Version: 2024-04-19

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
216	Non-random usage of 'degenerate' codons is related to protein three-dimensional structure. 1996 , 399, 78-82		70
215	Simple folding model for HP lattice proteins. 1996 , 125-136		2
214	Protein secondary structural types are differentially coded on messenger RNA. <i>Protein Science</i> , 1996 , 5, 1973-83	6.3	131
213	Conservation of gene order: a fingerprint of proteins that physically interact. 1998 , 23, 324-8		865
212	The relationship between synonymous codon usage and protein structure. 1998 , 434, 93-6		92
211	Specific correlations between relative synonymous codon usage and protein secondary structure. 1998 , 281, 31-48		111
210	Modular folding and evidence for phosphorylation-induced stabilization of an hsp90-dependent kinase. 1998 , 273, 8475-82		39
209	An Integrated Sequence-Structure Database incorporating matching mRNA sequence, amino acid sequence and protein three-dimensional structure data. 1998 , 26, 327-31		21
208	Substrate mutations that bypass a specific Cpn10 chaperonin requirement for protein folding. 1998 , 273, 34075-86		16
207	The evolutionarily conserved eukaryotic arginine attenuator peptide regulates the movement of ribosomes that have translated it. 1998 , 18, 7528-36		52
206	Structural characterization of <i>Saccharomyces cerevisiae</i> prion-like protein Ure2. 1999 , 274, 13666-74		111
205	Do you dig my groove?. 1999 , 23, 6-8		11
204	Correlations of nucleotide substitution rates and base composition of mammalian coding sequences with protein structure. 1999 , 238, 23-31		25
203	Synonymous codon substitutions affect ribosome traffic and protein folding during in vitro translation. 1999 , 462, 387-91		295
202	The effect of a hydrophobic N-terminal probe on translational pausing of chloramphenicol acetyl transferase and rhodanese. 1999 , 286, 71-81		18
201	Ribosome traffic in <i>E. coli</i> and regulation of gene expression. 2000 , 202, 175-85		49
200	Preparation and crystallization of dynamic NF-kappa B.Ikappa B complexes. 2000 , 275, 32800-6		15

199	Studies on the relationships between the synonymous codon usage and protein secondary structural units. 2000 , 269, 692-6	89
198	Mot protein assembly into the bacterial flagellum: a model based on mutational analysis of the motB gene. 2000 , 297, 7-24	38
197	Expression of different coding sequences in cell-free bacterial and eukaryotic systems indicates translational pausing on Escherichia coli ribosomes. 2000 , 482, 185-8	20
196	Expression of the Staphylococcus hyicus lipase in Lactococcus lactis. 2000 , 66, 588-98	47
195	In vitro selection and evolution of proteins. 2000 , 55, 367-403	36
194	Flexibility of the genetic code with respect to DNA structure. 2001 , 17, 237-48	11
193	Highly expressed and alien genes of the Synechocystis genome. 2001 , 29, 1590-601	48
192	Characterizations of highly expressed genes of four fast-growing bacteria. 2001 , 183, 5025-40	120
191	Distribution of rare triplets along mRNA and their relation to protein folding. 2002 , 20, 413-20	50
190	Single synonymous codon substitution eliminates pausing during chloramphenicol acetyl transferase synthesis on Escherichia coli ribosomes in vitro. 2002 , 512, 209-12	15
189	Identification of two gene clusters involved in cyclohexanone oxidation in Brevibacterium epidermidis strain HCU. 2002 , 58, 781-9	28
188	Bacterial SsrA system plays a role in coping with unwanted translational readthrough caused by suppressor tRNAs. 2002 , 7, 509-19	43
187	Tracing specific synonymous codon-secondary structure correlations through evolution. 2003 , 56, 473-84	44
186	Widespread selection for local RNA secondary structure in coding regions of bacterial genes. 2003 , 13, 2042-51	156
185	Antagonistic signals within the COX2 mRNA coding sequence control its translation in Saccharomyces cerevisiae mitochondria. 2003 , 9, 419-31	17
184	Gene order in Prokaryotes: conservation and implications. 2004 , 209-237	2
183	Molecules in Time and Space. 2004 ,	
182	Enhanced expression of B-subunit of Escherichia coli heat-labile enterotoxin in tobacco by optimization of coding sequence. 2004 , 117, 175-87	39

181	Modification of the cholera toxin B subunit coding sequence to enhance expression in plants. 2004 , 13, 143-153	32
180	The relationship between synonymous codon usage and protein structure in <i>Escherichia coli</i> and <i>Homo sapiens</i> . 2004 , 73, 89-97	83
179	High-level expression of the neutralizing epitope of porcine epidemic diarrhea virus by a tobacco mosaic virus-based vector. 2004 , 38, 129-35	33
178	Differences in codon bias cannot explain differences in translational power among microbes. 2005 , 6, 3	9
177	Statistical evidence for conserved, local secondary structure in the coding regions of eukaryotic mRNAs and pre-mRNAs. 2005 , 33, 6338-48	77
176	Predicted highly expressed genes in archaeal genomes. 2005 , 102, 7303-8	49
