Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
209	Rings in numerical models of ocean general circulation: A statistical study. 1992 , 97, 9479		18
208	Rotational modes for warm and cold eddies. 1992 , 97, 12659		1
207	Rossby number dependence on meander dynamics of a potential vorticity front. 1993 , 49, 521-533		1
206	Eddy and wave dynamics in the South Atlantic as diagnosed from Geosat altimeter data. 1993 , 98, 12297		12
205	Modelling pelagic biogeography. 1994 , 34, 161-205		14
204	Rings: Semicohherent oceanic features. 1994 , 4, 355-367		6
203	The Southern Ocean western boundary currents: Comparison of fine resolution Antarctic model results with Geosat altimeter data. 1995 , 100, 4959		13
202	Rings of the North Brazil Current: Their structure and behavior inferred from observations and a numerical simulation. 1995 , 100, 10633		84
201	The absolute velocity field of Agulhas eddies and the Benguela Current. 1995 , 100, 22591		27
200	Detecting "dipole ring" separatrices with zebra palettes. 1995 , 33, 1306-1312		5
199	CFC-113 shows Brazil eddy crossing the South Atlantic to the Agulhas retroflection region. 1996 , 101, 885-895		15
198	On the eddy field in the Agulhas Retroflection, with some global considerations. 1996 , 101, 16259-16271		17
197	Dipole rings and vortex interactions of the Brazil Current. 1996 , 34, 1323-1330		5
196	Principal component analysis of biological and physical variability in a Gulf Stream meander crest. 1996 , 43, 1531-1565		13
195	Influence of asymmetric wind stress curl on the general ocean circulation using an eddy-resolving quasi-geostrophic model. 1996 , 52, 189-206		5
194	Planetary vortices and Jupiter's vertical structure. 1997 , 102, 9303-9308		14
193	On the structure, paths, and fluxes associated with Agulhas rings. 1999 , 104, 21007-21020		39

192	Three Agulhas rings observed during the Benguela Current Experiment. 1999 , 104, 20971-20985		55
191	Transport in finite size systems: An exit time approach. 1999 , 9, 871-879		11
190	References. 2000 , 865-909		
189	Why much of the Atlantic circulation enters the Caribbean Sea and very little of the Pacific circulation enters the Sea of Japan. 2000 , 45, 39-67		22
188	Upwelling into the thermocline of the Pacific Ocean. 2000 , 47, 2317-2340		1
187	The interaction of two baroclinic geostrophic vortices on the β -plane. 2000 , 456, 1029-1049		5
186	Detection of vortices and saddle points in SST data. 2001 , 28, 331-334		6
185	On the skewness of vorticity in the upper ocean. 2001 , 28, 2045-2048		49
184	The Net Advective Effect of a Vertically Sheared Current on a Coherent Vortex. <i>Journal of Physical Oceanography</i> , 2001 , 31, 2210-2225	2.4	25
183	Biophysical dynamics of western transition zones: a preliminary synthesis. 2001 , 10, 133-150		38
182	The interaction of two vortices on a beta-plane. 2001 , 13, 884-893		2
181	The Squeezing of Eddies through Gaps. <i>Journal of Physical Oceanography</i> , 2002 , 32, 314-335	2.4	53
180	Decay of Stable Warm-Core Eddies in a Layered Frontal Model. <i>Journal of Physical Oceanography</i> , 2002 , 32, 188-201	2.4	14
179	An Assessment of the Surface Turbulent Heat Fluxes from the NCEP-NCAR Reanalysis over the Western Boundary Currents. 2002 , 15, 2020-2037		66
178	Influence of Topography on the Propagation of Isolated Eddies. <i>Journal of Physical Oceanography</i> , 2002 , 32, 2848-2869	2.4	30
177	Statistics of Brazil Current rings observed from AVHRR: 1993 to 1998. 2002 , 29, 58-1-58-4		23
176	Biological response to frontal dynamics and mesoscale variability in oligotrophic environments: Biological production and community structure. 2002 , 107, 25-1		70
175	Resistance of a Coherent Vortex to a Vertical Shear. <i>Journal of Physical Oceanography</i> , 2002 , 32, 3089-3100		19

174	Instability of quasi-geostrophic vortices in a two-layer ocean with a thin upper layer. 2003 , 475, 303-331		26
173	Warm-Core Eddies Studied by Laboratory Experiments and Numerical Modeling. <i>Journal of Physical Oceanography</i> , 2003 , 33, 431-435	2.4	24
172	The Theory of the Beta-Plane Baroclinic Topographic Modons. 2003 , 97, 175-211		20
171	The Nonlinear Evolution of Barotropically Unstable Jets. <i>Journal of Physical Oceanography</i> , 2003 , 33, 2173-2192	2.4	42
170	Seasonal and interannual studies of vortices in sea surface temperature data. 2004 , 25, 1371-1376		5
169	Stability of vortices in a two-layer ocean with uniform potential vorticity in the lower layer. 2004 , 502, 207-232		22
168	Does the Ulleung eddy owe its existence to β and nonlinearities?. 2004 , 51, 2073-2090		18
167	Chlorophyll variability and eddies in the Brazil-Malvinas Confluence region. 2004 , 51, 159-172		57
166	Spatial structure of anticyclonic eddies in the Algerian basin (Mediterranean Sea) analyzed using the Okubo-Weiss parameter. 2004 , 51, 3009-3028		88
165	A laboratory study of columnar baroclinic vortices in a continuously stratified fluid. 2004 , 38, 69-92		6
164	Stability of a Two-Layer Quasigeostrophic Vortex over Axisymmetric Localized Topography. <i>Journal of Physical Oceanography</i> , 2005 , 35, 123-130	2.4	18
163	The oceans. 2005 , 175-222		21
162	Simulations of high-latitude spots on Jupiter: Constraints on vortex strength and the deep wind. 2005 , 53, 1221-1233		7
161	New tools for the study of oceanic eddies: Satellite derived inherent optical properties. 2005 , 95, 444-452		12
