Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
2	Genome graphs detect human polymorphisms in active epigenomic states during influenza infection.		1
1	Transposable elements are associated with the variable response to influenza infection.		0
