

# Blood Lipids and Their Distribution in Lipoproteins in Rats Fed Different Levels of Sucrose

Journal of Nutrition

111, 1045-1057

DOI: [10.1093/jn/111.6.1045](https://doi.org/10.1093/jn/111.6.1045)

Citation Report

#	ARTICLE	IF	CITATIONS
1	Serum insulin and glucose in hyperinsulinemic subjects fed three different levels of sucrose. American Journal of Clinical Nutrition, 1981, 34, 2348-2358.	4.7	93
2	Comparison of seven-day diet record with measured food intake of twenty-four subjects. Nutrition Research, 1982, 2, 263-273.	2.9	49
3	Effect of dietary sucrose and genotype on metabolic parameters of a new strain of genetically obese rat: LA/N-corpulent. Nutrition Research, 1983, 3, 217-228.	2.9	43
4	Effect of dietary protein level and kind of carbohydrate on growth and selected pathological and biochemical parameters in female BHE rats. Nutrition Research, 1983, 3, 719-732.	2.9	4
5	Serum lipids and cholesterol distribution in lipoproteins of exercise-trained female rats fed sucrose. Life Sciences, 1983, 33, 75-82.	4.3	9
6	Serum Uric Acid, Inorganic Phosphorus, and Glutamic-Oxalacetic Transaminase and Blood Pressure in Carbohydrate-Sensitive Adults Consuming Three Different Levels of Sucrose. Annals of Nutrition and Metabolism, 1983, 27, 425-435.	1.9	60
7	Blood lipid distribution of hyperinsulinemic men consuming three levels of fructose. American Journal of Clinical Nutrition, 1983, 37, 740-748.	4.7	149
8	Role of dietary fructose in the enhancement of mortality and biochemical changes associated with copper deficiency in rats. American Journal of Clinical Nutrition, 1983, 38, 214-222.	4.7	116
9	Blood Insulin, Glucose, Fructose and Gastric Inhibitory Polypeptide Levels in Carbohydrate-Sensitive and Normal Men Given a Sucrose or Invert Sugar Tolerance Test. Journal of Nutrition, 1983, 113, 1732-1736.	2.9	8
10	Seasonal variation in plasma glucose and hormone levels in adult men and women. American Journal of Clinical Nutrition, 1984, 40, 1352-1356.	4.7	50
11	Blood zinc, copper, insulin and glucose levels in carbohydrate-sensitive and normal men given a sucrose or invert sugar tolerance test. Nutrition Research, 1984, 4, 967-976.	2.9	5
12	The Effect of Sucrose Content in High and Low Carbohydrate Diets on Plasma Glucose, Insulin, and Lipid Responses in Hypertriglyceridemic Humans*. Journal of Clinical Endocrinology and Metabolism, 1984, 59, 636-642.	3.6	57
13	Effect of dietary sucrose on the SHR/N-corpulent rat: a new model for insulin-independent diabetes. American Journal of Clinical Nutrition, 1984, 39, 612-618.	4.7	97
14	Indices of copper status in humans consuming a typical American diet containing either fructose or starch. American Journal of Clinical Nutrition, 1985, 42, 242-251.	4.7	194
15	Metabolic effects of added dietary sucrose in individuals with noninsulin-dependent diabetes mellitus (NIDDM). Metabolism: Clinical and Experimental, 1985, 34, 962-966.	3.4	63
16	Modification of the United States' diet to effect changes in blood lipids and lipoprotein distribution. Atherosclerosis, 1985, 57, 179-188.	0.8	25
17	Effect of High-Carbohydrate Diet on Lipid Metabolism in Young Type I Diabetics: Transient Changes in High-Density Lipoprotein2and Lipoprotein Lipase. Pediatrics International, 1986, 28, 616-623.	0.5	1
18	Effects of sugars on Indices of glucose tolerance in humans. American Journal of Clinical Nutrition, 1986, 43, 151-159.	4.7	16
