

CITATION REPORT

List of articles citing

Development of the newborn GI tract and its relation to colostrum/milk intake: a review

DOI: 10.1071/rd9960035

Reproduction, Fertility and Development, 1996, 8, 35-48.

Version: 2024-04-10

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
161	Prolonged colostrum feeding enhances xylose absorption in neonatal calves. <i>Journal of Animal Science</i> , 1997 , 75, 2915-9	0.7	41
160	Oral insulinlike growth factor-I stimulates intestinal enzyme maturation in newborn rats. 1997 , 61, 51-8		39
159	The role of enterocytes in gut dysfunction. 1998 , 194, 741-51		5
158	Bioactive peptides in milk and their biological and health implications. 1998 , 14, 1-16		60
157	Stability and distribution of orally administered epidermal growth factor in neonatal pigs. 1998 , 63, 809-20		18
156	An increase in mucosal insulin-like growth factor II content in postresectional rat intestine suggests autocrine or paracrine growth stimulation. 1998 , 33, 1080-6		11
155	Determination of transforming growth factor-beta 1 (TGF-beta 1) and insulin-like growth factor (IGF-1) in bovine colostrum samples. 1998 , 19, 195-207		46
154	Metabolic and endocrine traits of neonatal calves are influenced by feeding colostrum for different durations or only milk replacer. 1998 , 128, 624-32		77
153	Small intestinal morphology in eight-day-old calves fed colostrum for different durations or only milk replacer and treated with long-R3-insulin-like growth factor I and growth hormone. <i>Journal of Animal Science</i> , 1998 , 76, 758-65	0.7	76
152	Crucial role of milk-borne insulin in the development of pancreatic amylase at the onset of weaning in rats. 1998 , 275, R1958-67		6
151	Development of gastrointestinal and pancreatic functions in mammals (mainly bovine and porcine species): influence of age and ingested food. 1999 , 39, 5-26		26
150	Bovine colostrum is a health food supplement which prevents NSAID induced gut damage. 1999 , 44, 653-8		112
149	Endocrine and metabolic aspects in milk-fed calves. 1999 , 17, 219-30		40
148	Small intestinal and pancreatic microstructures are modified by an intraduodenal CCK-A receptor antagonist administration in neonatal calves. 1999 , 85, 77-85		13
147	Growth performance, metabolic and endocrine traits, and absorptive capacity in neonatal calves fed either colostrum or milk replacer at two levels. <i>Journal of Animal Science</i> , 2000 , 78, 609-20	0.7	55
146	Gastrointestinal stability and absorption of insulin in suckling pigs. 2000 , 125, 389-401		15
145	Postnatal adaptation of the gastrointestinal tract in neonatal pigs: a possible role of milk-borne growth factors. 2000 , 66, 95-107		94

144	Colostrum effects on the gastrointestinal tract, and on nutritional, endocrine and metabolic parameters in neonatal calves. 2000 , 66, 151-159		160
143	Development of intestinal transport function in mammals. 2000 , 80, 1633-67		295
142	Immediate postnatal sucking in the rabbit: its influence on pup survival and growth. 2000 , 40, 19-32		53
141	Age-related changes in apparent digestibility in growing kittens. 2000 , 40, 249-60		9
140	Zinc in human milk. 2000 , 20, 1645-1687		42
139	A comparison of IgG and IgG1 activity in an early milk concentrate from non-immunised cows and a milk from hyperimmunised animals. <i>Food Research International</i> , 2001 , 34, 255-261	7	15
138	Co-administration of the health food supplement, bovine colostrum, reduces the acute non-steroidal anti-inflammatory drug-induced increase in intestinal permeability. 2001 , 100, 627-633		63
137	Co-administration of the health food supplement, bovine colostrum, reduces the acute non-steroidal anti-inflammatory drug-induced increase in intestinal permeability. 2001 , 100, 627		41
136	Feeding colostrum, its composition and feeding duration variably modify proliferation and morphology of the intestine and digestive enzyme activities of neonatal calves. 2001 , 131, 1256-63		90
135	The identification of secreted carbonic anhydrase VI as a constitutive glycoprotein of human and rat milk. 2001 , 98, 11604-8		82
134	Epidermal growth factor reduces the development of necrotizing enterocolitis in a neonatal rat model. 2002 , 282, G156-64		196
133	Calves sucking colostrum and milk from their dams or from an automatic feeding station starting in the neonatal period: metabolic and endocrine traits and growth performance. 2002 , 74, 431-444		12
132	Feeding different amounts of colostrum or only milk replacer modify receptors of intestinal insulin-like growth factors and insulin in neonatal calves. 2002 , 22, 155-68		42
131	Colostrum and milk insulin-like growth factors and related substances: mammary gland and neonatal (intestinal and systemic) targets. 2002 , 23, 101-10		85
130	Immunoglobulins, growth factors and growth hormone in bovine colostrum and the effects of processing. 2002 , 12, 879-887		128
129	Colostrum and its benefits: a review. 2002 , 22, 755-767		119
