Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
2311	Consistent pseudo-derivatives in meshless methods. <i>Computer Methods in Applied Mechanics and Engineering</i> , 1997 , 146, 371-386	5.7	105
2310	A three-dimensional explicit element-free galerkin method. 1997 , 24, 1253-1270		42
2309	Crack initiation and propagation in materials with randomly distributed holes. 1997 , 58, 395-420		42
2308	Convergence order estimates of meshless collocation methods using radial basis functions. 1998 , 8, 381-399		165
2307	EFG approximation with discontinuous derivatives. 1998 , 41, 1215-1233		139
2306	A least-squares approach for uniform strain triangular and tetrahedral finite elements. 1998 , 42, 1181-1197		16
2305	On the completeness of meshfree particle methods. 1998 , 43, 785-819		177
2304	The natural element method in solid mechanics. 1998 , 43, 839-887		459
2303	On the application of a meshless method to shear band problems. 1998 , 4, 847-851		
2302	An introduction to programming the meshless Element Free Galerkin method. 1998 , 5, 207-241		262
2301	An adaptive approach with the Element-Free-Galerkin method. <i>Computer Methods in Applied Mechanics and Engineering</i> , 1998 , 162, 203-222	5.7	46
2300	Element-Free Galerkin solutions for Helmholtz problems: fomulation and numerical assessment of the pollution effect. <i>Computer Methods in Applied Mechanics and Engineering</i> , 1998 , 162, 317-335	5.7	103
2299	Implementation of boundary conditions for meshless methods. <i>Computer Methods in Applied Mechanics and Engineering</i> , 1998 , 163, 205-230	5.7	114
2298	A fast boundary element algorithm for time-dependant potential problems. 1998 , 22, 183-196		4
2297	Element-free Galerkin method for electromagnetic field computations. 1998 , 34, 3236-3239		72
2296	Particle-in-cell and finite difference approaches for the study of marginal ice zone problems. 1998 , 28, 1-28		6
2295	Interactive visualization of particle systems.		2

2294	A meshless method for the solution of incompressible flow equations. 1998 , 7, 825-840	
2293	Perspective on Eulerian Finite Volume Methods for Incompressible Interfacial Flows. 1998 , 267-331	19
2292	On-road emission factors derived from measurements in a traffic tunnel. 1998 , 20, 147	42
2291	A unifying data structure for hierarchical methods. 1999 ,	2
2290	Finite-Point Simulation of Steady Shallow Water Flows. 1999 , 125, 621-630	3
2289	Meshless Galerkin methods using radial basis functions. 1999 , 68, 1521-1532	173
2288	Shape Design Optimization of Hyperelastic Structures Using a Meshless Method. 1999 , 37, 990-997	26
2287	Conditions for locking-free elasto-plastic analyses in the Element-Free Galerkin method. <i>Computer Methods in Applied Mechanics and Engineering</i> , 1999 , 173, 99-109	5-7 35
2286	Smoothing, enrichment and contact in the element-free Galerkin method. 1999 , 71, 173-195	112
2285	Computational structures technology: leap frogging into the twenty-first century. 1999 , 73, 1-31	21
2284	A Structural Nonlinear Analysis Workspace (SNAW) based on meshless methods. 1999 , 30, 153-175	16
2283	Two-dimensional linear elasticity by the boundary node method. 1999 , 36, 1129-1147	73
2282	Meshfree simulation of deforming domains. 1999 , 31, 459-471	58
2281	Solving differential equations with radial basis functions: multilevel methods and smoothing. 1999 , 11, 139-159	148
2280	C1 natural neighbor interpolant for partial differential equations. 1999 , 15, 417-447	57
2279	Convergence of corrected derivative methods for second-order linear partial differential equations. 1999 , 44, 177-203	3
2278	The Element Free Galerkin method for dynamic propagation of arbitrary 3-D cracks. 1999 , 44, 767-800	203
2277	Moving-least-squares-particle hydrodynamics□ Consistency and stability. 1999 , 44, 1115-1155	304

2276	Reproducing kernel hierarchical partition of unity, Part I: formulation and theory. 1999 , 45, 251-288	133
2275	Elastic crack growth in finite elements with minimal remeshing. 1999 , 45, 601-620	3041
2274	A three-dimensional element-free Galerkin elastic and elastoplastic formulation. 1999 , 46, 671-693	44
2273	The boundary node method for three-dimensional linear elasticity. 1999 , 46, 1163-1184	64
2272	Quantum Wave Packet Dynamics with Trajectories. 1999 , 82, 5190-5193	349
2271	Quantum wave packet dynamics with trajectories: Application to reactive scattering. 1999 , 111, 4406-4413	118
2270	Moving least square reproducing kernel method for electromagnetic field computation. 1999 , 35, 1372-1375	37
2269	Multiple scale meshfree methods for damage fracture and localization. 1999 , 16, 197-205	61
2268	Automated 3-D crack growth simulation. 2000 , 47, 229-253	120
2267	Efficient interfacing of fluid and structure for aeroelastic instability predictions. 2000 , 47, 705-728	0
2266	A point collocation method based on reproducing kernel approximations. 2000 , 47, 1083-1121	167
2265	One-dimensional dispersion analysis for the element-free Galerkin method for the Helmholtz equation. 2000 , 47, 1169-1188	26
2264	Results of von Neumann analyses for reproducing kernel semi-discretizations. 2000 , 47, 1285-1301	16
2263	Regularization of material instabilities by meshfree approximations with intrinsic length scales. 2000 , 47, 1303-1322	123
2262	Multi-scale methods. 2000 , 47, 1343-1361	45
2261	hp-Clouds in Mindlin's thick plate model. 2000 , 47, 1381-1400	63
2260	The generalized finite element method: an example of its implementation and illustration of its performance. 2000 , 47, 1401-1417	251
2259	Meshless method for linear elastostatics based on a path integral formulation. 2000 , 47, 1463-1480	7

2258	The boundary node method for three-dimensional problems in potential theory. 2000 , 47, 1523-1547	82
2257	Explicit and implicit meshless methods for linear advection-diffusion-type partial differential equations. 2000 , 48, 19-35	41
2256	Explicit form and efficient computation of MLS shape functions and their derivatives. 2000 , 48, 451-466	66
2255	An efficient linear-precision partition of unity basis for unstructured meshless methods. 2000 , 16, 239-255	12
2254	Treatment of point loads in element free Galerkin method (EFGM). 2000 , 16, 335-341	13
2253	Numerical simulations of strain localization in inelastic solids using mesh-free methods. 2000 , 48, 1285-1309	66
2252	A unified stability analysis of meshless particle methods. 2000 , 48, 1359-1400	288
2251	A new finite point generation scheme using metric specifications. 2000 , 48, 1423-1444	6
2250	Enrichment and coupling of the finite element and meshless methods. 2000 , 48, 1615-1636	150
2249	Surface remeshing by local hermite diffuse interpolation. 2000 , 49, 31-49	43
2248	Imposing essential boundary conditions in the natural element method by means of density-scaled shapes. 2000 , 49, 519-546	87
2247	Dispersion analysis and element-free Galerkin solutions of second- and fourth-order gradient-enhanced damage models. 2000 , 49, 811-832	88
2246	Simulating surface tension with smoothed particle hydrodynamics. 2000 , 33, 333-353	300
2245	SPH without a Tensile Instability. 2000 , 159, 290-311	527
2244	Some observations on the enforcement of constraint equations in the EFG method. 2000 , 16, 819-830	11
2243	Mesh-free simulations of shear banding in large deformation. 2000 , 37, 7185-7206	64
2242	Dynamic failure mechanics. 2000 , 37, 331-348	54
2241	Flexible translational joint analysis by meshless method. 2000 , 37, 5203-5217	1

2240	Evaluation of nearly singular integrals in boundary element contour and node methods for three-dimensional linear elasticity. 2000 , 37, 7633-7654		37
2239	Element-free galerkin methods for dynamic fracture in concrete. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2000 , 187, 385-399	5-7	133
2238	Computer implementation of damage models by finite element and meshfree methods. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2000 , 187, 401-440	5-7	48
2237	New boundary condition treatments in meshfree computation of contact problems. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2000 , 187, 441-468	5-7	182
2236	An improved reproducing kernel particle method for nearly incompressible finite elasticity. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2000 , 181, 117-145	5-7	81
2235	The finite difference method with arbitrary grids in the elastic static analysis of three-dimensional continua. 2000 , 75, 187-208		2
2234	Generalized finite element methods for three-dimensional structural mechanics problems. 2000 , 77, 215-232		416
2233	Explicit boundary element method for nonlinear solid mechanics using domain integral reduction. 2000 , 24, 707-713		3
2232	Discontinuous enrichment in finite elements with a partition of unity method. 2000 , 36, 235-260		287
2231	The design and analysis of the Generalized Finite Element Method. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2000 , 181, 43-69	5-7	624
2230	A generalized smoothed particle hydrodynamics method for nonlinear dynamic problems. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2000 , 190, 225-239	5-7	132
2229	Dispersion and pollution of meshless solutions for the Helmholtz equation. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2000 , 190, 639-657	5-7	53
2228	Modeling groundwater flow by the element-free Galerkin (EFG) method. 2000 , 4, 231-241		9
2227	LARGE SCALE COMPUTATIONAL MECHANICS: PRESENT AND FUTURE. 2000 , 2000, 1-15		1
2226	Finding Sets Covering a Point with Application to Mesh-Free Galerkin Methods. 2000 , 30, 1368-1383		4
2225	A Particle-Partition of Unity Method for the Solution of Elliptic, Parabolic, and Hyperbolic PDEs. 2000 , 22, 853-890		111
2224	The finite volume, finite element, and finite difference methods as numerical methods for physical field problems. 2000 , 113, 1-146		39
2223	Meshless analysis of steady-state electro-osmotic transport. 2000 , 9, 435-449		46

2222	Weak formulation of finite element method using wavelet basis functions. 2001 , 37, 3203-3207		9
2221	Element-free Galerkin method for contact problems in metal forming analysis. 2001 , 18, 62-78		59
2220	Node activation technique for finite element system. 2001 ,		
2219	Smoothed Particle Technique for Treatment Shocks in Transonic Aerodynamics. 2001 , 18,		
2218	Application of a meshless method in electromagnetics. 2001 , 37, 3198-3202		51
2217	Weighted Extended B-Spline Approximation of Dirichlet Problems. 2001 , 39, 442-462		156
2216	A parallel quadtree algorithm for efficient assembly of stiffness matrices in meshfree galerkin methods.		1
2215	Large Scale Discrete Element Modeling of Vehicle-Soil Interaction. 2001 , 127, 1027-1032		69
2214	Crack Propagation. 2001 , 1745-1749		
2213	VOXEL ANALYSIS OF GROUNDWATER FLOW FOR UNDERGROUND REPOSITORY PLANNING. 2001 , 2001, 155-168		2
2212	Physics-based modeling of brittle fracture: cohesive formulations and the application of meshfree methods. 2001 , 37, 99-166		119
2211	An improved hybrid particle-element method for hypervelocity impact simulation. 2001 , 26, 169-178		23
2210	ESFLIB: A library to compute the element free Galerkin shape functions. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2001 , 190, 2181-2205	5-7	20
2209	A generalized finite element method for the simulation of three-dimensional dynamic crack propagation. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2001 , 190, 2227-2262	5-7	269
2208	Discretization errors associated with reproducing kernel methods: one-dimensional domains. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2001 , 190, 2429-2446	5-7	12
2207	Shape sensitivity analysis and shape optimization in planar elasticity using the element-free Galerkin method. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2001 , 190, 4319-4337	5-7	56
2206	A meshfree contact-detection algorithm. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2001 , 190, 3271-3292	5-7	45
2205	A point interpolation method for simulating dissipation process of consolidation. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2001 , 190, 5907-5922	5-7	58

2204	Dynamic shear band propagation and micro-structure of adiabatic shear band. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2001 , 191, 73-92	5-7	72
2203	SPH elastic dynamics. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2001 , 190, 6641-6662	5-7	395
2202	Generalized mixed variational principles and solutions of ill-conditioned problems in computational mechanics: Part I. Volumetric locking. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2001 , 191, 407-422	5-7	10
2201	An augmented Lagrangian element-free (ALEF) approach for crack discontinuities. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2001 , 191, 941-957	5-7	18
2200	A digital systematization of meshfree method and its applications to elasto-plastic infinitesimal deformation analysis. 2001 , 32, 647-664		2
2199	The meshless hypersingular boundary node method for three-dimensional potential theory and linear elasticity problems. 2001 , 25, 639-653		17
2198	Solving the hydrodynamic formulation of quantum mechanics: A parallel MLS method. 2001 , 85, 263-271		10
2197	Natural neighbour Galerkin methods. 2001 , 50, 1-27		225
2196	Finite cloud method: a true meshless technique based on a fixed reproducing kernel approximation. 2001 , 50, 2373-2410		118
2195	The meshless standard and hypersingular boundary node methods—Applications to error estimation and adaptivity in three-dimensional problems. 2001 , 50, 2233-2269		27
2194	An improved partition of unity finite element model for diffraction problems. 2001 , 50, 2727-2740		70
2193	Die shape design optimization of sheet metal stamping process using meshfree method. 2001 , 51, 1385-1405		27
2192	Least-squares collocation meshless method. 2001 , 51, 1089-1100		161
2191	Locking in the incompressible limit for the element-free Galerkin method. 2001 , 51, 1361-1383		41
2190	Topological aspects of meshless methods and nodal ordering for meshless discretizations. 2001 , 52, 921-938		4
2189	The least-squares meshfree method. 2001 , 52, 997-1012		26
2188	Some recent issues in computational failure mechanics. 2001 , 52, 63-95		143
2187	Three-dimensional cohesive modeling of dynamic mixed-mode fracture. 2001 , 52, 97-120		164

2186	Imposition of essential boundary conditions by displacement constraint equations in meshless methods. 2001 , 17, 165-178	24
2185	On Meshless Collocation Approximations of Conservation Laws: Preliminary Investigations on Positive Schemes and Dissipation Models. 2001 , 81, 403-415	13
2184	Plane strain finite element analysis of pressure sensitive plasticity with strong discontinuity. 2001 , 38, 3647-3672	83
2183	Smoothed Particle Hydrodynamics Model for Diffusion through Porous Media. 2001 , 43, 441-471	80
2182	Towards an efficient meshless computational technique: the method of finite spheres. 2001 , 18, 170-192	47
2181	Analysis of shear flexible beams, using the meshless local Petrov-Galerkin method, based on a locking-free formulation. 2001 , 18, 215-240	25
2180	Lagrangian Meshfree Formulation for Analysis of Geotechnical Materials. 2001 , 127, 440-449	38
2179	Dissociation dynamics from a de BroglieBohm perspective. 2001 , 115, 10373	21
2178	Rational approximation with multidimensional scattered data. 2002 , 65, 035701	3
2177	. 2002 , 38, 741-744	27
2176	An Introduction to Moving Least Squares Meshfree Methods. 2002 , 11, 825-867	29
2175	A Modified Gaussian Integration Scheme in Element Free Method. 2002 , 18, 17-27

2134	Meshfree, probabilistic determination of point sets and support regions for meshless computing. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2002 , 191, 1349-1366	5-7 39
2133	A generalized finite-difference method based on minimizing global residual. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2002 , 191, 1421-1438	5-7 16

2132	An adaptive procedure based on background cells for meshless methods. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2002 , 191, 1923-1943	5-7	95
2131	Convergence and accuracy of the path integral approach for elastostatics. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2002 , 191, 2219-2247	5-7	3
2130	Modeling delamination as a strong discontinuity with the material point method. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2002 , 191, 2483-2507	5-7	43
2129	Boundary cloud method: a combined scattered point/boundary integral approach for boundary-only analysis. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2002 , 191, 2337-2370	5-7	46
2128	On the optimal shape parameters of radial basis functions used for 2-D meshless methods. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2002 , 191, 2611-2630	5-7	395
2127	Interface element method (IEM) for a partitioned system with non-matching interfaces. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2002 , 191, 3165-3194	5-7	43
2126	Meshless local boundary integral equation method for simply supported and clamped plates resting on elastic foundation. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2002 , 191, 5943-5959	5-7	24
2125	A simplified approach to enhance the performance of smooth particle hydrodynamics methods. 2002 , 126, 133-155		43
2124	Meshfree method for large deformation analysis: reproducing kernel particle approach. 2002 , 24, 543-551		88
2123	Analysis of rectangular laminated composite plates via FSDT meshless method. 2002 , 44, 1275-1293		75
2122	Modelling and simulation of the superelastic behaviour of shape memory alloys using the element-free Galerkin method. 2002 , 44, 2393-2413		30
2121	A point assembly method for stress analysis for two-dimensional solids. 2002 , 39, 261-276		45
2120	Mesh-free Galerkin simulations of dynamic shear band propagation and failure mode transition. 2002 , 39, 1213-1240		127
2119	Analysis of transient response of saturated porous elastic soil under cyclic loading using element-free Galerkin method. 2002 , 39, 6011-6033		28
2118	An evaluation of the MPM for simulating dynamic failure with damage diffusion. 2002 , 69, 1873-1890		52
2117	Higher-order strain/higher-order stress gradient models derived from a discrete microstructure, with application to fracture. 2002 , 69, 1907-1924		38
2116	Numerical modeling of size effects with gradient elasticity - Formulation, meshless discretization and examples. 2002 , 117, 347-358		73
2115	A hierarchical multi-physics model for design of high toughness steels. 2003 , 10, 99-142		53

2114	Concurrent Implementation of the Optimal Incremental Approximation Method for the Adaptive and Meshless Solution of Differential Equations. 2003 , 4, 271-289	2
2113	A Generalized (Meshfree) Finite Difference Discretization for Elliptic Interface Problems. 2003 , 488-497	8
2112	Bending analysis of mindlin-reissner plates by the element free galerkin method with penalty technique. 2003 , 17, 64-76	4
2111	Overview and recent advances in natural neighbour galerkin methods. 2003 , 10, 307-384	119
2110	Convergence of finite elements enriched with mesh-less methods. 2003 , 96, 43-59	11
2109	Numerical modelling of free-surface flows in ship hydrodynamics. 2003 , 43, 465-481	6
2108	On the imposition of essential boundary conditions in natural neighbour Galerkin methods. 2003 , 19, 361-376	21
2107	Locking in the incompressible limit: pseudo-divergence-free element free Galerkin. 2003 , 19, 725-735	20
2106	A new approach for calculating strain for particulate media. 2003 , 27, 859-877	64
2105	A fast boundary cloud method for exterior 2D electrostatic analysis. 2003 , 56, 239-260	11
2104	Adaptive crack propagation analysis with the element-free Galerkin method. 2003 , 56, 331-350	32
2103	Blurred derivatives and meshless methods. 2003 , 56, 295-324	3
2102	A reproducing kernel method with nodal interpolation property. 2003 , 56, 935-960	70
2101	Mesh independent modelling of cracks by using higher order shape functions. 2003 , 56, 869-882	82
2100	Time accurate consistently stabilized mesh-free methods for convection dominated problems. 2003 , 56, 1225-1242	9
2099	An improved crack analysis technique by element-free Galerkin method with auxiliary supports. 2003 , 56, 1291-1314	11
2098	A gradient-based adaptation procedure and its implementation in the element-free Galerkin method. 2003 , 56, 1335-1354	9
2097	Simulation of high velocity concrete fragmentation using SPH/MLSPH. 2003 , 56, 1421-1444	174

2096	Arbitrary placement of local meshes in a global mesh by the interface-element method (IEM). 2003 , 56, 2279-2312	14
2095	A computational model for impact failure with shear-induced dilatancy. 2003 , 56, 1979-1997	26
2094	Voronoi cell finite difference method for the diffusion operator on arbitrary unstructured grids. 2003 , 57, 1-34	60
2093	Meshless local boundary integral equation method for 2D elastodynamic problems. 2003 , 57, 235-249	35
2092	Simultaneous surface and tetrahedron mesh adaptation using mesh-free techniques. 2003 , 57, 371-389	22
2091	A collocation meshless method based on local optimal point interpolation. 2003 , 57, 509-536	3
2090	A spline strip kernel particle method and its application to two-dimensional elasticity problems. 2003 , 57, 599-616	24
2089	A modified element-free Galerkin method with essential boundary conditions enforced by an extended partition of unity finite element weight function. 2003 , 57, 1523-1552	12
2088	An iterative defect-correction type meshless method for acoustics. 2003 , 57, 2131-2146	13
2087	A meshfree method for incompressible fluid dynamics problems. 2003 , 58, 127-158	18
2086	A Gaussian sinc-collocation approach for a whipping cantilever with a follower shear force at its tip. 2003 , 58, 869-892	2
2085	New crack-tip elements for XFEM and applications to cohesive cracks. 2003 , 57, 2221-2240	386
2084	Mesh-free analysis of cracks in isotropic functionally graded materials. 2003 , 70, 1-27	153
2083	A combined approach of EFGM and precise algorithm in time domain solving viscoelasticity problems. 2003 , 40, 701-714	19
2082	A meshfree method for transverse vibrations of anisotropic plates. 2003 , 40, 5229-5249	9
2081	Functional integral formulation of classical wave equations. 2003 , 261, 819-837	1
2080	A new hybrid meshless-differential order reduction (hM-DOR) method with applications to shape control of smart structures via distributed sensors/actuators. 2003 , 25, 141-154	16
2079	A mesh-based partition of unity method for discontinuity modeling. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2003 , 192, 1515-1532	5-7 64

2078	Interface element method: Treatment of non-matching nodes at the ends of interfaces between partitioned domains. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2003 , 192, 1841-1858	5-7	15
2077	Development of simplified dynamic models using optimization: Application to crushed tubes. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2003 , 192, 2073-2097	5-7	5
2076	Coupling of the mesh-free finite cloud method with the boundary element method: a collocation approach. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2003 , 192, 2355-2375	5-7	20
2075	Two gradient plasticity theories discretized with the element-free Galerkin method. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2003 , 192, 2377-2403	5-7	57
2074	A matrix triangularization algorithm for the polynomial point interpolation method. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2003 , 192, 2269-2295	5-7	30
2073	A nodal integration and post-processing technique based on Voronoi diagram for Galerkin meshless methods. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2003 , 192, 3831-3843	5-7	14
2072	Meshless analysis of Timoshenko beams based on a locking-free formulation and variational approaches. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2003 , 192, 4403-4424	5-7	10
2071	Meshless LBIE formulations for simply supported and clamped plates under dynamic load. 2003 , 81, 1643-1651		31
2070	Improved sensitivity analysis by a coupled FEBFG method. 2003 , 81, 2431-2439		12
2069	On the utilization of the reproducing kernel particle method for the numerical simulation of plane strain rolling. 2003 , 43, 89-102		19
2068	A grain level model for the study of failure initiation and evolution in polycrystalline brittle materials. Part I: Theory and numerical implementation. 2003 , 35, 333-364		286
2067	The penalty boundary method. 2003 , 39, 387-401		14
2066	The application of interpolating MLS approximations to the analysis of MHD flows. 2003 , 39, 1173-1187		27
2065	Overlapping domain decomposition method by radial basis functions. 2003 , 44, 241-255		71
2064	Natural element meshless simulation of flows involving short fiber suspensions. 2003 , 115, 51-78		44
2063	A review of techniques, advances and outstanding issues in numerical modelling for rock mechanics and rock engineering. 2003 , 40, 283-353		652
2062	Application of local boundary integral equation method into micropolar elasticity. 2003 , 27, 81-90		13
2061	A boundary cloud method with a cloud-by-cloud polynomial basis. 2003 , 27, 57-71		25

2060	The meshless regular hybrid boundary node method for 2D linear elasticity. 2003 , 27, 259-268	49
2059	Transient effect of a free particle wave packet in the hydrodynamic formulation of the time-dependent Schrödinger equation. 2003 , 94, 1-6	3
2058	Anwendung der Materialpunktmethode für die numerische Simulation von Kaschierprozessen. 2003 , 2, 258-259	
2057	The partition of unity quadrature in element-free crack modelling. 2003 , 81, 1783-1794	16
2056	A radial boundary node method for two-dimensional elastic analysis. 2003 , 27, 853-862	5
2055	Analysis of composite plates using higher-order shear deformation theory and a finite point formulation based on the multiquadric radial basis function method. 2003 , 34, 627-636	213
2054	New Methods for Discontinuity and Crack Modeling in EFG. 2003 , 37-50	9
2053	Coupling Finite Elements and Particles for Adaptivity: An Application to Consistently Stabilized Convection-Diffusion. 2003 , 117-129	3
2052	An Adaptivity Procedure Based on the Gradient of Strain Energy Density and its Application in Meshless Methods. 2003 , 267-279	8
2051	A New Meshless Method [Finite-Cover Based Element Free Method. 2003 , 359-371	3
2050	LPRH [Local Polynomial Regression Hydrodynamics. 2003 , 389-400	
2049	On Multigrid Methods for Generalized Finite Element Methods. 2003 , 401-418	8
2048	Thick Composite Beam Analysis Using a Global Meshless Approximation Based on Radial Basis Functions. 2003 , 10, 271-284	109
2047	A meshless formulation for geodynamic modeling. 2003 , 108,	14
2046	Transient heat conduction analysis in functionally graded materials by the meshless local boundary integral equation method. 2003 , 28, 494-504	125
2045	Efficient mixed-domain analysis of electrostatic MEMS. 2003 , 22, 1228-1242	35
2044	A new method for solving the quantum hydrodynamic equations of motion. 2003 , 119, 5805-5817	89
2043	Meshfree particle method. 2003 ,	0

2042	Displacement Welding Technique for Coupled Analysis of Independently Modeled Finite Element Substructures. 2003 ,	
2041	HEAT TRANSFER ANALYSIS OF TWO-DIMENSIONAL FINS USING MESHLESS ELEMENT FREE GALERKIN METHOD. 2003 , 44, 73-84	62
2040	Generalized finite-element method for magnetized nanoparticles. 2003 , 39, 1436-1439	18
2039	Element-Free Galerkin Implementation of Gradient Plasticity. Part I: Formulation and Application to 1D Strain Localization. 2003 , 14, 199-232	4
2038	Mesh-less method for homogeneous handling of fiber-fluid interactions. 2003 , 2067-2070	
2037	Element-Free Galerkin Implementation of Gradient Plasticity. Part II: Applications to 2D Strain Localization and Size Effects. 2003 , 14, 233-254	4
2036	Interpolation naturelle sur les domaines non convexes par l'utilisation du diagramme de Voronoï contraint. 2003 , 12, 487-509	8
2035	A novel true meshless numerical technique (hM-DOR method) for the deformation control of circular plates integrated with piezoelectric sensors/actuators. 2003 , 12, 955-961	13
2034	The penalty boundary method for combining meshes and solid models in finite element analysis. 2003 , 20, 344-365	3
2033	Toward structure-function relations [A hybrid quantum/classical approach. 2003 , 42, 35-66	2
2032	THE MESHLESS APPROACH FOR THE CELL METHOD: A NEW WAY FOR THE NUMERICAL SOLUTION OF DISCRETE CONSERVATION LAWS. 2003 , 04, 869-880	2
2031	Numerical simulation of three-dimensional steady-state rolling by the reproducing kernel particle method. 2003 , 20, 855-874	5
2030	. 2003 ,	501
2029	Ultimate Strength. 2003 , 265-328	3
2028	Novel Discretization Concepts. 2003 , 377-425	6
2027	Comparing Solution Methods for Dynamic Equilibrium Economies. 2003 ,	6
2026	. 2004 ,	429
2025	Interpolating and approximating implicit surfaces from polygon soup. 2004 , 23, 896-904	105

2024	Static and dynamic analysis of 2-D functionally graded elasticity by using meshless local petrov-galerkin method. 2004 , 27, 491-503	43
2023	Interpolating and approximating implicit surfaces from polygon soup. 2004 ,	55
2022	3D scattered data approximation with adaptive compactly supported radial basis functions.	18
2021	Hybrid techniques for electrostatic analysis of nanoelectromechanical systems. 2004 , 96, 2221-2231	13
2020	A meshless local boundary integral equation method for heat conduction analysis in nonhomogeneous solids. 2004 , 27, 517-539	7
2019	Simulation of Interface Cracking in Piezoelectric Layers. 2004 , 5,	6
2018	Peridynamic Modeling of Impact Damage. 2004 , 197	33
2017	Source region contracting method for EEG source reconstructions. 2004 , 40, 1128-1131	2
2016	SOLVING TRANSIENT HEAT CONDUCTION PROBLEMS WITH CYCLIC SYMMETRY VIA A PARALLELED EFGM AND A PRECISE ALGORITHM. 2004 , 46, 479-495	6
2015	Analysis of microelectromechanical systems (mems) by meshless local kriging (lokriging) method. 2004 , 27, 573-583	12
2014	Pseudo elastic analysis of material non-linear problems using element free Galerkin method. 2004 , 27, 505-516	8
2013	A local BIEM for analysis of transient heat conduction with nonlinear source terms in FGMs. 2004 , 28, 1-11	27
2012	Meshless method for numerical modeling of pulsed eddy currents. 2004 , 40, 3457-3462	10
2011	Investigations on reproducing kernel particle method enriched by partition of unity and visibility criterion. 2004 , 34, 310	5
2010	Meshless method based on collocation with consistent compactly supported radial basis functions. 2004 , 20, 551-557	8
2009	Application of meshless EFG method in fluid flow problems. 2004 , 29, 285-296	2
2008	Meshfree method for 3D bulk forming analysis with lower order integration scheme. 2004 , 28, 1283-1292	7
2007	A numerical solution of composite heat transfer problems using meshless method. 2004 , 47, 2123-2138	65

2006	Dynamic analysis of laminated composite plates with piezoelectric sensor/actuator patches using the FSDT mesh-free method. 2004 , 46, 411-431	37
2005	Enriched partition-of-unity finite element method for stress intensity factors at crack tips. 2004 , 82, 445-461	22
2004	Development of a EFG formulation for damage analysis of reinforced concrete beams. 2004 , 82, 1503-1511	4
2003	Numerical prediction of crack propagation by an enhanced element-free Galerkin method. 2004 , 227, 257-271	16
2002	Manipulation of bioparticles using traveling wave dielectrophoresis: numerical approach. 2004 , 1, 115-130	8
2001	Structural optimization complexity: what has Moore's law done for us?. 2004 , 28, 375-387	91
2000	Modified moving particle semi-implicit meshless method for incompressible fluids. 2004 , 13, 226-234	1
1999	Analysis of the pseudoelastic behavior of a SMA beam by the element-free Galerkin method. 2004 , 28, 497-507	27
1998	A Wachspress Meshless Local Petrov-Galerkin method. 2004 , 28, 509-523	5
1997	The regular hybrid boundary node method for three-dimensional linear elasticity. 2004 , 28, 525-534	32
1996	A mesh-free method for static and free vibration analysis of shear deformable laminated composite plates. 2004 , 269, 633-652	105
1995	Wave-induced seabed response analysis by radial point interpolation meshless method. 2004 , 31, 21-42	24
1994	Coupling Meshfree Methods and FEM for the Solution of the Incompressible Navier-Stokes Equations. 2004 , 4, 700-701	2
1993	Least-squares meshfree method for incompressible Navier-Stokes problems. 2004 , 46, 263-288	12
1992	The use of cyclic symmetry in two-dimensional elastic analysis by the element-free Galerkin method. 2004 , 21, 83-95	6
1991	Application of radial basis meshless methods to direct and inverse biharmonic boundary value problems. 2004 , 21, 169-182	21
1990	Algebraic multigrid (AMG) for saddle point systems from meshfree discretizations. 2004 , 11, 293-308	15
1989	Mesh-free simulation of ductile fracture. 2004 , 60, 1425-1450	19

1988	On the Galerkin formulation of the smoothed particle hydrodynamics method. 2004 , 60, 1475-1512	27
1987	Numerical integration in Natural Neighbour Galerkin methods. 2004 , 60, 2077-2104	45
1986	A three-dimensional computational procedure for reproducing meshless methods and the finite element method. 2004 , 61, 896-927	6
1985	Conforming polygonal finite elements. 2004 , 61, 2045-2066	313
1984	Cracking particles: a simplified meshfree method for arbitrary evolving cracks. 2004 , 61, 2316-2343	964
1983	An ellipsoidal particle finite element method for hypervelocity impact simulation. 2004 , 59, 737-753	13
1982	Meshless analysis of potential problems in three dimensions with the hybrid boundary node method. 2004 , 59, 1147-1166	61
1981	Meshfree implementation for the real-space electronic-structure calculation of crystalline solids. 2004 , 59, 1909-1923	9
1980	A meshless method with enriched weight functions for fatigue crack growth. 2004 , 59, 1945-1961	106
1979	A fast boundary cloud method for 3D exterior electrostatic analysis. 2004 , 59, 2019-2046	3
1978	Node-by-node parallel finite elements: a virtually meshless method. 2004 , 60, 69-102	26
1977	Stabilized conforming nodal integration in the natural-element method. 2004 , 60, 861-890	143
1976	Moving particle finite element method with global smoothness. 2004 , 59, 1007-1020	25
1975	Domain decomposition for radial basis meshless methods. 2004 , 20, 450-462	64
1974	Optimal shape profiles for cooling fins of high and low conductivity. 2004 , 47, 4953-4966	40
1973	Constructive solid analysis: a hierarchical, geometry-based meshless analysis procedure for integrated design and analysis. 2004 , 36, 473-486	60
1972	Numerical analysis of high speed concrete fragmentation using a meshfree Lagrangian method. 2004 , 71, 547-556	86
1971	Evaluation of the amount of crack growth in 2D LEFM problems. 2004 , 71, 1403-1419	6

1970	Meshless analysis of plasticity with application to crack growth problems. 2004 , 41, 83-94		15
1969	Induced anisotropy in foams forming processes: modelling and simulation. 2004 , 155-156, 1482-1488		6
1968	Numerical methods for high dimensional Hamilton-Jacobi equations using radial basis functions. 2004 , 196, 327-347		111
1967	Application of the element free Galerkin method to the simulation of plane strain rolling. 2004 , 23, 77-93		21
1966	Numerical analysis of prestressed concrete beams using a coupled element free Galerkin/finite element approach. 2004 , 41, 1061-1080		53
1965	Modeling and simulation of intersonic crack growth. 2004 , 41, 1773-1799		57
1964	A strain-difference-based nonlocal elasticity model. 2004 , 41, 2383-2401		54
1963	A p-type solution for the bending of rectangular, circular, elliptic and skew plates. 2004 , 41, 3977-3997		18
1962	Finite point solver for the simulation of 2-D laminar incompressible unsteady flows. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2004 , 193, 825-848	5:7	24
1961	Stable particle methods based on Lagrangian kernels. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2004 , 193, 1035-1063	5:7	347
1960	Locking-free stabilized conforming nodal integration for meshfree Mindlin-Reissner plate formulation. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2004 , 193, 1065-1083	5:7	147
1959	Positivity conditions in meshless collocation methods. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2004 , 193, 1171-1202	5:7	56
1958	Dynamically knots setting in meshless method for solving time dependent propagations equation. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2004 , 193, 1221-1229	5:7	29
1957	Imposing essential boundary conditions in mesh-free methods. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2004 , 193, 1257-1275	5:7	298
1956	Multi-scale constitutive model and computational framework for the design of ultra-high strength, high toughness steels. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2004 , 193, 1865-1908	5:7	96
1955	An implicit gradient model by a reproducing kernel strain regularization in strain localization problems. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2004 , 193, 2827-2844	5:7	62
1954	Development of a novel meshless Local Kriging (LoKriging) method for structural dynamic analysis. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2004 , 193, 2599-2619	5:7	54
1953	A variation of local point interpolation method (vLPIM) for analysis of microelectromechanical systems (MEMS) device. 2004 , 28, 1261-1270		7

1952	A meshless local natural neighbour interpolation method for stress analysis of solids. 2004 , 28, 607-613	26
1951	An extended boundary node method for modeling normal derivative discontinuities in potential theory across edges and corners. 2004 , 28, 1099-1110	9
1950	Fatigue crack growth analysis by an enriched meshless method. 2004 , 168, 155-164	52
1949	Discretization schemes and numerical approximations of PDE impainting models and a comparative evaluation on novel real world MRI reconstruction applications.

1722	Discrete Element Methods. 2007,	0
1721	The Least-Squares Meshfree Finite Element Method. 2007, 341-341	
1720	A Variational Mesh-Free Method Based on Discretization via Directional Derivatives. 2007, 340-340	
1719	Numerical Methods for Shocks in Solids. 2007, 275-319	

1718 A Meshless BEM for 2-D Stress Analysis in Linear Elastic FGMs. **2007**, 105-119

1717 Comparison of Meshless FEM and Conventional FEM for Solving ECG Forward Problem: A Simulation Study. **2007**,

1716 Gridless simulations of splashing processes and near-shore bore propagation. **2007**, 591, 183-213 50

1715 Moving Least-Square Basis for Band-Structure Calculations of Natural and Artificial Crystals. **2007**, 163-205

1714 Simulation of incompressible flows around moving bodies using meshless finite differencing. **2007**, 6, 293-313

1713 Energy-based simulation of concrete cracking using an improved mixed-mode cohesive crack model within a meshless discretization. **2007**, 31, 285-305 13

1712 Boundary element-free method for fracture analysis of 2-D anisotropic piezoelectric solids. **2007**, 69, 729-749 33

1711 A temperature-related homogenization technique and its implementation in the meshfree particle method for nanoscale simulations. **2007**, 69, 2099-2125 30

1710 Clustered generalized finite element methods for mesh unrefinement, non-matching and invalid meshes. **2007**, 69, 2409-2440 8

1709 Complex variable moving least-squares method: a meshless approximation technique. **2007**, 70, 46-70 74

1708 Umbrella spherical integration: a stable meshless method for non-linear solids. **2007**, 69, 2807-2847 6

1707 Overview and construction of meshfree basis functions: from moving least squares to entropy approximants. **2007**, 70, 181-205 82

1706 A bridging domain and strain computation method for coupled atomistic-continuum modelling of solids. **2007**, 70, 913-933 65

1705 A fast high-resolution algorithm for linear convection problems: particle transport method. **2007**, 70, 655-684 14

1704 A meshless method for axi-symmetric poroelastic simulations: numerical study. **2007**, 70, 1346-1365 19

1703 A natural neighbour-based moving least-squares approach for the element-free Galerkin method. **2007**, 71, 224-252 12

1702 XFEM-based crack detection scheme using a genetic algorithm. **2007**, 71, 1051-1080 71

1701 A natural neighbour method for linear elastic problems based on Fraeijis de Veubeke variational principle. **2007**, 71, 1081-1101 3

1700	A consistent partly cracked XFEM element for cohesive crack growth. 2007 , 72, 464-485		51
1699	CAD inspired hierarchical partition of unity constructions for NURBS-based, meshless design, analysis and optimization. 2007 , 72, 1452-1489		28
1698	Adaptive multiresolution refinement with distance fields. 2007 , 72, 1355-1386		6
1697	A Cartesian-grid collocation method based on radial-basis-function networks for solving PDEs in irregular domains. 2007 , 23, 1192-1210		20
1696	Comparison of adjoint-based and feature-based grid adaptation for functional outputs. 2007 , 53, 1541-1569		18
1695	A new meshless collocation method for partial differential equations. 2007 , 24, 1617-1639		8
1694	Free vibration analysis of plates using least-square-based finite difference method. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2007 , 196, 1330-1343	5-7	24
1693	Modeling dislocation by coupling Peierls-Nabarro and element-free Galerkin methods. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2007 , 196, 1915-1923	5-7	33
1692	Influence graphs and the generalized finite difference method. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2007 , 196, 1933-1945	5-7	12
1691	Orbital HP-Clouds for solving Schrödinger equation in quantum mechanics. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2007 , 196, 3693-3705	5-7	13
1690	Analysis of 3D solids using the natural neighbour radial point interpolation method. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2007 , 196, 2009-2028	5-7	106
1689	A meshless, compositional approach to shape optimal design. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2007 , 196, 2130-2146	5-7	22
1688	Extended parametric meshless Galerkin method. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2007 , 196, 2229-2241	5-7	4
1687	Nonlinear analysis of corrugated plates using a FSDT and a meshfree method. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2007 , 196, 2358-2376	5-7	66
1686	Meshless local Petrov-Galerkin (MLPG) method for Reissner-Mindlin plates under dynamic load. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2007 , 196, 2681-2691	5-7	28
1685	Meshfree point collocation method for the stream-vorticity formulation of 2D incompressible Navier-Stokes equations. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2007 , 196, 3095-3109	5-7	20
1684	FPM computations of glass cooling with radiation. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2007 , 196, 4656-4671	5-7	11
1683	Nonlinear analysis of plates and laminates using the element free Galerkin method. 2007 , 78, 337-350		43

1682	Corrective meshless particle formulations for time domain Maxwell's equations. 2007 , 210, 34-46	14
1681	Local boundary integral equations for orthotropic shallow shells. 2007 , 44, 2285-2303	13
1680	Analyzing the 2D fracture problems via the enriched boundary element-free method. 2007 , 44, 4220-4233	52
1679	Development of parallel 3D RKPM meshless bulk forming simulation system. 2007 , 38, 87-101	13
1678	Weighted extended b-splines for one-dimensional electromagnetic problems. 2007 , 190, 1125-1135	8
1677	A mesh-free simulation of cracking and failure using the cohesive segments method. 2007 , 45, 541-553	28
1676	A meshless method for stress-wave propagation in anisotropic and cracked media. 2007 , 45, 601-616	13
1675	Modeling and simulation of osteoporosis and fracture of trabecular bone by meshless method. 2007 , 45, 329-338	13
1674	Reproducing kernel collocation method applied to the non-linear dynamics of pipe whip in a plane. 2007 , 34, 1637-1654	6
1673	Modeling interfacial debonding and matrix cracking in fiber reinforced composites by the extended Voronoi cell FEM. 2007 , 43, 397-410	42
1672	Numerical simulation on solidification and thermal stress of continuous casting billet in mold based on meshless methods. 2007 , 466, 71-78	28
1671	Solidification modeling in continuous casting by finite point method. 2007 , 192-193, 511-517	31
1670	Singular and regular implementations of the hybrid boundary node method. 2007 , 12, 509-519	0
1669	Hybrid Boundary Integral-Generalized (Partition of Unity) Finite-Element Solvers for the Scalar Helmholtz Equation. 2007 , 43, 1002-1012	14
1668	Element-Free Galerkin Modeling of Electromagnetic Phenomena in Ferromagnetic Deformable Bodies. 2007 , 43, 1285-1288	
1667	A Meshless Method for Electromagnetic Field Computation Based on the Multiquadric Technique. 2007 , 43, 1281-1284	37
1666	An Improved Multiquadric Collocation Method for 3-D Electromagnetic Problems. 2007 , 43, 1509-1512	24
1665	An Approach to the Electrical Resistance Tomography Based on Meshless Methods. 2007 , 43, 1717-1720	7

1664	A paralleled element-free Galerkin analysis for structures with cyclic symmetry. 2007 , 23, 137-144	17
1663	A comparison of numerical integration rules for the meshless local Petrov-Galerkin method. 2007 , 45, 61-74	23
1662	Evaluation of fracture parameters in continuously nonhomogeneous piezoelectric solids. 2007 , 145, 313-326	36
1661	Characterizing soil properties by the meshless local Petrov-Galerkin method. 2007 , 25, 473-486	1
1660	Atomic functions: Generalization to the multivariable case and promising applications. 2007 , 43, 893-911	10
1659	Contact Analysis for Solids Based on Linearly Conforming Radial Point Interpolation Method. 2007 , 39, 537-554	51
1658	A Meshfree Method based on the Local Partition of Unity for Cohesive Cracks. 2007 , 39, 743-760	239
1657	A Smoothed Finite Element Method for Mechanics Problems. 2007 , 39, 859-877	597
1656	Analysis of Microelectromechanical Systems (MEMS) Devices by the Meshless Point Weighted Least-squares Method. 2007 , 40, 1-11	16
1655	A NURBS-based Error Reproducing Kernel Method with Applications in Solid Mechanics. 2007 , 40, 127-148	13
1654	Extended meshfree methods without branch enrichment for cohesive cracks. 2007 , 40, 367-382	144
1653	A comparative study of three BEM for transient dynamic crack analysis of 2-D anisotropic solids. 2007 , 40, 753-769	25
1652	The intrinsic partition of unity method. 2007 , 40, 803-814	18
1651	A regularized least-squares radial point collocation method (RLS-RPCM) for adaptive analysis. 2007 , 40, 837-853	32
1650	An improved finite point method for tridimensional potential flows. 2007 , 40, 949-963	36
1649	A gradient smoothing method (GSM) with directional correction for solid mechanics problems. 2007 , 41, 457-472	34
1648	Control synthesis for a class of nonlinear systems based on partition of unity. 2007 , 5, 145-151	1
1647	Trefftz-Based Methods for Time-Harmonic Acoustics. 2007 , 14, 343-381	76

1646	Meshless methods: A review and computer implementation aspects. 2008 , 79, 763-813	778
1645	A survey of the extended finite element. 2008 , 86, 1141-1151	143
1644	Analysis of plates and laminates using the natural neighbour radial point interpolation method. 2008 , 32, 267-279	86
1643	An EFG method for the nonlinear analysis of plates undergoing arbitrarily large deformations. 2008 , 32, 494-511	16
1642	Quasi-Monte Carlo mesh-free integration for meshless weak formulations. 2008 , 32, 471-479	13
1641	Waterjet penetration simulation by hybrid code of SPH and FEA. 2008 , 35, 1035-1042	48
1640	Atomic radial basis functions in numerical algorithms for solving boundary-value problems for the Laplace equation. 2008 , 44, 603-615	3
1639	Meshless approximation combined with implicit topology description for optimization of continua. 2008 , 36, 347-353	30
1638	Application research on metal rheological forming of reproducing kernel partial method. 2008 , 15, 215-220	
1637	A proposal to deal with contact and friction by blending meshfree and finite element methods in forming processes. 2008 , 1, 177-188	7
1636	Meshless numerical method based on tensor product. 2008 , 2, 166-171	
1635	Topology synthesis of geometrically nonlinear compliant mechanisms using meshless methods. 2008 , 21, 51-61	6
1634	Local integral equation method for viscoelastic ReissnerMindlin plates. 2008 , 41, 759-768	9
1633	Improved boundary tracking in meshless simulations of free-surface flows. 2008 , 42, 467-479	6
1632	Fracture analysis of cracks in magneto-electro-elastic solids by the MLPG. 2008 , 42, 697-714	60
1631	Mesh free Galerkin method based on natural neighbors and conformal mapping. 2008 , 42, 885-905	10
1630	Multiscale simulation of nanostructures based on spatial secant model: a discrete hyperelastic approach. 2008 , 42, 557-567	1
1629	Adaptive coupled arbitrary LagrangianEulerian finite element and meshfree method for injection molding process. 2008 , 73, 1153-1180	16

1628	A method for calculating meshless finite difference weights. 2008 , 74, 321-336	3
1627	A Hermite reproducing kernel approximation for thin-plate analysis with sub-domain stabilized conforming integration. 2008 , 74, 368-390	85
1626	Discrete gradient method in solid mechanics. 2008 , 74, 619-641	7
1625	Convergence and stabilization of stress-point integration in mesh-free and particle methods. 2008 , 74, 1067-1087	37
1624	Implicit boundary method for finite element analysis using non-conforming mesh or grid. 2008 , 74, 1421-1447	37
1623	A new crack tip element for the phantom-node method with arbitrary cohesive cracks. 2008 , 75, 577-599	176
1622	Application of the higher-order Cauchy-Born rule in mesh-free continuum and multiscale simulation of carbon nanotubes. 2008 , 75, 1238-1258	48
1621	An SPH shell formulation for plasticity and fracture analysis in explicit dynamics. 2008 , 76, 949-971	50
1620	Conservation properties of the bridging domain method for coupled molecular/continuum dynamics. 2008 , 76, 278-294	43
1619	Meshfree simulation of failure modes in thin cylinders subjected to combined loads of internal pressure and localized heat. 2008 , 76, 1159-1184	14
1618	Implicit boundary method for analysis using uniform B-spline basis and structured grid. 2008 , 76, 1993-2028	28
1617	A singular-value decomposition (SVD)-based generalized finite difference (GFD) method for close-interaction moving boundary flow problems. 2008 , 76, 1892-1929	16
1616	Locally enhanced Voronoi cell finite element model (LE-VCFEM) for simulating evolving fracture in ductile microstructures containing inclusions. 2008 , 76, 1955-1992	18
1615	On the smoothed finite element method. 2008 , 76, 1285-1295	11
1614	Completeness, conservation and error in SPH for fluids. 2008 , 56, 37-62	48
1613	Numerical simulations of viscous flows using a meshless method. 2008 , 58, 727-741	8
1612	A gradient smoothing method (GSM) for fluid dynamics problems. 2008 , 58, 1101-1133	49
1611	Divergence-constrained moving least squares for fluid simulation. 2008 , 19, 469-477	4

1610	The two-level element free Galerkin method for MHD flow at high Hartmann numbers. 2008 , 372, 5625-5638		16
1609	On certain (block) Toeplitz matrices related to radial functions. 2008 , 428, 508-519		2
1608	Simulation of Stokes flow over microelectrodes with least-squares meshfree method. 2008 , 16, 294-314		8
1607	The meshless method for a two-dimensional parabolic problem with a source parameter. 2008 , 202, 730-737		8
1606	On a multi-scale element-free Galerkin method for the Stokes problem. 2008 , 203, 745-753		32
1605	Analyzing 2D fracture problems with the improved element-free Galerkin method. 2008 , 32, 241-250		104
1604	Discontinuous modelling of shear bands using adaptive meshfree methods. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2008 , 197, 641-658	5-7	126
1603	Boundary locking induced by penalty enforcement of essential boundary conditions in mesh-free methods. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2008 , 197, 1167-1183	5-7	20
1602	Multiscale coupling schemes spanning the quantum mechanical, atomistic forcefield, and continuum regimes. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2008 , 197, 3190-3202	5-7	20
1601	A study of point moving adaptivity in gridless method. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2008 , 197, 1926-1937	5-7	13
1600	Application of the natural element method to finite deformation inelastic problems in isotropic and fiber-reinforced biological soft tissues. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2008 , 197, 1983-1996	5-7	14
1599	Concurrent quantum/continuum coupling analysis of nanostructures. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2008 , 197, 3291-3323	5-7	19
1598	The buckling of single-walled carbon nanotubes upon bending: The higher order gradient continuum and mesh-free method. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2008 , 197, 3001-3013	5-7	83
1597	Development of three-dimensional interface elements for coupling of non-matching hexahedral meshes. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2008 , 197, 3870-3882	5-7	20
1596	Finite pointset method for simulation of the liquid-liquid flow field in an extractor. 2008 , 32, 2946-2957		44
1595	Application of web-spline method in electromagnetics. 2008 , 62, 163-173		8
1594	Analysis of anchor bolt pullout in concrete by the element-free Galerkin method. 2008 , 30, 3574-3586		12
1593	A gradient smoothing method (GSM) based on strong form governing equation for adaptive analysis of solid mechanics problems. 2008 , 44, 889-909		23

1592	Dynamic 3D axisymmetric problems in continuously non-homogeneous piezoelectric solids. 2008 , 45, 4523-4542	23
1591	Dealing with extremely large deformation by Nearest-Nodes FEM with algorithm for updating element connectivity. 2008 , 45, 5074-5087	10
1590	Error estimates for the finite point method. 2008 , 58, 884-898	78
1589	Direct numerical simulation of particle collisions in two-phase flows with a meshless method. 2008 , 63, 3474-3484	3
1588	Meshless analysis of heat transfer due to viscous dissipation in polymer flow. 2008 , 32, 41-51	8

479	A high-order meshless Galerkin method for semilinear parabolic equations on spheres. 2019 , 142, 383-419	3
478	Weak impositions of Dirichlet boundary conditions in solid mechanics: A critique of current approaches and extension to partially prescribed boundaries. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2019 , 348, 632-659	5-7 6
477	A gradient reproducing kernel collocation method for high order differential equations. 2019 , 64, 1421-1454	15

476	Large deformation analysis of 2D hyperelastic bodies based on the compressible nonlinear elasticity: A numerical variational method. 2019 , 116, 39-54	14
475	Mixed multiscale three-node triangular elements for incompressible elasticity. 2019 , 36, 2859-2886	2
474	Localization analysis of nonlocal models with damage-dependent nonlocal interaction. 2019 , 174-175, 1-17	5
473	An Eulerian-Lagrangian mixed discrete least squares meshfree method for incompressible multiphase flow problems. 2019 , 76, 193-224	2
472	Analysis of three-dimensional interior acoustic fields by using the localized method of fundamental solutions. 2019 , 76, 122-132	27
471	Element-free Galerkin scaled boundary method based on moving Kriging interpolation for steady heat conduction analysis. 2019 , 106, 440-451	11
470	Macroscopic relations for microscopic properties at the interface between solid substrates and dense fluids. 2019 , 150, 214705	10
469	BEoL Cracking Risks due to Manufacturing Introduced Residual Stresses. 2019 ,	
468	An adaptive isogeometric analysis meshfree collocation method for elasticity and frictional contact problems. 2019 , 120, 209-230	17
467	A discrete least squares collocation method for two-dimensional nonlinear time-dependent partial differential equations. 2019 , 394, 177-199	3
466	Galerkin Meshfree Methods: A Review and Mathematical Implementation Aspects. 2019 , 5, 1	1
465	Experimental and numerical comparisons between finite element method, element-free Galerkin method, and extended finite element method predicted stress intensity factor and energy release rate of cortical bone considering anisotropic bone modelling. 2019 , 233, 823-838	9
464	An isogeometric-symplectic coupling approach for fracture analysis of magneto-electroelastic bimetals with crack terminating at the interface. 2019 , 216, 106510	6
463	Numerical solutions of the coupled unsteady nonlinear convection-diffusion equations based on generalized finite difference method. 2019 , 134, 1	14
462	Evaluation of breaking wave effects in liquid sloshing problems: ANCF/SPH comparative study. 2019 , 97, 45-62	11
461	Numerical approximations for the Riesz space fractional advection-dispersion equations via radial basis functions. 2019 , 144, 59-82	4
460	An overview of particle-based numerical manifold method and its application to dynamic rock fracturing. 2019 , 11, 684-700	9
459	Wavelet kernel function based multiscale LSSVM for elliptic boundary value problems. 2019 , 356, 40-51	4

458	Reproducing kernel mesh-free collocation analysis of structural vibrations. 2019 , 36, 734-764		12
457	Application of DSC Model for Natural-Element Analysis of Pile Foundations under Cyclic Loading. 2019 , 19, 04019066		1
456	Localized method of fundamental solutions for large-scale modelling of three-dimensional anisotropic heat conduction problems Theory and MATLAB code. 2019 , 220, 144-155		28
455	A crack growth strategy based on moving mesh method and fracture mechanics. 2019 , 102, 103-115		23
454	Coupled Discrete Crack and Porous Media Model for Hydraulic Fractures using the XFEM. 2019 , 23, 1017-1027	3	
453	An adaptive orthogonal improved interpolating moving least-square method and a new boundary element-free method. 2019 , 353, 347-370		11
452	An inherently consistent reproducing kernel gradient smoothing framework toward efficient Galerkin meshfree formulation with explicit quadrature. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2019 , 349, 628-672	5-7	25
451	An algorithm for triangulating smooth three-dimensional domains immersed in universal meshes. 2019 , 117, 84-117		3
450	3D numerical simulation of initiation, propagation and coalescence of cracks using the extended non-ordinary state-based peridynamics. 2019 , 101, 254-268		28
449	The interpolating element-free Galerkin method for solving Korteweg-Benjamin-Liu regularized long-wave equation with error analysis. 2019 , 96, 1345-1365		16
448	Analysis of the Effect of Initial Crack Length on Concrete Members Using Extended Finite Element Method. 2019 , 17, 1503-1512		3
447	A configurational force driven cracking particle method for modelling crack propagation in 2D. 2019 , 104, 197-208		4
446	On the material and material-adapted approaches to curve framing with applications in path estimation, shape reconstruction, and computer graphics. 2019 , 218, 60-81		3
445	Moving least squares particle hydrodynamics method for Burgers' equation. 2019 , 356, 362-378		2
444	Estimation of equivalent permeability tensor for fractured porous rock masses using a coupled RPIM-FEM method. 2019 , 36, 807-829		1
443	Peridynamic Least Square Minimization. 2019 , 247-261		
442	Adaptive consistent element-free Galerkin method for phase-field model of brittle fracture. 2019 , 64, 741-767		19
441	Peridynamic least squares minimization. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2019 , 348, 846-874	5-7	30

440	Moving least squares reconstruction for sharp interface immersed boundary methods. 2019 , 90, 57-80	6
439	Application of the natural element method for the analysis of composite laminated plates. 2019 , 87, 244-253	13
438	Density-based smoothed particle hydrodynamics methods for incompressible flows. 2019 , 185, 22-33	17
437	A unified procedure for free transverse vibration of rectangular and annular sectorial plates. 2019 , 89, 1485-1499	2
436	Meshless velocity vorticity local boundary integral equation (LBIE) method for two dimensional incompressible Navier-Stokes equations. 2019 , 29, 4034-4073	5
435	The Improved Interpolating Complex Variable Element Free Galerkin Method for Two-Dimensional Potential Problems. 2019 , 11, 1950104	5
434	Meshless single grain cutting simulations on the GPU. 2019 , 12, 272	6
433	A state of art review on the modeling of Contact type Nonlinearities by Extended Finite Element method. 2019 , 18, 3462-3471	8
432	Elasto Plastic Crack Growth by XFEM: A Review. 2019 , 18, 3472-3481	5
431	Comparative modelling of crack propagation in elastic-plastic materials using the meshfree local radial basis point interpolation method and eXtended finite-element method. 2019 , 6, 190543	1
430	A mesh-independent method for planar three-dimensional crack growth in finite domains. 2019 , 117, 38-62	3
429	Detection of void and metallic inclusion in 2D piezoelectric cantilever beam using impedance measurements. 2019 , 13, 542-556	2
428	Energy dissipation in polymer-bonded explosives with various levels of constituent plasticity and internal friction. 2019 , 159, 136-149	22
427	Modelling Hydraulic Fracturing with a Point-Based Approximation for the Maximum Principal Stress Criterion. 2019 , 52, 1781-1801	12
426	A VDQ-based multifield approach to the 2D compressible nonlinear elasticity. 2019 , 118, 345-370	11
425	3D analysis of anchor bolt pullout in concrete materials using the non-ordinary state-based peridynamics. 2019 , 207, 68-85	8
424	A decomposed subspace reduction for fracture mechanics based on the meshfree integrated singular basis function method. 2019 , 63, 593-614	4
423	A hybrid numerical approach for predicting mixing length and mixing time in microfluidic junctions from moderate to arbitrarily large values of the Péclet number. 2019 , 196, 247-264	4

422	Prediction of 3D grinding temperature field based on meshless method considering infinite element. 2019 , 100, 3067-3084		4
421	The dimension splitting element-free Galerkin method for 3D transient heat conduction problems. 2019 , 62, 1		29
420	A second-order in time and space particle-based method to solve flow problems on arbitrary meshes. 2019 , 380, 295-310		5
419	Buckling Analysis and Free Vibration of Composite Laminates Using Natural Element Method. 2019 , 57, 1303-1311		2
418	Three-dimensional flow prediction in mould filling processes using a GFDM. 2019 , 6, 411-425		5
417	An improved local boundary integral equation method implemented by the transformed MLS approximation with the delta property. 2019 , 101, 48-55		2
416	Conforming window functions for meshfree methods. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2019 , 347, 588-621	5-7	9
415	An integrated boundary approach for colloidal suspensions simulated using smoothed dissipative particle dynamics. 2019 , 179, 672-686		1
414	The Hermit-Type Reproducing Kernel Particle Method for Elasticity Problems. 2019 , 16, 1846003		1
413	Interface integral technique for the thermoelasticity of random structure matrix composites. 2019 , 24, 2785-2813		8
412	Higher order meshless schemes applied to the finite element method in elliptic problems. 2019 , 77, 779-802		4
411	Enhanced local maximum-entropy approximation for stable meshfree simulations. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2019 , 344, 858-886	5-7	16
410	A 3-D coupled Smoothed Particle Hydrodynamics and Coarse-Grained model to simulate drying mechanisms of small cell aggregates. 2019 , 67, 219-233		6
409	Meshfree implementation of the double director shell model for FGM shell structures analysis. 2019 , 99, 111-121		30
408	Linear smoothed extended finite element method for fatigue crack growth simulations. 2019 , 206, 551-564		25
407	Meshless implementation of arbitrary 3D-shell structures based on a modified first order shear deformation theory. 2019 , 77, 34-49		23
406	Structural optimization based on meshless element free Galerkin and level set methods. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2019 , 344, 144-163	5-7	20
405	A new multi-scale framework to incorporate microstructure evolution in phenomenological plasticity: Theory, explicit finite element formulation, implementation and validation. 2019 , 117, 122-156		15

404	Extending radial point interpolating meshless methods to the elasto-plastic analysis of aluminium alloys. 2019 , 100, 101-117		30
403	Fatigue crack growth analysis of cracked specimens by the coupled finite element-element free Galerkin method. 2019 , 26, 1343-1356		10
402	A stabilized moving Kriging interpolation method and its application in boundary node method. 2019 , 100, 14-23		3
401	The thermal analysis of cutting/grinding processes by meshless finite block method. 2019 , 100, 68-79		2
400	The element-free Galerkin method based on moving least squares and moving Kriging approximations for solving two-dimensional tumor-induced angiogenesis model. 2020 , 36, 1517-1537		14
399	Current achievements on bubble dynamics analysis using MPS method. 2020 , 118, 103057		12
398	An implicit boundary finite element method with extension to frictional sliding boundary conditions and elasto-plastic analyses. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2020 , 358, 112620	5-7	3
397	Analysis and application of the interpolating element free Galerkin (IEFG) method to simulate the prevention of groundwater contamination with application in fluid flow. 2020 , 368, 112453		15
396	A smoothed particle hydrodynamics-phase field method with radial basis functions and moving least squares for meshfree simulation of dendritic solidification. 2020 , 77, 1704-1741		5
395	Simulating thin film flow using the shallow water equations and smoothed particle hydrodynamics. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2020 , 358, 112639	5-7	3
394	Shear locking in one-dimensional finite element methods. 2020 , 79, 103871		4
393	Contemporary Meshfree Methods for Three Dimensional Heat Conduction Problems. 2020 , 27, 1413-1447		8
392	A kinematic comparison of meshfree and mesh-based Lagrangian approximations using manufactured extreme deformation fields. 2020 , 7, 257-270		2
391	Investigation of the Oldroyd model as a generalized incompressible Navier-Stokes equation via the interpolating stabilized element free Galerkin technique. 2020 , 150, 274-294		25
390	Taylor-Series Expansion Based Numerical Methods: A Primer, Performance Benchmarking and New Approaches for Problems with Non-smooth Solutions. 2020 , 27, 1465-1513		8
389	Simulation of flow and mixing for highly viscous fluid in a twin screw extruder with a conveying element using parallelized smoothed particle hydrodynamics. 2020 , 212, 115311		10
388	A general mass lumping scheme for the variants of the extended finite element method. 2020 , 121, 2262-2284		3
387	Coupling of material point method and molecular dynamics for modeling ultrafast laser interaction with metals. 2020 , 110, 104-111		2

386	An assessment of numerical techniques to find energy-minimizing microstructures associated with nonconvex potentials. 2020 , 121, 1595-1628		7
385	Introduction. 2020 , 1-18		
384	Extended meshfree methods. 2020 , 161-313		0
383	Updated Lagrangian Taylor-SPH method for large deformation in dynamic problems. 2020 , 80, 238-256		7
382	Analyzing 3D advection-diffusion problems by using the dimension splitting element-free Galerkin method. 2020 , 111, 167-177		11
381	A meshless multiscale approach to modeling severe plastic deformation of metals: Application to ECAE of pure copper. 2020 , 173, 109329		6
380	Effects of interfacial crack and implant material on mixed-mode stress intensity factor and prediction of interface failure of cemented acetabular cup. 2020 , 108, 1844-1856		6
379	A nesting cell-based smoothed radial point interpolation method with two-level smoothed strains for static, free and forced vibration analysis of solids. 2020 , 111, 101-117		3
378	Phase-field modeling of fracture. 2020 , 53, 1-183		83
377	Meshfree numerical approach based on the Finite Pointset Method for static linear elasticity problems. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2020 , 372, 113367	5-7	8
376	An enriched dual boundary element method formulation for linear elastic crack propagation. 2020 , 121, 158-179		9
375	Numerical solution of two-dimensional Fredholm Hammerstein integral equations on 2D irregular domains by using modified moving least-square method. 2020 , 1-20		1
374	Extended finite volume method with enriched HPCK shape functions for dynamic crack propagation modeling. 2020 , 239, 107327		1
373	A meshless regularized local boundary integral equation method and the selection of weight function and geometrical parameters. 2020 , 117, 221-231		
372	Automatic digital-numerical integrated analysis by the image-based meshless method. 2020 , 119, 44-58		1
371	A matrix-free Chimera approach based on Dirichlet-Dirichlet coupling for domain composition purposes. 2020 , 79, 3310-3330		4
370	A highly stable explicit scheme for a fourth-order nonlinear diffusion filter. 2020 , 11, 2050030		
369	An h-adaptive element-free Galerkin meshless method using a posteriori error estimator. 2020 , 25, 101468		1

368	A meshfree stabilized collocation method (SCM) based on reproducing kernel approximation. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2020 , 371, 113303	5-7	25
367	Phase-field modeling of brittle fracture in a 3D polycrystalline material via an adaptive isogeometric-meshfree approach. 2020 , 121, 5042-5065		12
366	A new interface element connecting 3D finite elements with non-coincident nodes to simulate delamination in composite laminates. 2020 , 252, 112694		2
365	A multi-scale MCCPFEM framework: Modeling of thermal interface grooving and deformation anisotropy of titanium alloy with lamellar colony. 2020 , 135, 102804		14
364	Simulation of a Submarine Landslide Using the Coupled Material Point Method. 2020 , 2020, 1-14		0
363	Adaptive higher-order phase-field modeling of anisotropic brittle fracture in 3D polycrystalline materials. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2020 , 372, 113434	5-7	17
362	Review of smoothed particle hydrodynamics: towards converged Lagrangian flow modelling. 2020 , 476, 20190801		27
361	A fully Lagrangian mixed discrete least squares meshfree method for simulating the free surface flow problems. 2020 , 1		2
360	A review on the application of particle finite element methods (PFEM) to cases of landslides. 2020 , 1-15		2
359	The Improved Element-Free Galerkin Method for Diffusional Drug Release Problems. 2020 , 12, 2050096		19
358	Forecasting Disastrous Characteristics of Highway Landslides Using the Material Point Method: A Surcharge-Induced Perspective. 2020 , 2020, 1-13		
357	An open source pipeline for design of experiments for hyperelastic models of the skin with applications to keloids. 2020 , 112, 103999		3
356	Magnetic Field Calculation of a Novel Electromagnetic Clutch Based on an Interpolating Element-Free Galerkin Method. 2020 , 8, 204763-204769		
355	Numerical differentiation of noisy data: A unifying multi-objective optimization framework. 2020 , 8, 196865-196877		19
354	Rigid body motion in viscous flows using the finite element method. 2020 , 32, 123311		2
353	Material point method after 25 years: Theory, implementation, and applications. 2020 , 53, 185-398		17
352	Numerical Simulation of Flow in Complex Geometries by Using Smoothed Particle Hydrodynamics. 2020 , 59, 18236-18246		0
351	A Petrov-Galerkin finite element-meshfree formulation for multi-dimensional fractional diffusion equations. 2020 , 66, 323-350		3

350	Plane elasticity problems by barycentric rational interpolation collocation method and a regular domain method. 2020 , 121, 4134-4156		2
349	A global RBF-QR collocation technique for solving two-dimensional elliptic problems involving arbitrary interface. 2020 , 37, 3793		3
348	GPU accelerated initialization of local maximum-entropy meshfree methods for vibrational and acoustic problems. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2020 , 366, 113089	5:7	3
347	Weak-form element differential method for solving mechanics and heat conduction problems with abruptly changed boundary conditions. 2020 , 121, 3722-3741		1
346	A dual interpolation boundary face method with Hermite-type approximation for elasticity problems. 2020 , 82, 104005		4
345	Shakedown analysis of porous materials via mixed meshless methods. 2020 , 42, 1		
344	Effect of material irregularities on fatigue crack growth by enriched techniques. 2020 , 21, 109-133		3
343	Development of Multi-GPUBased Smoothed Particle Hydrodynamics Code for Nuclear Thermal Hydraulics and Safety: Potential and Challenges. 2020 , 8,		5
342	Simulation of Adiabatic Shear Bands in Orthogonal Machining of Ti6Al4V Using a Rigid-Viscoplastic Finite Element Analysis. 2020 , 10, 338		5
341	Dynamic parameters of multi-cabin protective structure subjected to low-impact load [Numerical and experimental investigations. 2020 , 16, 988-1000		0
340	Noise filtering in atomistic stress calculations for crystalline materials. 2020 , 144, 104083		1
339	Numerical analyses of a prefabricated retaining system for foundation pits in silt soils. 2020 , 7, 173-190		2
338	Consistent element-free Galerkin method for three-dimensional crack propagation based on a phase-field model. 2020 , 179, 109694		8
337	An adaptive T-spline finite cell method for structural shape optimization. 2020 , 61, 1857-1876		5
336	Influence of interface crack and non-uniform cement thickness on mixed-mode stress intensity factor and prediction of interface failure of cemented acetabular cup. 2020 , 107, 102524		4
335	Interval K-L expansion of interval process model for dynamic uncertainty analysis. 2020 , 474, 115254		7
334	A meshfree finite volume method with optimal numerical integration and direct imposition of essential boundary conditions. 2020 , 153, 98-113		0
333	Application of Mesh-Less Algorithms in Image Processing. 2020 , 1438, 012026		

332	A least-squares particle model with other techniques for 2D viscoelastic fluid/free surface flow. 2020 , 407, 109255	13
331	A local grid refinement scheme for B-spline material point method. 2020 , 121, 2398-2417	5
330	A Predictor-Corrector Meshless Based Scheme for Incompressible Navier-Stokes Flows. 2020 , 6, 1	
329	A new contact potential based three-dimensional discontinuous deformation analysis method. 2020 , 127, 104206	26
328	Simulating incompressible flow on moving meshfree grids. 2020 , 200, 104464	2
327	A class of RBFs-based DQ methods for the space-fractional diffusion equations on 3D irregular domains. 2020 , 66, 221-238	1
326	A stress recovery procedure for laminated composite plates based on strong-form equilibrium enforced via the RBF Kansa method. 2020 , 244, 112292	7
325	Continuous smoothed particle hydrodynamics for cracked nonconvex bodies by diffraction criterion. 2020 , 108, 102584	4
324	Error analysis of interpolating element free Galerkin method to solve non-linear extended Fisher-Kolmogorov equation. 2020 , 80, 247-262	14
323	A hybrid meshless method for the solution of the second order hyperbolic telegraph equation in two space dimensions. 2020 , 115, 21-27	10
322	The interpolating element-free Galerkin method for three-dimensional elastoplasticity problems. 2020 , 115, 156-167	26
321	An efficient SPH methodology for modelling mechanical characteristics of particulate composites. 2021 , 17, 135-146	1
320	Wrinkling Analysis of Pre-Stressed Rectangular Membranes Using Element-Free Galerkin Method. 2021 , 18, 2041001	0
319	The interpolating element-free Galerkin method for elastic large deformation problems. 2021 , 64, 364-374	17
318	A fluid simulation system based on the MPS method. 2021 , 258, 107572	3
317	Phase-field modeling of crack propagation in polycrystalline materials. 2021 , 186, 110057	10
316	Material non-linearity in the numerical analysis of SLJ bonded with ductile adhesives: A meshless approach. 2021 , 104, 102716	7
315	Karamelo: an open source parallel C++ package for the material point method. 2021 , 8, 767-789	5

314	An efficient meshfree gradient smoothing collocation method (GSCM) using reproducing kernel approximation. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2021 , 374, 113573	5-7	5
313	Advances in ballistic penetrating impact simulations on thin structures using Smooth Particles Hydrodynamics: A state of the art. 2021 , 159, 107206		3
312	On the use of reproducing kernel particle finite strip method in the static, stability and free vibration analysis of FG plates with different boundary conditions and diverse internal supports. 2021 , 92, 380-409		2
311	A meshless finite difference method for elliptic interface problems based on pivoted QR decomposition. 2021 , 161, 489-509		3
310	A new approach for crack detection in plate structures using an integrated extended finite element and enhanced vibrating particles system optimization methods. 2021 , 29, 638-651		7
309	Consistent weak forms for meshfree methods: Full realization of h-refinement, p-refinement, and a-refinement in strong-type essential boundary condition enforcement. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2021 , 373, 113448	5-7	2
308	Lagrangian radial basis function-based particle hydrodynamics method and its application for viscous flows. 2021 , 122, 1964-1989		2
307	Application of configurational mechanics to crack propagation in quasi-brittle materials. 2021 , 241, 107349		0
306	Static and dynamic analysis of thin functionally graded shell with in-plane material inhomogeneity. 2021 , 193, 106165		11
