

CITATION REPORT

List of articles citing

The remarkable coding strategy of borna disease virus: a new member of the nonsegmented negative strand RNA viruses

DOI: 10.1006/viro.1995.1311
Virology, 1995, 210, 1-8.

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
176	Prevalence of Borna disease virus RNA in peripheral blood mononuclear cells from blood donors. 1995 , 184, 135-8		51
175	Sequence characterization of human Borna disease virus. 1996 , 44, 33-44		60
174	Varied prevalence of Borna disease virus infection in Arabic, thoroughbred and their cross-bred horses in Iran. 1996 , 45, 1-13		59
173	Demonstration of Borna disease virus RNA in peripheral blood mononuclear cells derived from Japanese patients with chronic fatigue syndrome. 1996 , 378, 145-9		52
172	Expression of Borna Disease Virus Messages in Clinical Samples from Patients with Brain Malignant Tumors.. 1996 , 72, 157-162		4
171	Borna disease virus RNA in peripheral blood mononuclear cells obtained from healthy dairy cattle. 1996 , 185, 145-51		29
170	RNA-protein interactions in the regulation of coronavirus RNA replication and transcription. 1997 , 378, 477-81		11
169	Borna disease virus P-protein is phosphorylated by protein kinase Cepsilon and casein kinase II. 1997 , 272, 21818-23		49
168	Role of host proteins in gene expression of nonsegmented negative strand RNA viruses. 1997 , 48, 169-204		22
167	The neuropathogenesis of Borna disease virus infections. 1997 , 40, 185-97		20
166	Monopartite Negative Strand RNA Genomes. 1997 , 8, 49-57		66
165	Borna disease virus and the brain. 1997 , 44, 647-64		79
164	Borna disease. <i>Emerging Infectious Diseases</i> , 1997 , 3, 129-35	10.2	46
163	Borna disease virus (BDV), a (zoonotic?) worldwide pathogen. A review of the history of the disease and the virus infection with comprehensive bibliography. 1997 , 44, 147-84		40
162	The glycosylated matrix protein of Borna disease virus is a tetrameric membrane-bound viral component essential for infection. 1997 , 246, 252-7		9
161	Clinical investigation of the relationship between Borna disease virus (BDV) infection and schizophrenia in 67 patients in Japan. 1997 , 96, 412-5		39
160	Demonstration of Borna disease virus (BDV) in specific regions of the brain from horses positive for serum antibodies to BDV but negative for BDV RNA in the blood and internal organs. 1997 , 186, 19-24		19

159	Borna disease virus is not sensitive to amantadine. 1997 , 142, 2043-8		39
158	Higher prevalence of Borna disease virus infection in blood donors living near thoroughbred horse farms. 1997 , 52, 330-335		38
157	Sensitivity and reproducibility of RT-PCR to detect Borna disease virus (BDV) RNA in blood: implications for BDV epidemiology. 1998 , 71, 229-45		30
156	Nuclear targeting activity associated with the amino terminal region of the Borna disease virus nucleoprotein. <i>Virology</i> , 1998 , 243, 188-97	3.6	47
155	Interactions of the borna disease virus P, N, and X proteins and their functional implications. 1998 , 273, 9007-12		60
154	Borna disease in Austrian horses. 1998 , 143, 21-2		16
153	Borna or not?. 1998 , 31, 75-6
