

CITATION REPORT

List of articles citing

Suppression of tumorigenicity of human prostate carcinoma cells by replacing a mutated RB gene

DOI: 10.1126/science.2300823
Science, 1990, 247, 712-5.

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
569	A single amino acid substitution results in a retinoblastoma protein defective in phosphorylation and oncoprotein binding. 1990 , 87, 6922-6		161
568	Frequent inactivation of the retinoblastoma anti-oncogene is restricted to a subset of human tumor cells. 1990 , 87, 2775-9		463
567	Negative regulation of human c-fos expression by the retinoblastoma gene product. 1990 , 346, 668-71		290
566	Particulate systems and polymers for in vitro and in vivo delivery of polynucleotides. 1990 , 5, 163-187		119
565	Autocrine regulation of cell growth and transformation by basic fibroblast growth factor. 1990 , 9, 191-202		49
564	Two distinct and frequently mutated regions of retinoblastoma protein are required for binding to SV40 T antigen.. <i>EMBO Journal</i> , 1990 , 9, 1815-1822	13	141
563	Recessive oncogenes in lung cancer. 1990 , 142, S44-7		8
562	Allelic loss of chromosomes 16q and 10q in human prostate cancer. 1990 , 87, 8751-5		404
561	Altered expression of the retinoblastoma gene product in human sarcomas. 1990 , 323, 1457-62		192
560	Promoter deletion and loss of retinoblastoma gene expression in human prostate carcinoma. 1990 , 87, 7762-6		279
559	Genetic mechanisms of tumor suppression by the human p53 gene. <i>Science</i> , 1990 , 250, 1576-80	33.3	478
