87	Augmenting a Physics-Informed Neural Network for the 2D Burgers Equation by Addition of Solution Data Points. **2022**, 388-401	0
86	A class of high-order improved fast weighted essentially non-oscillatory schemes for achieving optimal order at any critical points.	1
85	Sound radiation by a vortex pair moving near a rectangular cylinder.. **2022**,	0
84	GPU-accelerated DNS of compressible turbulent flows. **2023**, 251, 105744	0
83	On the role of spectral properties of viscous flux discretization for flow simulations on marginally resolved grids. **2023**, 251, 105742	0
82	Extension of an exponential discretization scheme to multidimensional convection–diffusion problems. **2023**, 251, 105740	0
81	A family of spatio-temporal optimized finite difference schemes with adaptive dispersion and critical-adaptive dissipation for compressible flows. **2023**, 474, 111821	0
80	RBF-FD discretization of the Navier-Stokes equations on scattered but staggered nodes. **2023**, 474, 111756	0
79	High-order compact finite difference schemes for solving the regularized long-wave equation. **2023**, 185, 165-187	0
78	Numerical prediction of the regions of high energy dissipation for different free-stream turbulence in transitional low-pressure turbine cascade flows. **2022**,	0
77	Efficient sixth-order finite difference method for the two-dimensional nonlinear wave equation with variable coefficient.	0
76	Development of the LES-ADM approach for combustion modelling using high-order filters. **2022**, 2367, 012014	0
75	Effect of heat source on kinetic energy transfer in compressible homogeneous shear turbulence. **2022**, 34, 125124	0
74	Three-dimensional ESRGAN for super-resolution reconstruction of turbulent flows with tricubic interpolation-based transfer learning. **2022**, 34, 125126	0
