

CITATION REPORT

List of articles citing

Abundance of natural resources and environmental sustainability: the roles of manufacturing value-added, urbanization, and permanent cropland

DOI: 10.1007/s11356-022-21545-8

Environmental Science and Pollution Research, , , .

Source: <https://exaly.com/paper-pdf/148474019/citation-report.pdf>

Version: 2024-04-25

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
36	Alternative energy and natural resources in determining environmental sustainability: a look at the role of government final consumption expenditures in France.		4
35	Roles of trilemma in the world energy sector and transition towards sustainable energy: A study of economic growth and the environment. 2022 , 170, 113238		3
34	A non-linear analysis of the impacts of natural resources and education on environmental quality: Green energy and its role in the future. 2022 , 79, 102940		6
33	Understanding the Role of Technology in Asian Economies: The Environmental Impact of Remittances and Economic Complexity. 0193841X2211204		1
32	Energy transition determinants in the European Union: threshold effects.		0
31	Income inequality, carbon emissions, and green development efficiency.		1
30	How Do Institutional Quality, Natural Resources, Renewable Energy, and Financial Development Reduce Ecological Footprint without Hindering Economic Growth Trajectory? Evidence from China. 2022 , 14, 13910		2
29	Techno-Economic Model for Scaling Up of Hydrogen Refueling Stations. 2022 , 15, 7518		1
28	Exploring the Role of Communication Technologies, Governance, and Renewable Energy for Ecological Footprints in G11 Countries: Implications for Sustainable Development. 2022 , 14, 12555		0
27	Green effects of research and development on industrial waste reduction during the production phase: Evidence from China and policy implications. 10,		0
26	The impact of local government competition and green technology innovation on economic low-carbon transition: new insights from China.		4
25	Are Mercosur economies going green or going away? An empirical investigation of the association between technological innovations, energy use, natural resources and GHG emissions. 2023 , 113, 53-70		2
24	The impact of economic complexity, technology advancements, and nuclear energy consumption on the ecological footprint of the USA: Towards circular economy initiatives. 2022 ,		2
23	Energy economic expansion with production and consumption in BRICS countries. 2022 , 44, 101005		0
22	The Impact of Sub-Sector of Economic Activity and Financial Development on Environmental Degradation: New Evidence Using Dynamic Heterogeneous Panel. 2022 , 10, 4481		0
21	The effect of transport infrastructure (road, rail, and air) investments on economic growth and environmental pollution and testing the validity of EKC in China, India, Japan, and Russia.		0
20	Assessment of sustainable green logistics enablers: a robust framework using fuzzy DEMATEL and ISM approach.		0

- 19 Fabrication of Fe-BTC on aramid fabrics for repeated degradation of isoproturon. ○
- 18 Assessing enablers of green entrepreneurship in circular economy: An integrated approach. **2023**, 388, 135999 ○
- 17 Sustainable energy policy, socio-economic development, and ecological footprint: The economic significance of natural resources, population growth, and industrial development. **2023**, 81, 101490 ○
- 16 Navigating the global mineral market: A study of resource wealth and the energy transition. **2023**, 82, 103500 ○
- 15 Impact of industrial development and machinery and transport equipment on natural resources in South Africa. **2023**, 82, 103527 ○
- 14 Can globalization and the green economy hedge natural resources? Functions of population growth and financial development in BRICS countries. **2023**, 82, 103414 ○
- 13 The environmental impact of stock market capitalization and energy transition: Natural resource dynamics and international trade. **2023**, 82, 101517 ○
- 12 The impact of a new techno-nationalism era on eco-economic decoupling. **2023**, 82, 103452 ○
- 11 Colligating ecological footprint and economic globalization after COP21: Insights from agricultural value-added and natural resources rents in the E7 economies. 1-15 1
- 10 Green Investment, Technological Progress, and Green Industrial Development: Implications for Sustainable Development. **2023**, 15, 3808 1
- 9 Re-investigating the impact of non-renewable and renewable energy on environmental quality: A roadmap towards sustainable development. **2023**, 81, 103411 ○
- 8 The transition to clean energy and the external balance of goods and services as determinants of energy and environmental sustainability. **2023**, ○
- 7 Unveiling the liaison between human capital, trade openness, and environmental sustainability for BRICS economies: Robust panel-data estimation. ○
- 6 The need for energy efficiency and economic prosperity in a sustainable environment. **2023**, ○
- 5 Sustainable energy and environmental sustainability in selected Asia Pacific Economic Cooperation countries. **2023**, ○
- 4 Transitioning to a zero-emission energy system towards environmental sustainability. **2023**, ○
- 3 How renewable energy and service growth influence environmental quality: Evidence from a sustainable development perspective. ○
- 2 Unraveling the influence and mechanism of digital inclusive finance on household financial substitution: evidence from China. ○

- 1 Impact of energy depletion, human development, and income distribution on natural resource sustainability. **2023**, 83, 103531
