

CITATION REPORT

List of articles citing

Reactivation of hippocampal ensemble memories during sleep

DOI: 10.1126/science.8036517
Science, 1994, 265, 676-9.

Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

269 Interaction of Hippocampal Ripples and Cortical Slow Waves Leads to Coordinated Large-Scale Sleep Rhythm. 1

268 Increased molecular plasticity along the septotemporal axis of the hippocampus is associated with network functioning.

267 mPFC Spindle Cycles Organize Sparse Thalamic Activation and Recently Active CA1 cells During non-REM Sleep. 0

266 Posterior hippocampal spindle-ripples co-occur with neocortical theta-bursts and down-upstates, and phase-lock with parietal spindles during NREM sleep in humans. 0

265 Sleep spindles mediate hippocampal-neocortical coupling during sharp-wave ripples. 2

264 Coordination of human hippocampal sharpwave-ripples during NREM sleep with cortical theta bursts, spindles, downstates and upstates. 0

263 Reward does not facilitate visual perceptual learning until sleep occurs.

262 Twister3: a simple and fast microwire twister. 1

261 Opponent neurochemical and functional processing in NREM and REM sleep in visual learning.

260 Refinement and reactivation of a taste-responsive hippocampal network.

259 Cellular compartment analysis of temporal activity by fluorescent in situ hybridization (catFISH) in the transcordially perfused rat brain.

- 258 Spatiotemporal patterns of neocortical activity around hippocampal sharp-wave ripples. 1
- 257 Fast and slow cortical high frequency oscillations for cortico-cortical and cortico-hippocampal network consolidation during NonREM sleep. 1

- 26 How our understanding of memory replay evolves. **2023**, 129, 552-580 ○
- 25 Presenting rose odor during learning, sleep and retrieval helps to improve memory consolidation: a real-life study. **2023**, 13, ○

- 24 Neuropeptide diuretic hormone 31 mediates memory and sleep via distinct neural pathways in *Drosophila*. **2023**,
- 23 Interictal epileptiform discharges affect memory in an Alzheimer's Disease mouse model.
- 22 Mapping Sleep's Oscillatory Events as a Biomarker of Alzheimer's Disease.
- 21 Execution of new trajectories toward a stable goal without a functional hippocampus.
- 20 Reduced coupling between offline neural replay events and default mode network activation in schizophrenia. **2023**, 5,
- 19 CBD lengthens sleep, shortens ripples and leads to intact simple but worse cumulative memory.
- 18 Sleep, Ageing, and Cognitive Decline. **2023**, 175-192
- 17 Memory systems integration in sleep complements rapid systems consolidation in wakefulness.
- 16 Editorial: Reconfiguration of neuronal ensembles throughout learning. 17,
- 15 Aversive experience drives offline ensemble reactivation to link memories across days.
- 14 Rapid learning of predictive maps with STDP and theta phase precession. 12, 2
- 13 Memory reactivations during sleep: a neural basis of dream experiences?. **2023**,
- 12 Interhemispheric competition during sleep. **2023**, 616, 312-318
- 11 Reap while you sleep: Consolidation of memories differs by how they were sown.
- 10 Control of circadian rhythm on cortical excitability and synaptic plasticity. 17,
- 9 Anteromedial thalamus gates the selection and stabilization of long-term memories. **2023**, 186, 1369-1381.e170
- 8 Sleep's brain-state serving systems memory consolidation. **2023**, 111, 1050-1075
- 7 Selective serotonin reuptake inhibitors suppress sharp wave ripples in the ventral hippocampus. **2023**, 152, 136-143

- 6 Role of cerebellum in sleep-dependent memory processes. 17,
- 5 Hippocampal sharp wave ripples underlie stress susceptibility in male mice. **2023**, 14,
- 4 Anatomical organization of temporally correlated neural calcium activity in the hippocampal CA1 region. **2023**, 106703
- 3 Growing dendrites enhance a neuron's computational power and memory capacity. **2023**, 164, 275-309
- 2 Hippocampo-cortical circuits for selective memory encoding, routing, and replay. **2023**,
- 1 Pourquoi nos rêves sont parfois bizarres. **2023**, N° 155, 60-65
