Disseminating medical knowledge: the PROforma approach

Citation Report

#	ARTICLE	IF	CITATIONS
1	Decision support and disease management: a logic engineering approach. IEEE Transactions on Information Technology in Biomedicine, 1998, 2, 217-228.	3.6	27
2	Computer support for recording and interpreting family histories of breast and ovarian cancer in primary care (RAGs): qualitative evaluation with simulated patients. BMJ: British Medical Journal, 1999, 319, 32-36.	2.4	65
3	On the use of reminder systems in healthcare. , 0, , .		0
4	A computerised guideline for pressure ulcer prevention. International Journal of Medical Informatics, 2000, 58-59, 207-217.	1.6	11
5	Guideline-based careflow systems. Artificial Intelligence in Medicine, 2000, 20, 5-22.	3.8	137
6	Computerized decision support in medical imaging. IEEE Engineering in Medicine and Biology Magazine, 2000, 19, 89-96.	1.1	26
7	GASTON: an architecture for the acquisition and execution of clinical guideline-application tasks. Informatics for Health and Social Care, 2000, 25, 247-263.	1.0	28
8	Towards a quality and safety framework for point of care decision support systems. Health Informatics Journal, 2000, 6, 134-138.	1.1	0
9	RAGs: A Novel Approach to Computerized Genetic Risk Assessment and Decision Support from Pedigrees. Methods of Information in Medicine, 2001, 40, 315-322.	0.7	37
10	Hybrid argumentation systems for structured news reports. Knowledge Engineering Review, 2001, 16, 295-329.	2.1	14
11	The Internet, Global Healthcare Management Systems, and Sustainable Development: Future Scenarios. Electronic Journal of Information Systems in Developing Countries, 2001, 5, 1-18.	0.9	12
12	Sharable Representation of Clinical Guidelines in GLIF: Relationship to the Arden Syntax. Journal of Biomedical Informatics, 2001, 34, 170-181.	2.5	52
13	Intelligent interaction design: the role of human-computer interaction research in the design of intelligent systems. Expert Systems, 2001, 18, 3-18.	2.9	9
14	The application of ontologies and problem-solving methods for the development of shareable guidelines. Artificial Intelligence in Medicine, 2001, 22, 1-22.	3.8	17
15	OncoDoc: a successful experiment of computer-supported guideline development and implementation in the treatment of breast cancer. Artificial Intelligence in Medicine, 2001, 22, 43-64.	3.8	67
16	Flexible guideline-based patient careflow systems. Artificial Intelligence in Medicine, 2001, 22, 65-80.	3.8	128
17	AI in medicine on its way from knowledge-intensive to data-intensive systems. Artificial Intelligence in Medicine, 2001, 23, 5-12.	3.8	44
18	The socio-organizational age of artificial intelligence in medicine. Artificial Intelligence in Medicine, 2001, 23, 25-47.	3.8	54

#	ARTICLE	IF	CITATIONS
19	Multiple representations and multi-modal reasoning in medical diagnostic systems. Artificial Intelligence in Medicine, 2001, 23, 49-69.	3.8	12
20	Design and implementation of a framework to support the development of clinical guidelines. International Journal of Medical Informatics, 2001, 64, 285-318.	1.6	85
21	Computerising a guideline for the management of diabetes. International Journal of Medical Informatics, 2001, 64, 275-284.	1.6	10
22	A UMLS-based Knowledge Acquisition Tool for Rule-based Clinical Decision Support System Development. Journal of the American Medical Informatics Association: JAMIA, 2001, 8, 351-360.	2.2	71
23	PLAN: a framework and specification language with an event-condition-action (ECA) mechanism for clinical test request protocols. , 0, , .		9
24	Framework and architecture for the management of event-condition-action (ECA) rule-based clinical protocols. , 0, , .		6
25	Towards a comprehensive treatment of temporal constraints in clinical guidelines. , 0, , .		5
26	Analysis of the Process of Encoding Guidelines: A Comparison of GLIF2 and GLIF3. Methods of Information in Medicine, 2002, 41, 105-113.	0.7	15
27	Combining diagnosis and treatment using asbru. International Journal of Medical Informatics, 2002, 68, 49-57.	1.6	42
28	Verification of temporal scheduling constraints in clinical practice guidelines. Artificial Intelligence in Medicine, 2002, 25, 93-121.	3.8	45
29	Toward a Unifying Ontology Dealing with Both User–Defined Periodicity and Temporal Constraints About Repeated Events. Computational Intelligence, 2002, 18, 336-385.	2.1	10
30	The Syntax and Semantics of the PROformaGuideline Modeling Language. Journal of the American Medical Informatics Association: JAMIA, 2003, 10, 433-443.	2.2	247
31	Automated monitoring of medical protocols: a secure and distributed architecture. Artificial Intelligence in Medicine, 2003, 27, 367-392.	3.8	22
32	Using OncoDoc as a computer-based eligibility screening system to improve accrual onto breast cancer clinical trials. Artificial Intelligence in Medicine, 2003, 29, 153-167.	3.8	49
34	Comparing Computer-interpretable Guideline Models: A Case-study Approach. Journal of the American Medical Informatics Association: JAMIA, 2003, 10, 52-68.	2.2	407
35	Guideline composition from minimum basic data set. , 0, , .		0
36	Modular representation of the guideline text: an approach for maintaining and updating the content of medical education. Informatics for Health and Social Care, 2003, 28, 99-115.	1.0	7
38	Knowledge-Based Systems: Enhancing the Quality of Care. Yearbook of Medical Informatics, 2003, 12, 541-544.	0.8	0
