Version: 2024-04-26

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

- 173 Research on heat transfer performance of leaf veins flat heat pipe. **2023**,
- 172 CFD studies on the high-viscosity oil-water two-phase flow in a horizontal pipe. **2023**,
- 171 Numerical simulation of periodic surface structures created by direct laser interference patterning. **2023**, 18, e0282266
- 170 Numerical simulation of bubble hydrodynamics for pool scrubbing. 1-14
- 169 Numerical and experimental investigation of gas flow field variations in three-dimensional printed gas-dynamic virtual nozzles. 8,
- 168 Entropy Generation of Two-Phase Flow Boiling in Elliptical U-Bend Tube Heat Exchanger. 1-16
- 167 Hanging droplets from liquid interfaces. **2023**, 958,
- 166 Effect of the Density Ratio on Emulsions and Their Segregation: A Direct Numerical Simulation Study. **2023**, 16, 3160
- 165 Fourier Image Analysis of Multiphase Interfaces to Quantify Primary Atomization. **2023**, 28, 55
- 164 Dynamics of a Taylor bubble through a shear-thinning fluid up to finite capillary numbers. **2023**, 314, 105003
- 163 The spreading and sliding characteristics of droplet impingement on an inclined hydrophobic surface at low Weber numbers. **2023**, 100, 109113
- 162 Effect of nozzle upscaling on coaxial, gas-assisted atomization. **2023**, 35, 043302
- 161 A computational methodology to account for the liquid film thickness evolution in Direct Numerical Simulation of prefilming airblast atomization. **2023**, 161, 104403
- 160 Optimal designs for flow uniformity at inlet of microchannel flat tube heat exchanger. **2023**, 226, 120300
- 159 Numerical investigation of oxygen bubble condensation in subcooled quiescent liquid oxygen based on height function method. **2023**, 225, 120207
- 158 Simulation of droplet bouncing on flexible substrate in 2D and 3D with WC-TL SPH method. **2023**, 119, 103864
- 157 Numerical study on the nonwetting ability of trapezoid topography. **2023**, 119, 103868
- 156 Modeling of co-axial bubbles coalescence under moderate Reynolds regimes: A Bi-phase SPH approach. **2023**, 162, 104355

- 155 Central-moment discrete unified gas-kinetic scheme for incompressible two-phase flows with large density ratio. **2023**, 482, 112040 ○
- 154 Dropwise and liquid-jet laminar flow of subcooled water falling over horizontal tube banks. **2023**, 206, 123936 ○
- 153 Liquid jet breakup in gaseous crossflow injected through a large diameter nozzle. **2023**, 163, 104419 ○
- 152 Numerical simulation of flow characteristics of non-axisymmetric droplet flow between horizontal tubes. **2023**, 163, 104429 ○
- 151 Wave impact on rigid and flexible plates. **2023**, 182, 104302 ○
- 150 Study of two-phase flow characteristics in the interrupted microchannels. **2023**, 188, 108211 ○
- 149 Regulating liquid film disturbance via disk configurations for photochemical process intensification in a spinning disk reactor. **2023**, 273, 118641 ○
- 148 Characterization and modelling of water mixing energies and particle behavior during wave generation in CanmetENERGY Devon spill test tank. **2023**, 278, 114237 ○
- 147 Droplet solidification: Physics and modelling. **2023**, 228, 120515 ○
- 146 Numerical investigation of organic fluid flow boiling for proton exchange membrane fuel cell cooling and waste heat recovery. **2023**, 228, 120564 ○
- 145 Morphology and kinematics of a train of power-law droplets in a corrugated microchannel. **2023**, 274, 118691 ○
- 144 Experimental and computational investigation into hydrodynamic and heat transfer characteristics of subcooled flow boiling on the International Space Station. **2023**, 207, 124000 ○
- 143 Numerical method for gas-liquid two-phase flow with phase change heat transfer considering compressibility using OpenFOAM. **2023**, 188, 108195 ○
- 142 On ghost fluid method-based sharp interface level set method on a co-located grid and its comparison with balanced force-based diffuse interface method. **2023**, 485, 112109 ○
- 141 Dynamics of long bubbles propagating through cylindrical micro-pin fin arrays. **2023**, 163, 104443 ○
- 140 Micro pin fins with topologically optimized configurations enhance flow boiling heat transfer in manifold microchannel heat sinks. **2023**, 206, 123956 1
- 139 Deep learning of interfacial curvature: A symmetry-preserving approach for the volume of fluid method. **2023**, 485, 112110 ○
- 138 Effect of incident direction and droplet position on dynamic and heat transfer behaviors of droplet impacting on super-hydrophilic cylindrical surface. **2023**, 187, 109785 ○

- 137 A three-dimensional ISPH-FVM coupling method for simulation of bubble rising in viscous stagnant liquid. **2023**, 278, 114497
- 136 Study of drop mobility over a surface having electric charge gradient. **2023**, 275, 118717
- 135 CFD simulation on hydrodynamic and thermal behavior of elliptical condensing tubes with an improved mass transfer model. **2023**, 209, 124083
- 134 Effect of rhombus mesh on 3D falling film flow characteristics over microchannel flat tube for LiBr (Lithium bromide) absorber. **2023**, 209, 124097
- 133 Impact of wettability on interface deformation and droplet breakup in microcapillaries. **2023**, 35, 042110
- 132 A volume-of-fluid methodology for interfacial mass transfer. **2023**, 275, 118720
- 131 Capillary-driven horseshoe vortex forming around a micro-pillar. **2023**, 642, 227-234
- 130 A nodal position finite element model for fluid-structure interaction analysis of floating bodies with mooring. **2023**, 279, 114344
- 129 Investigation of the energy conversion process of a single bubble collapsing near different boundaries. **2023**, 277, 114063
- 128 Efficient direct numerical simulation of gas absorption in falling films using a combined high-throughput/high-performance approach. **2023**, 273, 118603
- 127 Towards understanding of spreading and detachment during droplet impact onto a hemispherical surface. **2023**, 100, 52-66
- 126 Multicellular structures in thin free liquid films induced by thermocapillary effect. **2023**, 641, 187-196
- 125 Bounce behaviors of double droplets simultaneously impact cold superhydrophobic surface. **2023**, 208, 124075
- 124 An enstrophy-based analysis of the turbulence-interface interactions across the scales. **2023**, 164, 104449
- 123 Investigation of film boiling over tandem arrangement of elliptical cylinders in vertical cross-flow of saturated liquid. **2023**, 227, 120308
- 122 Thermocapillary convection in superimposed layers of self-rewetting fluids: Analytical and lattice Boltzmann computational study. **2023**, 208, 124049
- 121 A Finite Volume Framework for the Simulation of Additive Friction Stir Deposition. **2023**, 145,
- 120 On the cone-to-jet transition region and its significance in electrospray propulsion. **2023**, 205, 12-22

- 119 Modeling surface tension in Smoothed Particle Hydrodynamics using Young-Laplace pressure boundary condition. **2023**, 406, 115907 ○
- 118 CFD simulation on the operation characteristics of CO₂ two-phase thermosyphon loop. **2023**, 224, 120103 ○
- 117 Direct numerical simulation of heat transfer on a deformable vapor bubble rising in superheated liquid. **2023**, 35, 023319 ○
- 116 Laminar drag reduction ability of liquid-infused microchannels by considering different infused lubricants. **2023**, 158, 074702 1
- 115 Numerical study of the cross-vapor stream effect on falling film heat transfer performance over a horizontal tube. **2023**, 224, 120109 ○
- 114 Numerical simulation of bubbly flows by the improved lattice Boltzmann method for incompressible two-phase flows. **2023**, 254, 105797 ○
- 113 Interfacial-dominated torque response in liquid-liquid Taylor-Couette flows. **2023**, 956, ○
- 112 A numerical model for simulating separated gas-liquid two-phase flow with low GVF in a V-cone flowmeter. **2023**, 90, 102329 ○
- 111 Flow Boiling in Flexible Polymer Microgaps for Embedded Cooling in High-Power Applications. **2023**, 145, ○
- 110 Controlling the breakup of spiralling jets: results from experiments, nonlinear simulations and linear stability analysis. **2023**, 956, ○
- 109 An AMR-Based Liquid Film Simulation with Surfactant Transport Using PLIC-HF Method. **2023**, 13, 1955 ○
- 108 Numerical Investigation of Flow Patterns and Plug Hydrodynamics in a 3D T-junction Microchannel. **2023**, 35, ○
- 107 Modeling of horizontal steam injection in a water pool. **2023**, 405, 112197 ○
- 106 Optimisation of geometry and surface wettability for enhanced efficiency of the solar still-based desalination unit. 1-8 ○
- 105 Microbubble collapse near a fiber: Broken symmetry conditions and a planar jet formation. **2023**, 35, 023305 ○
- 104 A New Rheological Model for Phosphate Slurry Flows. **2023**, 8, 57 ○
- 103 Interface Capturing Flow Boiling Simulations in a Compact Heat Exchanger. **2023**, 145, ○
- 102 A numerical study on film condensation of steam with non-condensable gas on a vertical plate. 11, ○
