Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
625	High pressure inactivation kinetics of bacillus subtilis cells by a three-state-model considering distributed resistance mechanisms. 1996 , 10, 149-161		98
624	Comparison of the Effects of High-Pressure Treatments and Heat Pasteurization on the Whey Proteins in Goat's Milk. 1997 , 45, 627-631		73
623	Kinetic Analysis of Zygosaccharomyces bailii Inactivation by High Hydrostatic Pressure1. 1997 , 30, 703-708		41
622	Effects of high pressure on meat: A review. 1997 , 46, 211-36		546
621	High-Pressure-Induced Gel of Sardine (Sardina pilchardus) Washed Mince as Affected by Pressure-Time-Temperature. 1997 , 62, 1183-1188		41
620	High Hydrostatic Pressure as a Hurdle for Zygosaccharomyces bailii Inactivation. 1997 , 62, 855-857		45
619	Frozen storage of high-pressure- and heat-induced gels of blue whiting (Micromesistius poutassou) muscle: rheological, chemical and ultrastructure studies. 1997 , 205, 335-342		17
618	Microorganism inactivation using high-pressure generation in sealed vessels under sub-zero temperature. 1998 , 50, 415-8		42
617	Effect of oscillatory high hydrostatic pressure treatments on Byssoschlamys nivea ascospores suspended in fruit juice concentrates. 1998 , 27, 375-8		41
616	High pressure (HP) destruction kinetics of Listeria monocytogenes Scott A in raw milk. 1998 , 31, 343-350		54
615	Polyphenoloxidase activity and color changes during storage of high hydrostatic pressure treated avocado puree. 1998 , 31, 549-556		108
614	Recent advances in the microbiology of high pressure processing. 1998 , 9, 152-158		495
613	Technology aspects related to microorganisms in functional foods. 1998 , 9, 295-306		152
612	Effect of high hydrostatic pressure on enzyme stability. 1998 , 15, 205-210		2
611	Characteristics of Pressure-induced Gels of Lactoglobulin at Various Times after Pressure Release. 1998 , 31, 10-19		47
610	Physiological Responses and Morphological Changes of Salmonella typhimurium and Listeria monocytogenes to High Hydrostatic Pressure Treatments. 1998 , 442-447		
609	High Pressure, a Unique Tool for Food Texturization.. 1998 , 4, 99-113		14

608	High-pressure destruction kinetics of <i>Listeria monocytogenes</i> on pork. 1999 , 62, 40-5	54
607	Microbiological changes in pressurized, prepackaged sliced cooked ham. 1999 , 62, 1411-5	43
606	Changes in aromatic volatile composition of strawberry after high pressure treatment. 1999 , 67, 7-16	101
605	High pressure response of fruit jams contaminated with <i>Listeria monocytogenes</i> . 1999 , 28, 313-6	25
604	Response to high-pressure, low-temperature treatment in vegetables: determination of survival rates of microbial populations using flow cytometry and detection of peroxidase activity using confocal microscopy. 1999 , 86, 544-56	87
603	Yeast cell mortality related to a high-pressure shift: occurrence of cell membrane permeabilization. 1999 , 87, 1-7	57
602	INACTIVATION OF CLOSTRIDIUM BOTULINUM TYPE E SPORES BY HIGH PRESSURE PROCESSING. 1999 , 19, 277-288	85
601	Inactivation of <i>Mucor plumbeus</i> by the combined actions of chitinase and high hydrostatic pressure. 1999 , 52, 109-13	15
600	A Simple Method for Measuring the pH of Acid Solutions Under High Pressure. 1999 , 103, 1785-1789	43
599	High pressure processing of foods for microbiological safety and quality (a short review). 2000 , 47, 175-82	42
598	Characteristics of pressurised pork meat batters as affected by addition of plasma proteins, apple fibre and potato starch. 2000 , 80, 1230-1236	19
597	Physiological effects of high hydrostatic pressure treatments on <i>Listeria monocytogenes</i> and <i>Salmonella typhimurium</i> . 2000 , 88, 202-12	73
596	Induced structural change to β -lactoglobulin by combined pressure and temperature. 2000 , 5, 73-76	25
595	A procedure for the manufacture of goat milk cheese with controlled-microflora by means of high hydrostatic pressure. 2000 , 69, 73-79	18
594	High Pressure Processing. 2000 , 65, 47-64	227
593	References. 2000 , 65, 103-108	
592	High Hydrostatic Pressure Treatments for Beer Stabilization. 2000 , 65, 974-977	21
591	High-pressure denaturation of apomyoglobin. 2000 , 1480, 353-64	24

590	Effects of high hydrostatic pressure on membrane proteins of <i>Salmonella typhimurium</i> . 2000 , 55, 115-9	74
589	Interactions of high hydrostatic pressure, pressurization temperature and pH on death and injury of pressure-resistant and pressure-sensitive strains of foodborne pathogens. 2000 , 60, 33-42	210
588	Inactivation of <i>Listeria monocytogenes</i> by high hydrostatic pressure: effects and interactions of treatment variables studied by analysis of variance. 2000 , 17, 375-382	39
587	Oyster preservation by high-pressure treatment. 2000 , 63, 196-201	138
586	High-pressure processing applied to cooked sausages: bacterial populations during chilled storage. 2000 , 63, 1093-9	44
585	Evaluation of batch and semicontinuous application of high hydrostatic pressure on foodborne pathogens in salsa. 2000 , 63, 1713-8	16
584	Relationship between membrane damage and cell death in pressure-treated <i>Escherichia coli</i> cells: differences between exponential- and stationary-phase cells and variation among strains. 2000 , 66, 2829-34	235
583	Use of hydrostatic pressure for inactivation of microbial contaminants in cheese. 2000 , 66, 4890-6	109
582	Micellar changes induced by high pressure. influence in the proteolytic activity and organoleptic properties of milk. 2000 , 83, 2184-9	61
581	Sensitivity of spores of <i>Bacillus subtilis</i> and <i>Clostridium sporogenes</i> PA 3679 to combinations of high hydrostatic pressure and other processing parameters. 2000 , 1, 49-56	78
580	Combination of high pressure with nisin or lysozyme to further process mechanically recovered poultry meat. <i>High Pressure Research</i> , 2000 , 19, 85-90	1.6 5
579	Virulence of <i>Listeria monocytogenes</i> before and after high hydrostatic pressure treatment. <i>High Pressure Research</i> , 2000 , 19, 201-205	1.6 1
578	Extension of shelf life of chilled hake (<i>Merluccius capensis</i>) by high pressure/Prolongaci3n de la vida 3til de merluza (<i>Merluccius capensis</i>) sometida a altas presiones conservada en refrigeraci3n. <i>Food Science and Technology International</i> , 2000 , 6, 243-249	2.6 42
577	Soybean vegetable protein (Tofu) preserved with high pressure. 2000 , 48, 2943-7	40
576	APLICACI3N DE LA ALTA PRESI3N HIDROST3TICA EN LA CONSERVACI3N DE LOS ALIMENTOS APPLICATION OF HIGH HYDROSTATIC PRESSURE IN THE FOOD PRESERVATION APLICACI3N DA ALTA PRESI3N HIDROST3TICA NA CONSERVACI3N DOS ALIMENTOS. 2001 , 3, 66-80	29
575	Effect of high-pressure treatment on rheology of oil-in-water emulsions prepared with hen egg yolk. 2001 , 2, 9-21	39
574	Inactivation of pathogenic <i>Escherichia coli</i> in skimmed milk using hhigh hydrostatic pressure. 2001 , 2, 99-104	46
573	Resistance of poliovirus to inactivation by high hydrostatic pressures. 2001 , 2, 95-98	55

572	Kinetic studies on high-pressure inactivation of <i>Bacillus stearothermophilus</i> spores suspended in food matrices. 2001 , 2, 261-272	99
571	Variation in resistance to high hydrostatic pressure and rpoS heterogeneity in natural isolates of <i>Escherichia coli</i> O157:H7. 2001 , 67, 4901-7	111
570	Tomato (<i>Lycopersicon esculentum</i>) pectin methylesterase and polygalacturonase behaviors regarding heat- and pressure-induced inactivation. 2001 , 49, 5566-75	100
569	Reaction of <i>B. cereus</i> bacteria and peroxidase enzymes under pressures >400 MPa. 2001 , 49, 2830-4	17
568	High-pressure/temperature treatment effect on the characteristics of octopus (<i>Octopus vulgaris</i>) arm muscle. 2001 , 213, 22-29	41
567	High pressure processing in jam manufacture: effects on textural and colour properties. 2001 , 73, 85-91	57
566	The combined action of carvacrol and high hydrostatic pressure on <i>Listeria monocytogenes</i> Scott A. 2001 , 90, 463-9	99
565	A study on the colour and sensory attributes of high-hydrostatic-pressure jams as compared with traditional jams. 2001 , 81, 1228-1234	58
564	HIGH PRESSURE PROCESSING FOR FOOD SAFETY AND PRESERVATION: A REVIEW1. 2001 , 9, 1-10	68
563	Ultra High Pressure Treatments of Foods. 2001 ,	33
562	In situ determination of the intracellular pH of <i>Lactococcus lactis</i> and <i>Lactobacillus plantarum</i> during pressure treatment. 2002 , 68, 4399-406	92
561	Minimal processing in practice: seafood. 2002 , 245-266	5
560	Gel formation of individual milk whey proteins under hydrostatic pressure. 2002 , 453-460	5
559	Effect of sucrose and sodium chloride on the survival and metabolic activity of <i>Lactococcus lactis</i> under high-pressure conditions. 2002 , 295-302	7
558	Effect of ultra-high pressure on fruit juices contaminant yeasts. 2002 , 19, 511-516	3
557	Innovative Fruit Preservation Methods Using High Pressure. 2002 ,	
556	High pressure processing of meat. 2002 , 313-331	7
555	Influence of processing on total, monoglutamate and polyglutamate folate contents of leeks, cauliflower, and green beans. 2002 , 50, 3473-8	56

554	Role of membrane fluidity in pressure resistance of <i>Escherichia coli</i> NCTC 8164. 2002 , 68, 5965-72	170
553	Characterization of a <i>Listeria monocytogenes</i> Scott A isolate with high tolerance towards high hydrostatic pressure. 2002 , 68, 3183-9	97
552	Effect of pressure, temperature, time and storage on peroxidase and polyphenol oxidase from pineapple. 2002 , 19, 525-532	3
551	Food processing by high hydrostatic pressure. 2002 , 42, 627-45	383
550	Application of high-pressure processing and nisin to mechanically recovered poultry meat for microbial decontamination. 2002 , 13, 451-455	37
549	Effects of high-pressure treatment on viability and autolysis of starter bacteria and proteolysis in Cheddar cheese. 2002 , 12, 915-922	45
548	New mild technologies in meat processing: high pressure as a model technology. 2002 , 62, 359-71	286
547	<i>Anisakis simplex</i> larva killed by high-hydrostatic-pressure processing. 2002 , 65, 383-8	51
546	High-pressure inactivation of <i>Bacillus cereus</i> spores in the presence of argon. 2002 , 72, 239-42	18
545	Sensory, chemical and bacteriological changes in vacuum-packed pressurised squid mantle (<i>Todaropsis eblanae</i>) stored at 4 degrees C. 2002 , 74, 1-12	55
544	High pressure effects step-wise altered protein expression in <i>Lactobacillus sanfranciscensis</i> . 2002 , 2, 765-74	40
543	Application of high-pressure treatment in the mashing of white malt in the elaboration process of beer. 2002 , 82, 258-262	7
542	Numerical simulation of convective and diffusive transport effects on a high-pressure-induced inactivation process. 2002 , 79, 94-104	50
541	Responses of <i>Pseudomonas fluorescens</i> to combined high pressure/temperature treatments. 2002 , 214, 511-515	9
540	Influence of high-pressure processing on selected polymeric materials and on the migration of a pressure-transmitting fluid. 2002 , 15, 255-262	56
539	High pressure freezing and thawing of foods: a review. 2002 , 25, 504-513	168
538	Microbial Inactivation in Meat Products by Pressure/Temperature Processing. 2002 , 67, 797-801	20
537	The stenlying effect of high hydrostatic pressure on thermally and hydrolytically labile nanosized carriers. 2003 , 20, 674-83	22

536	Evaluation of high hydrostatic pressure sensitivity of <i>Staphylococcus aureus</i> and <i>Escherichia coli</i> O157:H7 by differential scanning calorimetry. 2003 , 87, 229-37	36
535	High sucrose concentration protects <i>E. coli</i> against high pressure inactivation but not against high pressure sensitization to the lactoperoxidase system. 2003 , 88, 1-9	67
534	Convective and diffusive transport effects in a high pressure induced inactivation process of packed food. 2003 , 59, 33-44	47
533	Efficiency of high pressure treatment for destruction of <i>Listeria monocytogenes</i> in fruit juices. 2003 , 35, 269-73	19
532	The CtsR regulator of <i>Listeria monocytogenes</i> contains a variant glycine repeat region that affects piezotolerance, stress resistance, motility and virulence. 2003 , 49, 1227-38	79
531	Use of Conventional Media and Thin Agar Layer Method for Recovery of Foodborne Pathogens from Pressure-treated Poultry Products. 2003 , 68, 2321-2324	16
530	Effect of high pressure on isomerization and degradation of lactose in alkaline media. 2003 , 51, 1894-6	32
529	Consumer attitude towards information on non conventional technology. 2003 , 14, 43-49	112
528	Review: are intrinsic TTIs for thermally processed milk applicable for high-pressure processing assessment?. 2003 , 4, 1-14	37
527	On the modelling of the inactivation kinetics of <i>Saccharomyces cerevisiae</i> by means of combined temperature and high pressure treatments. 2003 , 4, 35-44	14
526	Modelling heat transfer in high pressure food processing: a review. 2003 , 4, 121-134	93
525	Effect of underwater high-current discharge on the properties of low-concentration β -lactoglobulin solutions. 2003 , 4, 151-159	3
524	Compression heating influence of pressure transmitting fluids on bacteria inactivation during high pressure processing. 2003 , 36, 661-668	74
523	Nonthermal preservation of foods using combined processing techniques. 2003 , 43, 265-85	316
522	Combining traditional and new preservation techniques to control pathogens: the case of <i>E. coli</i> . 2003 , 204-227	1
521	Developments in freezing. 2003 , 228-240	8
520	Inactivation of <i>Bacillus cereus</i> spores by high hydrostatic pressure at different temperatures. 2003 , 66, 599-603	39
519	Inactivation of <i>Clostridium botulinum</i> type A spores by high-pressure processing at elevated temperatures. 2003 , 66, 1402-7	78

518	High-pressure processing of Gorgonzola cheese: influence on <i>Listeria monocytogenes</i> inactivation and on sensory characteristics. 2004 , 67, 1671-5	32
517	An SOS response induced by high pressure in <i>Escherichia coli</i> . 2004 , 186, 6133-41	101
516	Modeling the synergistic effect of high pressure and heat on inactivation kinetics of <i>Listeria innocua</i> : a preliminary study. 2004 , 238, 29-36	82
515	Effect of high pressure processing and addition of glycerol and salt on the properties of water in corn tortillas. 2004 , 39, 109-117	25
514	Kinetic analysis of <i>Escherichia coli</i> inactivation by high hydrostatic pressure in broth and foods. 2004 , 21, 181-185	55
513	Assessment of high pressure induced damage on <i>Lactobacillus rhamnosus</i> GG by flow cytometry. 2004 , 21, 567-577	100
512	Suitability of high-dynamic-pressure-treated milk for the production of yoghurt. 2004 , 21, 753-760	49
511	Kinetic models for water adsorption and cooking time in chickpea soaked and treated by high pressure. 2004 , 63, 467-472	41
510	Biogenic amine content in Spanish retail market meat products treated with protective atmosphere and high pressure. 2004 , 218, 237-241	35
509	Effects of high-pressure processing on <i>Listeria monocytogenes</i> , spoilage microflora and multiple compound quality indices in chilled cold-smoked salmon. 2004 , 96, 398-408	70
508	High pressure and the enzymatic hydrolysis of soybean whey proteins. 2004 , 85, 641-648	72
507	Morphological and physiological changes induced by high hydrostatic pressure in exponential- and stationary-phase cells of <i>Escherichia coli</i> : relationship with cell death. 2004 , 70, 1545-54	141
506	Inactivation and sublethal injury of foodborne pathogens by high pressure processing: Evaluation with conventional media and thin agar layer method. 2004 , 37, 861-866	55
505	Modeling the synergistic effect of high pressure and heat on inactivation kinetics of <i>Listeria innocua</i> : a preliminary study. 2004 , 238, 29-36	72
504	Advantages of high pressure sterilisation on quality of food products. 2004 , 15, 79-85	232
503	New preservation technologies: Possibilities and limitations. 2004 , 14, 273-285	390
502	Changes in the microbiological quality of vacuum-packaged, minced chicken treated with high hydrostatic pressure. 2004 , 5, 151-159	23
501	Microbial inactivation after high-pressure processing at 600 MPa in commercial meat products over its shelf life. 2004 , 5, 451-457	203

500 Intervention strategies for control of foodborne pathogens. **2004,**

499	Effect of high pressure and mild heat on Staphylococcus aureus in milk using response surface methodology. 2005, 40, 1849-1854		21
498	Application of high pressure technology in the fruit juice processing: benefits perceived by consumers. 2005, 67, 241-246		129
497	Optimization of process conditions to inactivate Bacillus subtilis by high hydrostatic pressure and mild heat using response surface methodology. 2005, 24, 43-48		37
496	Application of supercritical fluid extraction in biotechnology. 2005, 25, 231-42		40
495	The effect of high pressure treatment on rheological characteristics and colour of mango pulp. 2005, 40, 885-895		118
494	Effects of High Pressure on Texture and Microstructure of Sea Bass (<i>Dicentrarchus labrax</i> L.) Fillets. 2005, 70, e477-e483		142
493	Microbial inactivation by new technologies of food preservation. 2005, 98, 1387-99		315
492	ULTRA HIGH PRESSURE INACTIVATION OF SACCHAROMYCES CEREVISIAE AND LISTERIA INNOCUA ON APPLES AND BLUEBERRIES. <i>Journal of Food Processing and Preservation</i> , 2005, 29, 424-435	2.1	8
491	A comparative study of heat and high pressure induced gels of whey and egg albumen proteins and their binary mixtures. 2005, 19, 984-996		50
490	Effect of prior growth temperature, type of enrichment medium, and temperature and time of storage on recovery of <i>Listeria monocytogenes</i> following high pressure processing of milk. 2005, 101, 53-61		68
489	Novel method of inactivation of human immunodeficiency virus type 1 by the freeze pressure generation method. 2005, 67, 746-51		8
488	Starter cultures and high-pressure processing to improve the hygiene and safety of slightly fermented sausages. 2005, 68, 2341-8		40
487	Microbiological Aspects of High-pressure Processing. 2005, 47-65		8
486	Induction of Shiga toxin-converting prophage in <i>Escherichia coli</i> by high hydrostatic pressure. 2005, 71, 1155-62		49
485	Greater high-pressure resistance of bacteria in oysters than in buffer. 2005, 6, 83-90		46
484	Changes in the mechanical properties of corn tortillas due to the addition of glycerol and salt and selective high pressure treatments. 2005, 6, 304-309		15
483	Influence of high-pressure/low-temperature treatment on the inactivation of <i>Bacillus subtilis</i> cells. 2005, 6, 271-278		27

482	High pressure processing of shellfish: A review of microbiological and other quality aspects. 2005 , 6, 257-270	181
481	SulA-dependent hypersensitivity to high pressure and hyperfilamentation after high-pressure treatment of <i>Escherichia coli</i> lon mutants. 2005 , 156, 233-7	22
