

CITATION REPORT

List of articles citing

Stochastic relaxation, gibbs distributions, and the bayesian restoration of images

DOI: 10.1109/tpami.1984.4767596

IEEE Transactions on Pattern Analysis and Machine Intelligence, 1984, 6, 721-41.

Version: 2024-04-20

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
2233	.		1
2232	.		1
2231	Low bit rate image compression with orthogonal projection pursuit neural networks.		1
2230	Blind deconvolution based on a hybrid GA/SA approach.		
2229	Segmentation of multispectral remote-sensing images based on Markov random fields.		
2228	Extended multi-level logistic Model and SAR image segmentation.		
2227	A parameter estimation method for multilevel Gibbs random fields.		
2226	Comparison of methods for iterative joint data detection and channel estimation.		1
2225	Preliminary examination of the use of case specific medical information as "prior" in Bayesian reconstruction. 1991 , 81-93		3
2224	.		1
2223	.		2
2222	.		2
2221	A convex approximation of regularization models for motion estimation with Markov random fields.		
2220	Statistical model-based segmentation of deformable motion.		11
2219	.		3
2218	New simulated annealing algorithms.		2
2217	Bayesian motion estimation without spatial and temporal gradients.		

2216 Accurate vascular reconstruction with MAP-EM method from few projections.

2215 Forecasting of solar particle event doses using Bayesian inference.

0

2214 Design of Local Filters for the Deconvolution of Electron Energy Loss Spectrum.

2213 Evolutionary optimization in Markov random field modeling.

2212 Efficient inference for mixed Bayesian networks.

2

2211 .

13

2210 .

1

2209 .

1

2208 A fast suboptimal approach to error concealment in encoded video streams.

8

2207 Towards a unified view of estimation: variational vs. statistical.

0

2206 Neighbour-based MLPs.

1

2205 A point-based approach to the interposition problem in augmented reality.

3

2204 A statistical model for complex images: bivariate gaussian MRF - BGMRF.

2203 Fast maximum entropy approximation in SPECT using the RBI-MAP algorithm.

2202 Discussion of the Paper by Dr Diggle and Dr Gratton. **1984**, 46, 212-227

2201 Bayes smoothing algorithms for segmentation of binary images modeled by markov random fields. *IEEE Transactions on Pattern Analysis and Machine Intelligence*, **1984**, 6, 707-20

13.3 124

2200 Cellular processing and statistical mechanics. **1985**, 10, 207-212
