

CITATION REPORT

List of articles citing

Cellular recovery after prolonged warm ischaemia of the whole body

DOI: 10.1038/s41586-022-05016-1
, 2022, 608, 405-412.

Source: <https://exaly.com/paper-pdf/150199126/citation-report.pdf>

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
19	Partially revived pig organs could force a rethink of critical-care processes. 2022 , 608, 32-35		1
18	Pig organs partially revived in dead animals [researchers are stunned]. 2022 , 608, 247-248		0
17	Improved organ recovery after oxygen deprivation. 2022 , 608, 273-274		
16	Post-mortem cellular death may be salvageable with whole body perfusion.		
15	Cellular recovery after prolonged warm ischaemia. 2022 , 18, 605-605		0
14	Perfuse and Reuse: A Low-Cost 3D-Printed Perfusion Bioreactor for Tissue Engineering.		0
13	Single-cell transcriptomics of the immune system in ME/CFS at baseline and following symptom provocation.		0
12	OrganEx: What Will It Mean?. 2022 , 22, 4-7		0
11	Mitochondria Drive Immune Responses in Critical Disease. 2022 , 11, 4113		0
10	Defining the boundary between life and death: New insights from neuropathology. 2023 , 82, 3-5		0
9	Prolonging Cellular Life after Hypoxic Death. 2022 , 387, 2089-2091		0
8	Invited commentary: When perfusion is not circulation.		0
7	The Future Is Now: OrganEx Technology and Its Implications for Transplant Medicine. 2023 , 107, 799-800		0
6	Identification of a pharmaceutical biostasis inducer that slows metabolism in multiple vertebrates that do not hibernate.		0
5	An extensive evaluation of hepatic markers of damage and regeneration in controlled and uncontrolled donation after circulatory death. Publish Ahead of Print,		0
4	The effects of ECMO on neurological function recovery of critical patients: A double-edged sword. 10,		0
3	Nanobiotechnological basis of an oxygen carrier with enhanced carbonic anhydrase for CO ₂ transport and enhanced catalase and superoxide dismutase for antioxidant function. 11,		0
