#	ARTICLE	IF	CITATIONS
1	Methods for designing reliable networks with bounded meshes. Teletraffic Science and Engineering, 1997, , 341-350.	0.4	3
2	An efficient approximation algorithm for the survivable network design problem. Mathematical Programming, 1998, 82, 13-40.	1.6	37
3	Exact solution of multicommodity network optimization problems with general step cost functions. Operations Research Letters, 1999, 25, 15-23.	0.5	98
4	Design of Communication Networks with Survivability Constraints. Management Science, 1999, 45, 238-252.	2.4	26
5	Splitting Off Edges within a Specified Subset Preserving the Edge-Connectivity of the Graph. Journal of Algorithms, 2000, 37, 326-343.	0.9	7
6	New modeling approaches for the design of local access transport area networks. European Journal of Operational Research, 2000, 127, 94-108.	3.5	14
7	On shortest three-edge-connected Steiner networks with Euclidean distance. Discrete Applied Mathematics, 2000, 103, 141-152.	0.5	3
8	On the Minimum Augmentation of an $\hat{\alpha}$ -Connected Graph to a k -Connected Graph. Lecture Notes in Computer Science, 2000, , 286-299.	1.0	2
9	Solving the Two-Connected Network with Bounded Meshes Problem. Operations Research, 2000, 48, 866-877.	1.2	43
10	Minimum cost 2-edge-connected Steiner graphs in rectilinear space: an evolutionary approach. , 0, , .		1
11	Intuitive solution-doubling techniques for worst-case analysis of some survivable network design problems. Operations Research Letters, 2001, 29, 99-106.	0.5	4
12	Discrete Cost Multicommodity Network Optimization Problems and Exact Solution Methods. Annals of Operations Research, 2001, 106, 19-46.	2.6	49
13	A family of algorithms for network reliability problems. , 0, , .		5
14	Non-tree routing for reliability and yield improvement. IEEE/ACM International Conference on Computer-Aided Design, Digest of Technical Papers, 2002, , .	0.0	24
15	Non-tree routing for reliability and yield improvement. , 0, , .		9
16	Increasing the connectivity of the star graphs. Networks, 2002, 40, 165-169.	1.6	40
17	Separation of partition inequalities for the (1,2)-survivable network design problem. Operations Research Letters, 2002, 30, 265-268.	0.5	19
18	Cutting planes in integer and mixed integer programming. Discrete Applied Mathematics, 2002, 123, 397-446.	0.5	152
