Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

18	Settling Time Optimization of a Critically Damped System with Input Shaping for Vibration Suppression Control. 2022 , 12, 9388-9394	○
17	Frequency-based NMPC for Flexible Systems with Parametric Resonance. 2022 , 55, 381-386	○
16	Shaped Input for Reducing Crosstalk of Two-axis MEMS Scanners. 2022 , 114002	○

- 15 Global Sensitivity Analysis based Design of Input Shapers. **2022**, 55, 67-72 ○
- 14 Robust Input Shaping Design for Uncertain Second-order Dynamics Systems. **2022**, ○
- 13 Kinematic Modeling and Real-Time Implementation of an Indigenous Control System for a Novel Three-Link Flexible Robot. **2022**, 295-328 ○
- 12 Time-Suboptimal Trajectories for Vibration-Free Positioning of Undamped Flexible Systems. **2022**, ○
- 11 Specified-duration shapers for suppressing residual vibrations. **2022**, 17, e0276669 ○
- 10 Anti-unwinding nonsingular terminal sliding mode control with attitude maneuver planning for flexible spacecraft. ○
- 9 Minimum time control of a gantry crane system with rate constraints. **2023**, 190, 110120 ○
- 8 Input-shaping-based improvement in the machining precision of laser micromachining systems. **2023**, 125, 4415-4424 ○
- 7 An SD Shaper to Suppress Residual Vibration at an Arbitrarily Specified Duration. **2023**, 18, 127-134 ○
- 6 Research on the Residual Vibration Suppression of Delta Robots Based on the Dual-Modal Input Shaping Method. **2023**, 12, 84 ○
- 5 Fast luffing control of flexible boom of mobile elevated work platform with uncertain control input gain. **2023**, 15, 168781322311558 ○
- 4 Two-loop Control of Harvesting Mechanical Arm base on Adaptive Input Shaping Algorithm. **2022**, ○
- 3 The novel design of the command smoother for sway suppression of industrial overhead crane considering acceleration and deceleration limits. ○
- 2 An active swing suppression control scheme of overhead cranes based on input shaping model predictive control. **2023**, 11, ○
- 1 Robotic Control for Vibration Reduction of Swinging Products. **2023**, ○
