

# Full-length cDNA sequence of dengue type 1 virus (Sing

Virology

188, 953-958

DOI: 10.1016/0042-6822(92)90560-c

Citation Report

#	ARTICLE	IF	CITATIONS
2	Use of NS 3 consensus primers for the polymerase chain reaction amplification and sequencing of dengue viruses and other flaviviruses. Archives of Virology, 1993, 133, 157-170.	0.9	58
3	Comparative analysis of the NS 1 gene sequences of dengue-1 viruses prototype Hawaii strain and Thai isolate TH-Sman, and determination of the intratypic variation of NS 1 protein among dengue-1 viruses. Archives of Virology, 1993, 131, 447-454.	0.9	2
4	Rapid identification of flaviviruses based on conserved NS5 gene sequences. Journal of Virological Methods, 1993, 44, 179-188.	1.0	61
5	Computer-assisted identification of a putative methyltransferase domain in NS5 protein of flaviviruses and $\Delta 2$ protein of reovirus. Journal of General Virology, 1993, 74, 733-740.	1.3	223
6	Nucleotide and deduced amino acid sequences of genes encoding the structural and nonstructural NS1 proteins of a dengue-2 virus isolated in China. Virus Genes, 1994, 8, 71-74.	0.7	3
7	Identification of mosquito-borne flavivirus sequences using universal primers and reverse transcription/polymerase chain reaction. Research in Virology, 1994, 145, 93-104.	0.7	102
8	Sequences of E/NS1 Gene Junction from Four Dengue $\Delta 2$ Viruses of Northeastern Thailand and Their Evolutionary Relationships with Other Dengue $\Delta 2$ Viruses. Microbiology and Immunology, 1995, 39, 581-590.	0.7	11
9	Computer simulations to predict the availability of peptides with known HLA class I motifs generated by proteolysis of dengue fever virus (DFV) type 1 structural and nonstructural proteins in infected cells. Virus Genes, 1995, 10, 195-203.	0.7	5
10	Evaluation of complete genome sequences and sequences of individual gene products for the classification of hepatitis C viruses. Archives of Virology, 1995, 140, 1747-1761.	0.9	33
11	Isolation of novel virus-like sequences associated with human hepatitis. Nature Medicine, 1995, 1, 564-569.	15.2	1,185
12	Rapid, single-step RT-PCR typing of dengue viruses using five NS3 gene primers. Journal of Virological Methods, 1995, 51, 193-200.	1.0	88
13	Molecular systematics of the flaviviruses and their relatives. , 1995, , 270-289.		6
14	Molecular basis of attenuation of neurovirulence of wild-type Japanese encephalitis virus strain SA14. Journal of General Virology, 1995, 76, 409-413.	1.3	106
15	Flavivirus-cross-reactive, HLA-DR15-restricted epitope on NS3 recognized by human CD4+ CD8-cytotoxic T lymphocyte clones. Journal of General Virology, 1995, 76, 2243-2249.	1.3	66
16	Molecular epidemiology of dengue-1 and dengue-4 viruses. Journal of General Virology, 1995, 76, 1877-1884.	1.3	93
17	A single nine-amino acid peptide induces virus-specific, CD8+ human cytotoxic T lymphocyte clones of heterogeneous serotype specificities.. Journal of Experimental Medicine, 1995, 182, 853-863.	4.2	35
18	Rapid diagnosis and determination of duration of viraemia in dengue fever using a reverse transcriptase polymerase chain reaction. Transactions of the Royal Society of Tropical Medicine and Hygiene, 1996, 90, 140-143.	0.7	15
19	Detection of the Disease Severity-Related Molecular Differences among New Thai Dengue $\Delta 2$ Isolates in 1993, Based on Their Structural Proteins and Major Non-Structural Protein NS1 Sequences. Microbiology and Immunology, 1996, 40, 205-216.	0.7	20
