Version: 2024-04-29

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

574	Optimal filtering, fault detection and isolation for linear discrete-time systems in a noisy environment. 2003 , 17, 729-750		7
573	Sliding mode observers for robust detection and reconstruction of actuator and sensor faults. 2003 , 13, 443-463		313

572 Estimation of effectiveness factor on-line and fault tolerant control.

571 A robust fault-detection approach with application in a rolling-mill process. **2003**, 11, 408-414 19

570 Sliding Mode Observers and Their Application in Fault Diagnosis. **2003**, 1-57 16

569 eSTORM: Enhanced self tuning on-board real-time engine model. 24

568 Data Validation of an Instrumentation System Using the Parity Space Approach [Application to the Aerospace Area. **2003**, 36, 125-130 2

567 Robust fault detection for a jet engine using robust l_1 Estimation. **2003**, 36, 161-166

566 Minimum variance state estimators with disturbance decoupling property for optimal filtering problems with unknown inputs. **2004**, 2004, 96-99 8

565 Diagnosis of nonlinear systems using an unknown-input observer: an algebraic and differential approach. **2004**, 151, 130-135 41

564 An observer design procedure for a class of nonlinear time-delay systems. **2004**, 30, 61-71 34

563 Fault detection and isolation of systems with slowly varying parameters [Simulation with a simplified aircraft turbo engine model. **2004**, 18, 353-366 4

562 Design of observers for a class of discrete-time uncertain nonlinear systems with time delay. **2004**, 341, 295-308 49

561 Nonlinear systems diagnosis: application to a hydraulic system.

560 On the robust fault detection via a sliding mode disturbance observer. *International Journal of Control*, **2004**, 77, 622-629 1.5 117

559 Unknown input observers for 2D state-space models. *International Journal of Control*, **2004**, 77, 861-876 1.5 18

558 . **2004**, 40, 1110-1117 27

557 A comparison of sliding mode and unknown input observers for fault reconstruction. **2004**, 25

556 ONLINE TESTING EMBEDDED SYSTEMS: ADAPTING AUTOMATIC CONTROL TECHNIQUES TO MICROELECTRONICS TESTING. **2005**, 38, 14-19

555 ROBUST FDI WITH MIXED H_2/H_∞ CRITERIA FOR DISCRETE-TIME LINEAR SYSTEMS. **2005**, 38, 239-244

554	Novel design of disturbance decoupled reduced-order observer. 2005 , 77, 293-297		3
553	Fault detection and isolation in the presence of process uncertainties. 2005 , 13, 587-599		25
552	HDynamic observer design with application in fault diagnosis.		3
551	Design of unknown input observers for Lipschitz nonlinear systems.		34
