Version: 2024-04-20

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
3	Ionizing radiation exposure during adulthood and risk of developing central nervous system tumors: systematic review and meta-analysis. 2022 , 12,		2
2	Ionizing radiation, cerebrovascular disease, and consequent dementia: A review and proposed framework relevant to space radiation exposure. 13,		0
1	Radiation and CNS effects: Summary of evidence from a recent symposium of the Radiation Research Society. 1-19		0
