

# Interaction between frequency of rescheduling and the requirements planning systems

International Journal of Production Research  
25, 221-232

DOI: [10.1080/00207548708919835](https://doi.org/10.1080/00207548708919835)

Citation Report

| #  | ARTICLE   | IF  | CITATIONS |
|----|---|-----|-----------|
| 1  | Freezing the Master Production Schedule Under Demand Uncertainty. Decision Sciences, 1990, 21, 97-120.  | 4.5 | 86        |
| 2  | Improved strategy for service level-based safety stock determination. Production Planning and Control, 1991, 2, 116-121.                              | 8.8 | 7         |
| 3  | A study of replanning frequencies in a material requirements planning system. Computers and Operations Research, 1991, 18, 569-578.                   | 4.0 | 10        |
| 4  | Adaptive/predictive scheduling: review and a general framework. Production Planning and Control, 1991, 2, 298-312.                                    | 8.8 | 24        |
| 5  | A Model for Continuous-Review Pull Policies in Serial Inventory Systems. Operations Research, 1992, 40, 142-156.                                      | 1.9 | 31        |
| 6  | Master Production Scheduling Under Rolling Planning Horizons with Fixed Order Intervals. Decision Sciences, 1992, 23, 312-331.                        | 4.5 | 29        |
| 7  | A Model for Master Production Scheduling in Uncertain Environments. Decision Sciences, 1992, 23, 839-861.   | 4.5 | 58        |
| 8  | Models for multi-plant coordination. European Journal of Operational Research, 1993, 67, 141-160.   | 5.7 | 166       |
| 9  | Measuring and improving planning stability of reorder-point lot-sizing policies. International Journal of Production Economics, 1993, 30-31, 167-178. | 8.9 | 17        |
