Version: 2024-04-26

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
317	Therapeutic dissection after successful coronary balloon angioplasty: no influence on restenosis or on clinical outcome in 693 patients. The MERCATOR Study Group (Multicenter European Research Trial with Cilazapril after Angioplasty to prevent Transluminal Coronary Obstruction and Restenosis). <i>1992, 20, 517-20</i>		103
316	Clinical success, complications and restenosis rates with excimer laser coronary angioplasty. The Percutaneous Excimer Laser Coronary Angioplasty Registry. <i>American Journal of Cardiology, 1992, 70, 1533-9</i>	3	121
315	Classification of morphologic effects of percutaneous transluminal coronary angioplasty assessed by intravascular ultrasound. <i>American Journal of Cardiology, 1992, 70, 1546-54</i>	3	77
314	Effect of balloon material on coronary angioplasty. <i>American Journal of Cardiology, 1992, 69, 1481-2</i>	3	15
313	Contained rupture following percutaneous transluminal coronary angioplasty: long-term outcome. 1993, 28, 152-4		10
312	Pseudodissection of the coronary artery: a variation caused by interventional tools. 1993, 29, 298-300		1
