

# CITATION REPORT

List of articles citing

**A highly polymorphic locus very tightly linked to the Huntington's disease gene**

**DOI: 10.1038/332734a0**  
**Nature, 1988, 332, 734-6.**

**Source:** <https://exaly.com/paper-pdf/19608914/citation-report.pdf>

**Version:** 2024-04-29

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
156	Lod score or log-likelihood?. <i>Nature</i> , <b>1988</b> , 333, 308	50.4	3
155	Construction of a NotI linking library and isolation of new markers close to the Huntington's disease gene. <b>1988</b> , 16, 9185-98		70
154	The molecular genetic revolution. Its impact on clinical neurology. <b>1988</b> , 45, 1366-76		9
153	The map of chromosome 20. <b>1988</b> , 25, 794-804		9
152	Mapping of D4S98/S114/S113 confines the Huntington's defect to a reduced physical region at the telomere of chromosome 4. <b>1988</b> , 16, 11769-80		45
151	Considerations in using linkage analysis as a presymptomatic test for Huntington's disease. <b>1988</b> , 25, 577-88		22
150	Chromosome jumping from D4S10 (G8) toward the Huntington disease gene. <b>1988</b> , 85, 6437-41		32
149	Report of the committee on human gene mapping by recombinant DNA techniques (Part 6 of 6). <b>1988</b> , 49, 206-218		
148	Report of the committee on the genetic constitution of chromosome 4. <b>1988</b> , 49, 52-4		2
147	Report of the DNA committee and catalogs of cloned and mapped genes and DNA polymorphisms pp. 922&ndash;947. <b>1989</b> , 51, 922-947		
146	Location cloning strategy for characterizing genetic defects in Huntington's disease and Alzheimer's disease. <b>1989</b> , 3, 2036-41		19
145	Report of the committee on the genetic constitution of chromosome 4. <b>1989</b> , 51, 121-36		20
144	The impact of molecular genetics on our understanding of the psychoses. <b>1989</b> , 154, 591-5		12
143	Presymptomatic Diagnosis of Delayed-Onset Disease With Linked DNA Markers. <b>1989</b> , 261, 3108		79
142	Different options for prenatal testing for Huntington's disease using DNA probes. <b>1989</b> , 26, 353-7		19
141	Isolation and characterization of a human telomere. <b>1989</b> , 17, 6109-27		82
140	Prenatal exclusion testing for Huntington's disease: a problem of too much information. <b>1989</b> , 26, 83-5		17

139	Non-random association between alleles detected at D4S95 and D4S98 and the Huntington's disease gene. <b>1989</b> , 26, 676-81	67
138	The application of recombinant DNA technology for genetic probing in epidemiology. <b>1989</b> , 10, 27-48	13
137	Linkage disequilibrium in Huntington's disease: an improved localisation for the gene. <b>1989</b> , 26, 673-5	69
136	A fine-structure deletion map of human chromosome 11p: analysis of J1 series hybrids. <b>1989</b> , 15, 477-501	116
