

CITATION REPORT

List of articles citing

Glomeruli and blood pressure. Less of one, more the other?

DOI: 10.1093/ajh/1.4.335

American Journal of Hypertension, 1988, 1, 335-47.

Source: <https://exaly.com/paper-pdf/19718869/citation-report.pdf>

Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
1117	Glomerulosclerosis: insights into pathogenesis and treatment. 1989 , 4, 843-53		23
1116	Nephron heterogeneity: Clue to the pathogenesis of essential hypertension and effectiveness of angiotensin-converting enzyme inhibitor treatment. 1989 , 87, 25-145		72
1115	Essential hypertension in blacks: epidemiology, characteristics, and possible roles of racial differences in sodium, potassium, and calcium regulation. 1990 , 4 Suppl 2, 335-42		15
1114	Energy restriction or salt restriction in the treatment of overweight hypertension. Which one? A point of view. 1990 , 12, 795-802		2
1113	Paleonephrology and reflux nephropathy. From the 'big bang' to end-stage renal disease. 1991 , 145, 860-4		2
1112	Relationship between renin, angiotensinogen and histone H2b messenger ribonucleic acid in the maturing rat kidney. 1992 , 62, 322-7		3
1111	The modern evaluation and treatment of hypertension: the causal role of the kidneys. 1992 , 147, 1469-77		3
1110	Risk for renal injury in diabetic hypertensive patients. The physiologic basis for blood pressure control. 1992 , 91, 77-80, 83-4		3
1109	Hypertensive nephropathy: is a more physiologic approach to blood pressure control an important concern for the preservation of renal function?. 1992 , 93, 275-375		10
1108	The number of glomeruli in type 1 (insulin-dependent) and type 2 (non-insulin-dependent) diabetic patients. 1992 , 35, 844-50		44
1107	Glomerular number and size in relation to age, kidney weight, and body surface in normal man. 1992 , 232, 194-201		650
1106	The kidney disease of diabetes mellitus (KDDM): a cell and molecular biology approach. 1993 , 9, 37-56		31
1105	Mechanisms of renal hypertension and renal contribution to primary hypertension. 1993 , 58, 588-93		4
1104	Distribution and correlates of creatinine clearance in children and adolescents with blood pressure elevation. 1993 , 122, S68-73		
1103	The kidney and arterial hypertension. 1993 , 46 Suppl 2, 108-12		2
1102	The pathogenesis of hypertension in obese subjects. 1993 , 46 Suppl 2, 197-208; discussion 208-9		17
1101	Parity, birthweight, and cortisol. 1993 , 341, 828		7

1100	Placental insufficiency and its effect on the fetus and adult disease. 1993 , 341, 827-828	8
1099	Nephron underdosing: a programmed cause of chronic renal allograft failure. 1993 , 21, 66-72	226
1098	Genetics of renal damage in primary hypertension. 1993 , 21, 2-9	15
1097	Mesangial proliferative glomerulonephritis in southwestern American Indians. 1993 , 21, 486-96	30
1096	Hypertension and the Kidney. 1993 , 96-104	
1095	Is microalbuminuria a marker of early intrarenal vascular dysfunction in essential hypertension?. 1994 , 23, 1018-21	60
1094	Are renal hemodynamics a key factor in the development and maintenance of arterial hypertension in humans?. 1994 , 23, 3-9	93
1093	Glomerular losartan (DuP 753)-sensitive angiotensin II receptor density is increased in young spontaneously hypertensive rats. 1994 , 35, 671-6	14
1092	Intrauterine growth retardation leads to a permanent nephron deficit in the rat. 1994 , 8, 175-80	300
1091	Albuminuria in normals and essential hypertension. 1994 , 8, 150-6	61
1090	Estimating glomerular number in situ using magnetic resonance imaging and biopsy. 1994 , 45, 1668-72	42
1089	The joint effects of race and age on the risk of end-stage renal disease attributed to hypertension. 1994 , 24, 554-60	31
1088	Congenital Oligonephropathy and the Etiology of Adult Hypertension and Progressive Renal Injury. 1994 , 23, 171-175	455
1087	The aging rat kidney displays low glomerular and tubular proteinase activities. 1994 , 24, 499-504	13
1086	How much does the kidney participate in the origin of primary hypertension?. 1994 , 3, 216-8	5
1085	Alterations in sodium metabolism as an etiological model for hypertension. 1995 , 9, 377-99	13
1084	High glucose augments angiotensin II action by inhibiting NO synthesis in in vitro microperfused rabbit afferent arterioles. 1995 , 48, 683-9	25
1083	Endocrine hypertension. 1995 , 1, 91-8	

1082	Low birth weight. A risk factor for development of diabetic nephropathy?. 1995 , 44, 1405-7		74
1081	Analyzing renal glomeruli with the new stereology. 1995 , 161, 111-72		123
1080	Salt intake and hypertensive renal injury in African-Americans. A therapeutic perspective. <i>American Journal of Hypertension</i> , 1995 , 8, 635-44	2.3	17
1079	Fewer nephrons at birth: a missing link in the etiology of essential hypertension?. 1995 , 26, 91-8		190
1078	Status of patients who underwent uninephrectomy in adulthood more than 20 years ago. 1995 , 26, 889-97		29
1077	The relationship between renal cortical volume and predisposition to hypertension. <i>American Journal of Hypertension</i> , 1996 , 9, 779-86	2.3	7
1076	Malignant vascular disease of the kidney: nature of the lesions, mediators of disease progression, and the case for bilateral nephrectomy. 1996 , 27, 459-75		53
1075	Diabetic nephropathy in type II diabetes. 1996 , 27, 167-94		225
1074	Immunological and hemodynamic mechanisms in chronic renal allograft rejection. 1996 , 4, 39-42		6
1073	Birth weight and cardiovascular risk factors in an epidemiological study. 1996 , 39, 1598-602		47
1072	Low birth weight--is it associated with few and small glomeruli in normal subjects and NIDDM patients?. 1996 , 39, 1634-7		21
1071	Renal function reserve and sodium sensitivity in essential hypertension. 1996 , 128, 89-97		29
1070	Glomerular stereology: Why, what and how to measure glomerular structure. 1996 , 2, 305-313		8
1069	Nephron endowment at birth and the pathogenesis of hypertension and chronic renal failure. 1996 , 2, s139-s143		1
1068	Structural changes in the renal vasculature in the spontaneously hypertensive rat: no effect of angiotensin II blockade. 1996 , 23 Suppl 3, S132-5		10
1067	Antigen-Independent Determinants of Cadaveric Kidney Transplant Failure. 1996 , 276, 1732		102
1066	Wild-type p53 transgenic mice exhibit altered differentiation of the ureteric bud and possess small kidneys. 1996 , 10, 836-50		106
1065	Can the kidney prevent cardiovascular diseases?. 1996 , 18, 501-11		1

1064	Hypertension-Related Morbidity and Mortality in the Southeastern United States. 1997 , 313, 195-209	1
1063	The pharmacologic approach to the treatment of obesity. 1997 , 37, 453-73	47
1062	An abnormal sodium metabolism in Japanese patients with essential hypertension, judged by serum sodium distribution, renal function and the renin-aldosterone system. 1997 , 15, 65-72	50
1061	Implications of the linear pressure-natriuresis relationship and importance of sodium sensitivity in hypertension. 1997 , 15, 1055-61	59
