

# CITATION REPORT

List of articles citing

The paternal inheritance of the centrosome, the cell's microtubule-organizing center, in humans, and the implications for infertility

DOI: 10.1038/nm0195-47

Nature Medicine, 1995, 1, 47-52.

**Source:** <https://exaly.com/paper-pdf/25952882/citation-report.pdf>

**Version:** 2024-04-29

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
256	Rewards and risks in ICSI. <b>1995</b> , 10, 2518-2520		15
255	The sperm centrosome during fertilization in mammals: implications for fertility and reproduction. <b>1995</b> , 7, 747-54		30
254	The stages at which human fertilization arrests: microtubule and chromosome configurations in inseminated oocytes which failed to complete fertilization and development in humans. <b>1995</b> , 10, 1897-906		148
253	Paternal contribution to successful embryogenesis. <b>1995</b> , 10, 1326-8		39
252	The form and the substance. <i>Nature Medicine</i> , <b>1995</b> , 1, 19-20	50.5	7
251	Whither the investigation of male infertility? Is FSH measurement redundant and should all azoospermic patients have testicular biopsy?. <b>1995</b> , 10, 1945-7		2
250	Imaging motility during fertilization. <b>1995</b> , 44, 1099-114		10
249	The stages at which human fertilization arrests: microtubule and chromosome configurations in inseminated oocytes which failed to complete fertilization and development in humans. <i>Molecular Human Reproduction</i> , <b>1995</b> , 1, 239-248	4.4	6
248	The sperm centriole: its inheritance, replication and perpetuation in early human embryos. <b>1996</b> , 11, 345-56		189
247	The centrosome in animal cells and its functional homologs in plant and yeast cells. <b>1996</b> , 169, 25-82		62
246	Misconceptions about mitochondria and mammalian fertilization: implications for theories on human evolution. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>1996</b> , 93, 13859-63	11.5	207
245	Phenotypic variations among paternal centrosomes expressed within the zygote as disparate microtubule lengths and sperm aster organization: correlations between centrosome activity and developmental success. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>1996</b> , 93, 5384-8	11.5	80
244	Mammalian model systems for exploring cytoskeletal dynamics during fertilization. <b>1995</b> , 31, 321-42		11
243	Microtubule and microfilament dynamics in porcine oocytes during meiotic maturation. <b>1996</b> , 43, 248-55		105
242	Fertilization and development of mouse oocytes injected with isolated sperm heads. <b>1996</b> , 55, 789-95		249
241	Microtubule organization in porcine oocytes during fertilization and parthenogenesis. <b>1996</b> , 54, 1397-404		99
240	Changes in centrosomal domains during meiotic maturation in the human oocyte. <i>Molecular Human Reproduction</i> , <b>1996</b> , 2, 845-51	4.4	39

239	Sperm centrosome dysfunction: a possible new class of male factor infertility in the human. <i>Molecular Human Reproduction</i> , <b>1996</b> , 2, 349-54	4.4	38
238	Microtubule and chromatin dynamics during fertilization and early development in rhesus monkeys, and regulation by intracellular calcium ions. <b>1996</b> , 55, 260-70		81
237	Microtubule and chromatin configurations during rhesus intracytoplasmic sperm injection: successes and failures. <b>1996</b> , 55, 271-80		90
236	Spermatid conception: a stage too early, or a time too soon?. <b>1996</b> , 11, 1371-5		79
