and Stability of Fullerene-Based Organic Solar Cells. 2022 , 5, 15890-15898	0
103	Improving the Thermal Stability of Organic Solar Cells via Crystallinity Control. 2022 , 5, 15656-15665	0
102	Non-Fused Ring Acceptors Achieving over 15.6% Efficiency Organic Solar Cell by Long Exciton Diffusion Length of Alloy-Like Phase and Vertical Phase Separation Induced by Hole Transport Layer. 2203402	1
101	An n-n Heterojunction Configuration for Efficient Electron Transport in Organic Photovoltaic Devices. 2209728	0
100	Ternary All-Polymer Solar Cells with Efficiency up to 18.14% Employing a Two-Step Sequential Deposition. 2209350	1

11	Achieving high performance organic solar cells with a closer π -distance in branched alkyl-chain acceptors.	0
10	Layer-by-Layer-Processed Ternary All-Polymer Organic Solar Cells with 17.74% Efficiency Enabled by Introducing a Designed Narrow-Bandgap Guest Polymer Acceptor.	0

- 9 19.31% binary organic solar cell and low non-radiative recombination enabled by non-monotonic intermediate state transition. **2023**, 14,
- 8 Outstanding Fill Factor in Inverted Organic Solar Cells with SnO₂ by Atomic Layer Deposition.
- 7 Simultaneous Improvements in Efficiency and Stability of Organic Solar Cells via a Symmetric-Asymmetric Dual-Acceptor Strategy.
- 6 Oligomeric Acceptor Enables High-Performance and Robust All-Polymer Solar Cells with 17.4% Efficiency.
- 5 Improving the Efficiency of Organic Solar Cells via the Molecular Engineering of Simple Fused Non-Fullerene Acceptors. **2023**, 16, 3443
- 4 Comprehensive Understanding of Fluorination-Performance Relationship: The Best-Performed A-D-A-Type Acceptors. **2023**,
- 3 Easily Available High-Performance Organic Solar Cells by Regulating Phenylalkyl Side Groups of Non-Fused Ring Electron Acceptors.
- 2 Effect of Fluorinated End-Groups on the Exciton Dynamics and Charge Transfer of Non-fused Ring Acceptors.
- 1 Unraveling the Role of Non-Fullerene Acceptor with High Dielectric Constant in Organic Solar Cells.
