

Numerical Partial Differential Equations: Finite Differen

Texts in Applied Mathematics

,

DOI: 10.1007/978-1-4899-7278-1

Citation Report

#	ARTICLE	IF	CITATIONS
1	A generalized 3D subgrid technique for the finite-difference time domain method. , 0, , .		19
2	A numerical study of compactons. Mathematics and Computers in Simulation, 1998, 47, 519-530.	2.4	127
3	A Reflectionless Sponge Layer Absorbing Boundary Condition for the Solution of Maxwell's Equations with High-Order Staggered Finite Difference Schemes. Journal of Computational Physics, 1998, 139, 184-208.	1.9	84
4	On some variational acceleration techniques and related methods for local refinement. International Journal for Numerical Methods in Fluids, 1998, 28, 945-960.	0.9	4
5	A mathematical model of the dynamics of scrapie in a sheep flock. Mathematical Biosciences, 1998, 153, 79-98.	0.9	45
6	Fast subgrid FD-TD matrix pencil technique for the rigorous analysis of resonant 3D microwave structures. , 0, , .		4
7	An iterative finite difference beam propagation method for modeling second-order nonlinear effects in optical waveguides. Journal of Lightwave Technology, 1998, 16, 1686-1693.	2.7	22
8	Comparison of Finite Difference and Wavelet-Galerkin Methods for the Solution of Telegraph Equations. , 1998, , .		0
9	Role of Papillary Muscle in the Generation and Maintenance of Reentry During Ventricular Tachycardia and Fibrillation in Isolated Swine Right Ventricle. Circulation, 1999, 100, 1450-1459.	1.6	146
10	Indexes and Special Discretization Methods for Linear partial Differential Algebraic Equations. BIT Numerical Mathematics, 1999, 39, 484-512.	1.0	36
11	Explicit second-order accurate schemes for the nonlinear Schrödinger equations. Lithuanian Mathematical Journal, 1999, 39, 20-32.	0.2	1
12	Generalized trapezoidal formulas for parabolic equations. International Journal of Computer Mathematics, 1999, 70, 429-443.	1.0	30
13	Comparisons of finite difference beam propagation methods for modeling second-order nonlinear effects. Journal of Lightwave Technology, 1999, 17, 1481-1486.	2.7	11
14	Generalized trapezoidal formulas for convection-diffusion equations. International Journal of Computer Mathematics, 1999, 72, 141-154.	1.0	15
15	Review of FDTD time-stepping schemes for efficient simulation of electric conductive media. Microwave and Optical Technology Letters, 2000, 25, 16-21.	0.9	27
16	Efficient finite-difference scheme for solving some heat transfer problems with convection in multilayer media. International Journal of Heat and Mass Transfer, 2000, 43, 4467-4474.	2.5	3
17	A Modified Binomial Tree Method for Currency Lookback Options. Acta Mathematica Sinica, English Series, 2000, 16, 445-454.	0.2	7
18	Non-dissipative time-integration schemes for the linear advection equation. International Journal of Computer Mathematics, 2000, 73, 503-515.	1.0	0
