

# CITATION REPORT

List of articles citing

**Protein secondary structural types are differentially coded on messenger RNA**

**DOI: 10.1002/pro.5560051003**  
**Protein Science, 1996, 5, 1973-83.**

**Source:** <https://exaly.com/paper-pdf/27465494/citation-report.pdf>

**Version:** 2024-04-24

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
140	Codon usages in different gene classes of the Escherichia coli genome. <b>1998</b> , 29, 1341-55		187
139	Can functional regions of proteins be predicted from their coding sequences? The case study of G-protein coupled receptors. <b>1998</b> , 221, GC65-110		4
138	The relationship between synonymous codon usage and protein structure. <b>1998</b> , 434, 93-6		92
137	Specific correlations between relative synonymous codon usage and protein secondary structure. <b>1998</b> , 281, 31-48		111
136	An Integrated Sequence-Structure Database incorporating matching mRNA sequence, amino acid sequence and protein three-dimensional structure data. <i>Nucleic Acids Research</i> , <b>1998</b> , 26, 327-31	20.1	21
135	Synonymous codon substitutions affect ribosome traffic and protein folding during in vitro translation. <b>1999</b> , 462, 387-91		295
134	Ribosome traffic in E. coli and regulation of gene expression. <b>2000</b> , 202, 175-85		49
133	Studies on the relationships between the synonymous codon usage and protein secondary structural units. <b>2000</b> , 269, 692-6		89
132	Mot protein assembly into the bacterial flagellum: a model based on mutational analysis of the motB gene. <b>2000</b> , 297, 7-24		38
131	Expression of the Staphylococcus hyicus lipase in Lactococcus lactis. <b>2000</b> , 66, 588-98		47
130	Construction of a multiframe vector to express coding sequences in Escherichia coli. <b>2001</b> , 47, 72-76		
129	Pseudoknots in prion protein mRNAs confirmed by comparative sequence analysis and pattern searching. <i>Nucleic Acids Research</i> , <b>2001</b> , 29, 753-8	20.1	20
128	Synonymous codon usage in genes coding for proteins with different folding types.		
127	Distribution of rare triplets along mRNA and their relation to protein folding. <b>2002</b> , 20, 413-20		50
126	Silent mutations affect in vivo protein folding in Escherichia coli. <b>2002</b> , 293, 537-41		143
125	Conformational diseases: misfolding mechanisms may pave the way to early therapy. <b>2002</b> , 24, ix-xiv		2
124	Prion protein interactions with nucleic acid: possible models for prion disease and prion function. <b>2003</b> , 28, 955-63		25

123	Tracing specific synonymous codon-secondary structure correlations through evolution. <b>2003</b> , 56, 473-84	44
122	Folding type specific secondary structure propensities of synonymous codons. <b>2003</b> , 2, 150-7	21
121	A cis-acting replication element in the sequence encoding the NS5B RNA-dependent RNA polymerase is required for hepatitis C virus RNA replication. <b>2004</b> , 78, 1352-66	184
120	The relationship between synonymous codon usage and protein structure in Escherichia coli and Homo sapiens. <b>2004</b> , 73, 89-97	83
119	Statistical correlation between protein secondary structure and messenger RNA stem-loop structure. <b>2004</b> , 73, 16-26	24
118	Protein structure preference, tRNA copy number, and mRNA stem/loop content. <b>2004</b> , 74, 432-47	5
117	A novel method of analyzing proline synonymous codons in E. coli. <b>2004</b> , 576, 336-8	1
116	Whole genome analysis reveals a high incidence of non-optimal codons in secretory signal sequences of Escherichia coli. <b>2004</b> , 322, 1038-44	39
115	Nucleic acid chaperons: a theory of an RNA-assisted protein folding. <b>2005</b> , 2, 35	11
114	Statistical evidence for conserved, local secondary structure in the coding regions of eukaryotic mRNAs and pre-mRNAs. <i>Nucleic Acids Research</i> , <b>2005</b> , 33, 6338-48	20.1 77
113	Cod-ConfDB: a codon - conformation database.	
112	The compositional transition of vertebrate genomes: an analysis of the secondary structure of the proteins encoded by human genes. <b>2005</b> , 345, 27-33	6
111	The relation between mRNA folding and protein structure. <b>2006</b> , 343, 177-82	14
110	Indications that "codon boundaries" are physico-chemically defined and that protein-folding information is contained in the redundant exon bases. <b>2006</b> , 3, 28	10
109	A theoretical analysis of codon adaptation index of the Boophilus microplus bm86 gene directed to the optimization of a DNA vaccine. <b>2006</b> , 239, 445-9	13
108	Protein folding information in nucleic acids which is not present in the genetic code. <b>2006</b> , 1091, 399-411	6
107	Polarity and hydrophobicity interactions in protein synthesis process. <b>2006</b> , 240, 87-97	3
106	Exploring synonymous codon usage preferences of disulfide-bonded and non-disulfide bonded cysteines in the E. coli genome. <b>2006</b> , 241, 390-401	0

105	Codon usage domains over bacterial chromosomes. <b>2006</b> , 2, e37		36
104	Translational machinery and protein folding: evidence of conformational variants of the estrogen receptor alpha. <b>2007</b> , 467, 139-43		12
103	Experimental confirmation of a key role for non-optimal codons in protein export. <b>2007</b> , 355, 143-8		39
102	On the origin of synonymous codon usage divergence between thermophilic and mesophilic prokaryotes. <b>2007</b> , 581, 5825-30		8
101	How do synonymous mutations affect fitness?. <b>2007</b> , 29, 515-9		89
100	The Proteomic Code: a molecular recognition code for proteins. <b>2007</b> , 4, 45		26
99	Synonymous codon usage in different protein secondary structural classes of human genes: implication for increased non-randomness of GC3 rich genes towards protein stability. <b>2007</b> , 32, 947-63		22
98	Folding at the rhythm of the rare codon beat. <b>2008</b> , 3, 1047-57		80
97	Analysis of the distribution of functionally relevant rare codons. <i>BMC Genomics</i> , <b>2008</b> , 9, 207	4-5	34
96	Synonymous mutations and ribosome stalling can lead to altered folding pathways and distinct minima. <b>2008</b> , 383, 281-91		195
95	Secretory signal sequence non-optimal codons are required for expression and export of beta-lactamase. <b>2008</b> , 366, 135-41		23
94	Dynamic covariation between gene expression and genome characteristics. <b>2008</b> , 410, 53-66		
93	Rare codons cluster. <i>PLoS ONE</i> , <b>2008</b> , 3, e3412	3-7	130
92	Discovery of proteomic code with mRNA assisted protein folding. <b>2008</b> , 9, 2424-46		5
91	Heterologous protein expression is enhanced by harmonizing the codon usage frequencies of the target gene with those of the expression host. <i>PLoS ONE</i> , <b>2008</b> , 3, e2189	3-7	191
90	Clustering of codons with rare cognate tRNAs in human genes suggests an extra level of expression regulation. <b>2009</b> , 5, e1000548		47
89	Rethinking the Meaning of Biological Information. <b>2009</b> , 4, 159-166		4
88	A pause for thought along the co-translational folding pathway. <b>2009</b> , 34, 16-24		255

87	Transient ribosomal attenuation coordinates protein synthesis and co-translational folding. <b>2009</b> , 16, 274-80		423
86	The ribosome as a platform for co-translational processing, folding and targeting of newly synthesized proteins. <b>2009</b> , 16, 589-97		365
85	Biased codon usage in signal peptides: a role in protein export. <b>2009</b> , 17, 146-50		45
84	Translationally optimal codons associate with structurally sensitive sites in proteins. <b>2009</b> , 26, 1571-80		146
83	Study on the influences of palindromes in protein coding sequences on the folding rates of peptide chains. <b>2010</b> , 17, 881-8		3
82	Increased incidence of rare codon clusters at 5R and 3R gene termini: implications for function. <i>BMC Genomics</i> , <b>2010</b> , 11, 118	4.5	38
81	Signal sequence non-optimal codons are required for the correct folding of mature maltose binding protein. <b>2010</b> , 1798, 1244-9		17
80	Synonymous codon usage influences the local protein structure observed. <i>Nucleic Acids Research</i> , <b>2010</b> , 38, 6719-28	20.1	116
79	Adjustment of codon usage frequencies by codon harmonization improves protein expression and folding. <b>2011</b> , 705, 1-13		35
78	Determinants of translation efficiency and accuracy. <b>2011</b> , 7, 481		314
77	DNA libraries for the construction of phage libraries: statistical and structural requirements and synthetic methods. <b>2011</b> , 16, 1625-41		19
