

Chapter 9 Optimal trees

Handbooks in Operations Research and Management Science
, 503-615

DOI: [10.1016/s0927-0507\(05\)80126-4](https://doi.org/10.1016/s0927-0507(05)80126-4)

Citation Report

#	ARTICLE	IF	CITATIONS
1	Designing reliable tree networks with two cable technologies. European Journal of Operational Research, 1998, 105, 552-568.	3.5	21
2	The 2-hop spanning tree problem. Operations Research Letters, 1998, 23, 21-26.	0.5	31
3	Using Variable Redefinition for Computing Lower Bounds for Minimum Spanning and Steiner Trees with Hop Constraints. INFORMS Journal on Computing, 1998, 10, 180-188.	1.0	73
4	A hierarchy of hop-indexed models for the Capacitated Minimum Spanning Tree Problem. Networks, 2000, 35, 1-16.	1.6	22
5	Service network design in freight transportation. European Journal of Operational Research, 2000, 122, 272-288.	3.5	473
6	Generalized spanning trees. European Journal of Operational Research, 2000, 120, 583-592.	3.5	57
7	Valid inequalities for non-unit demand capacitated spanning tree problems with flow costs. European Journal of Operational Research, 2000, 121, 394-411.	3.5	6
8	A comparative analysis of several formulations for the generalized minimum spanning tree problem. Networks, 2002, 39, 29-34.	1.6	38
9	A linear-size zero-one programming model for the minimum spanning tree problem in planar graphs. Networks, 2002, 39, 53-60.	1.6	35
10	Network flow models for designing diameter-constrained minimum-spanning and Steiner trees. Networks, 2003, 41, 159-173.	1.6	93
11	Ant-Tree: an ant colony optimization approach to the generalized minimum spanning tree problem. Journal of Experimental and Theoretical Artificial Intelligence, 2003, 15, 103-112.	1.8	25
12	The generalized minimum spanning tree problem: Polyhedral analysis and branch-and-cut algorithm. Networks, 2004, 43, 71-86.	1.6	25
13	On Two-Stage Stochastic Minimum Spanning Trees. Lecture Notes in Computer Science, 2005, , 321-334.	1.0	29
14	Exact algorithms for the minimum power symmetric connectivity problem in wireless networks. Computers and Operations Research, 2005, 32, 2891-2904.	2.4	50
15	The capacitated minimum spanning tree problem: On improved multistar constraints. European Journal of Operational Research, 2005, 160, 47-62.	3.5	11
16	Polyhedral Combinatorics. , 2005, , 2-1-2-46.		5
17	The minimum power broadcast problem in wireless networks: a simulated annealing approach. , 0, , .		32
18	A study on combined routing and source coding with explicit side information in sensor networks. , 2005, , .		1

#	ARTICLE	IF	CITATIONS
19	On Formulations and Methods for the Hop-Constrained Minimum Spanning Tree Problem. , 2006, , 493-515.		35
20	An intersecting tree model for odd-diameter-constrained minimum spanning and Steiner trees. Annals of Operations Research, 2006, 146, 19-39.	2.6	7
21	Persistence in discrete optimization under data uncertainty. Mathematical Programming, 2006, 108, 251-274.	1.6	50
22	Network flow models for the local access network expansion problem. Computers and Operations Research, 2007, 34, 1141-1157.	2.4	8
23	A Branch and Bound algorithm for the minimax regret spanning arborescence. Journal of Global Optimization, 2007, 37, 467-480.	1.1	6
24	Modeling and solving the rooted distance-constrained minimum spanning tree problem. Computers and Operations Research, 2008, 35, 600-613.	2.4	38
25	The prize-collecting generalized minimum spanning tree problem. Journal of Heuristics, 2008, 14, 69-93.	1.1	17
26	Minimum power multicasting problem in wireless networks. Mathematical Methods of Operations Research, 2008, 68, 295-311.	0.4	20
27	Minimizing the Stabbing Number of Matchings, Trees, and Triangulations. Discrete and Computational Geometry, 2008, 40, 595-621.	0.4	10
28	Models and heuristics for a minimum arborescence problem. Networks, 2008, 51, 34-47.	1.6	18
29	The multi-weighted Steiner tree problem: A reformulation by intersection. Computers and Operations Research, 2008, 35, 3599-3611.	2.4	13
30	Modeling the Mobile Oil Recovery Problem as a Multiobjective Vehicle Routing Problem. Communications in Computer and Information Science, 2008, , 283-292.	0.4	2
31	A RELAX-AND-CUT ALGORITHM FOR THE KNAPSACK NODE WEIGHTED STEINER TREE PROBLEM. Asia-Pacific Journal of Operational Research, 2008, 25, 373-391.	0.9	1
32	A node rooted flow-based model for the local access network expansion problem. European Journal of Operational Research, 2010, 204, 20-34.	3.5	1
33	A mixed integer formulation for multicast flow assignment in multilayer networks. , 2010, , .		3
34	Solving the Minimum Label Spanning Tree Problem by Mathematical Programming Techniques. Advances in Operations Research, 2011, 2011, 1-38.	0.2	8
35	A Linear Programming-based Evolutionary Algorithm for the Minimum Power Broadcast Problem in Wireless Sensor Networks. Mathematical Modelling and Algorithms, 2011, 10, 145-162.	0.5	4
36	Branch-and-Cut-and-Price for Capacitated Connected Facility Location. Mathematical Modelling and Algorithms, 2011, 10, 245-267.	0.5	22

#	ARTICLE	IF	CITATIONS
37	MIP models for connected facility location: A theoretical and computational study. Computers and Operations Research, 2011, 38, 435-449.	2.4	69
38	A Parallel Lagrangian Relaxation Algorithm for the Min-Degree Constrained Minimum Spanning Tree Problem. Lecture Notes in Computer Science, 2012, , 237-248.	1.0	4
39	Lower and upper bounds for the spanning tree with minimum branch vertices. Computational Optimization and Applications, 2013, 56, 405-438.	0.9	31
40	Enhanced formulations and branch-and-cut for the two level network design problem with transition facilities. European Journal of Operational Research, 2013, 225, 211-222.	3.5	13
41	Layered Graph Approaches to the Hop Constrained Connected Facility Location Problem. INFORMS Journal on Computing, 2013, 25, 256-270.	1.0	23
42	Imposing Connectivity Constraints in Forest Planning Models. Operations Research, 2013, 61, 824-836.	1.2	93
43	Morphological and Syntactic Case in Statistical Dependency Parsing. Computational Linguistics, 2013, 39, 23-55.	2.5	18
44	Integer programming approaches for minimum stabbing problems. RAIRO - Operations Research, 2014, 48, 211-233.	1.0	0
45	Routing of two Unmanned Aerial Vehicles with communication constraints. , 2014, , .		12
46	Algorithms for Routing an Unmanned Aerial Vehicle in the Presence of Refueling Depots. IEEE Transactions on Automation Science and Engineering, 2014, 11, 287-294.	3.4	177
47	A comparison of intermodal transportation service network design models. , 2015, , .		0
48	On maximizing algebraic connectivity of networks for various engineering applications. , 2015, , .		7
49	A branch and cut algorithm for minimum spanning trees under conflict constraints. Optimization Letters, 2015, 9, 41-55.	0.9	31
50	Learning in Combinatorial Optimization: What and How to Explore. SSRN Electronic Journal, 0, , .	0.4	2
51	Optimal reconfiguration of electric power distribution systems using exact approach. , 2016, , .		2
52	Unified Algorithms for Online Learning and Competitive Analysis. Mathematics of Operations Research, 2016, 41, 612-625.	0.8	12
53	Min-degree constrained minimum spanning tree problem with fixed centrals and terminals: Complexity, properties and formulations. Computers and Operations Research, 2017, 84, 46-61.	2.4	10
54	Spanning trees with a constraint on the number of leaves. A new formulation. Computers and Operations Research, 2017, 81, 257-268.	2.4	5

#	ARTICLE	IF	CITATIONS
55	A branch-and-cut algorithm for the minimum branch vertices spanning tree problem. Computers and Operations Research, 2017, 81, 322-332.	2.4	12
56	Compact mixed integer linear programming models to the minimum weighted tree reconstruction problem. European Journal of Operational Research, 2017, 256, 242-251.	3.5	11
58	Optimal design of switched Ethernet networks implementing the Multiple Spanning Tree Protocol. Discrete Applied Mathematics, 2018, 234, 114-130.	0.5	6
59	An Efficient Mixed Integer Linear Programming Model for the Minimum Spanning Tree Problem. Mathematics, 2018, 6, 183.	1.1	12
60	Spanning Trees and Arborescences. Algorithms and Combinatorics, 2018, , 133-157.	0.6	1
61	Exact solution approaches for the Multi-period Degree Constrained Minimum Spanning Tree Problem. European Journal of Operational Research, 2018, 271, 57-71.	3.5	2
62	Multicast routing under quality of service constraints for vehicular ad hoc networks: mathematical formulation and a relax&and&fix heuristic. International Transactions in Operational Research, 2019, 26, 1339-1364.	1.8	5
63	The p-arborescence star problem: Formulations and exact solution approaches. Computers and Operations Research, 2019, 102, 91-101.	2.4	6
64	Two dependency constrained spanning tree problems. International Transactions in Operational Research, 2020, 27, 867-898.	1.8	4
65	A polyhedral study of the diameter constrained minimum spanning tree problem. Discrete Applied Mathematics, 2020, 285, 364-379.	0.5	4
66	Improving dynamic programming for travelling salesman with precedence constraints: parallel Morin&Marsten bounding. Optimization Methods and Software, 2021, 36, 1128-1154.	1.6	2
67	Learning in Combinatorial Optimization: What and How to Explore. Operations Research, 2020, 68, 1585-1604.	1.2	8
68	Solution of minimum spanning forest problems with reliability constraints. Computers and Industrial Engineering, 2020, 142, 106365.	3.4	6
69	Multi-Robot Patrolling with Sensing Idleness and Data Delay Objectives. Journal of Intelligent and Robotic Systems: Theory and Applications, 2020, 99, 949-967.	2.0	12
70	Distributionally Robust Distribution Network Configuration Under Random Contingency. IEEE Transactions on Power Systems, 2020, 35, 3332-3341.	4.6	41
71	Weighted target set selection on trees and cycles. Networks, 2021, 77, 587-609.	1.6	7
72	Exact and Approximation Algorithms for the Expanding Search Problem. INFORMS Journal on Computing, 2022, 34, 281-296.	1.0	4
73	Integer Programming Formulations for Minimum Spanning Tree Interdiction. INFORMS Journal on Computing, 0, , .	1.0	3
