Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
666	Some new results on finite gain L_2 stabilization of discrete-time linear systems subject to actuator saturation.		
665	A remark on integral input to state stability.		2
664	Lyapunov characterisations of input-output-to-state stability.		
663	On integral-input-to-state stabilization. 1999 ,		3
662	A note on the integral-to-integral uniform output to state stability property. 1999 ,		0
661	Formulas relating stability estimates of discrete-time and sampled-data nonlinear systems. <i>Systems and Control Letters</i> , 1999 , 38, 49-60	2.4	181
660	Asymptotic stability equals exponential stability, and ISS equals finite energy gain if you twist your eyes. <i>Systems and Control Letters</i> , 1999 , 38, 127-134	2.4	57
659	Logic-based switching control of a nonholonomic system with parametric modeling uncertainty. <i>Systems and Control Letters</i> , 1999 , 38, 167-177	2.4	63
658	Sufficient conditions for stabilization of sampled-data nonlinear systems via discrete-time approximations. <i>Systems and Control Letters</i> , 1999 , 38, 259-270	2.4	394
657	Intrinsic robustness of global asymptotic stability. <i>Systems and Control Letters</i> , 1999 , 38, 297-307	2.4	44
656	On the equivalence between asymptotic and exponential stability, and between ISS and finite H_2 gain.		0
655	Results on converse Lyapunov functions from class-KL estimates.		12
654	On stability and input-to-state stability KL estimates of discrete-time and sampled-data nonlinear systems. 1999 ,		
653	ISS and integral-ISS disturbance attenuation with bounded controls.		13
652	Controller design for the integral-input-to-state stabilization of switched nonlinear systems: a cycle analysis method.		
651	Stabilization of relative equilibria for underactuated systems on Riemannian manifolds. <i>Automatica</i> , 2000 , 36, 1819-1834	5.7	27
650	Finite gain stabilization of discrete-time linear systems subject to actuator saturation. <i>Automatica</i> , 2000 , 36, 269-277	5.7	33

649	L2 - Gain and Passivity Techniques in Nonlinear Control. 2000 ,		788
648	A unified characterization and solution of input-to-state stabilization via state-dependent scaling.		
647	On input-to-state stability for time varying nonlinear systems.		22
646	A characterization of integral input-to-state stability. <i>IEEE Transactions on Automatic Control</i> , 2000 , 45, 1082-1097	5.9	384
645	Computing control Lyapunov functions via a Zubov type algorithm.		2
644	A smooth Lyapunov function from a class- \mathcal{KL} estimate involving two positive semidefinite functions. <i>ESAIM - Control, Optimisation and Calculus of Variations</i> , 2000 , 5, 313-367	1	178
643	A condition for the stability of switched nonlinear systems. <i>IEEE Transactions on Automatic Control</i> , 2000 , 45, 2077-2079	5.9	55
642	Input-Output-to-State Stability. 2001 , 39, 1874-1928		120
641	Speed control of electrical machines: unknown load torque case. <i>IEEE Transactions on Automatic Control</i> , 2001 , 46, 1979-1983	5.9	6
640	The ISS philosophy as a unifying framework for stability-like behavior. 2001 , 443-467		40
639	Decentralized nonlinear output-feedback stabilization with disturbance attenuation. <i>IEEE Transactions on Automatic Control</i> , 2001 , 46, 1623-1629	5.9	67
638	A note on input-to-state stability and averaging of systems with inputs. <i>IEEE Transactions on Automatic Control</i> , 2001 , 46, 1760-1765	5.9	8
637	Power characterizations of input-to-state stability and integral input-to-state stability. <i>IEEE Transactions on Automatic Control</i> , 2001 , 46, 1298-1303	5.9	8
636	Converse Lyapunov Theorems for Non-Uniform in Time Global Asymptotic Stability and Stabilization by Means of Time-Varying Feedback. 2001 , 34, 769-773		
635	Integral Characterizations of Set UGAS of Differential Inclusions and Applications. 2001 , 34, 1025-1030		1
634	Power formulations of input to state stability notions.		1
633	Meagre functions and asymptotic behaviour of dynamical systems. 2001 , 44, 1087-1109		16
632	Constructive nonlinear control: a historical perspective. <i>Automatica</i> , 2001 , 37, 637-662	5.7	450

631	New characterization and solution of input-to-state stabilization: a state-dependent scaling approach. <i>Automatica</i> , 2001 , 37, 1663-1670	5.7	5
630	Control of Complex Systems. 2001 ,		50
629	Decentralized tracking with disturbance attenuation by nonlinear output feedback. 2001 ,		1
628	Integral versions of iss for sampled-data nonlinear systems via their approximate discrete-time models. <i>IEEE Transactions on Automatic Control</i> , 2002 , 47, 2033-2037	5.9	28
627	Characterizations of detectability notions in terms of discontinuous dissipation functions. <i>International Journal of Control</i> , 2002 , 75, 882-900	1.5	4
626	Input-to-state dynamical stability and its Lyapunov function characterization. <i>IEEE Transactions on Automatic Control</i> , 2002 , 47, 1499-1504	5.9	47
625	L_2 -gain stabilizability with respect to Filippov solutions.		1
624	On robustness of stability and Lyapunov functions for discontinuous difference equations.		8
623	Further results on switched control of linear systems with constraints.		2
622	Viscosity solutions of the Bellman equation for infinite horizon optimal control problems with negative instantaneous costs.		0
621	Stabilization of sampled-data nonlinear systems via their approximate models: an optimization based approach.		0
620	OPTIMAL MIXING BY FEEDBACK IN PIPE FLOW. 2002 , 35, 423-428		0
619	ON SUPERVISORY CONTROL OF LINEAR SYSTEMS WITH INPUT CONSTRAINTS. 2002 , 35, 85-90		1
618	STABILITY OF TIME-VARYING DISCRETE-TIME CASCADES. 2002 , 35, 263-268		7
617	INTEGRAL ISS FOR SAMPLED-DATA NONLINEAR SYSTEMS. 2002 , 35, 317-322		
616	Measurement to error stability: a notion of partial detectability for nonlinear systems.		7
615	Nonlinear switched systems with state dependent dwell-time.		9
614	Closed-Form Solutions to Optimal Control Problems in Fluid Mixing. 2002 ,		

613	A Unifying Integral ISS Framework for Stability of Nonlinear Cascades. 2002 , 40, 1888-1904		103
612	A converse Lyapunov theorem for discrete-time systems with disturbances. <i>Systems and Control Letters</i> , 2002 , 45, 49-58	2.4	178
611	Universal construction of feedback laws achieving ISS and integral-ISS disturbance attenuation. <i>Systems and Control Letters</i> , 2002 , 46, 111-127	2.4	62
610	Practical L2 disturbance attenuation for nonlinear systems. <i>Automatica</i> , 2002 , 38, 139-145	5.7	13
609	Supervision of integral-input-to-state stabilizing controllers. <i>Automatica</i> , 2002 , 38, 1327-1335	5.7	70
608	Decentralized disturbance attenuating output-feedback trackers for large-scale nonlinear systems. <i>Automatica</i> , 2002 , 38, 1407-1415	5.7	69
607	A generalization of Zubov's method to perturbed systems.		2
606	On uniform boundedness of parameterized discrete-time systems with decaying inputs: applications to cascades. <i>Systems and Control Letters</i> , 2003 , 49, 163-174	2.4	17
605	A variational inequality for measurement feedback almost-dissipative control. <i>Systems and Control Letters</i> , 2003 , 50, 21-38	2.4	10
604	Switched nonlinear systems with state-dependent dwell-time. <i>Systems and Control Letters</i> , 2003 , 50, 291-302	2.4	112
603	. <i>IEEE Transactions on Automatic Control</i> , 2003 , 48, 1526-1544	5.9	119
602	Optimization-Based Stabilization of Sampled-Data Nonlinear Systems via Their Approximate Discrete-Time Models. 2003 , 42, 98-122		69
601	An example of a GAS system which can be destabilized by an integrable perturbation. <i>IEEE Transactions on Automatic Control</i> , 2003 , 48, 1046-1049	5.9	13
600	A Converse Lyapunov Theorem for Nonuniform in Time Global Asymptotic Stability and Its Application to Feedback Stabilization. 2003 , 42, 936-965		42
599	Remarks on equivalence between full order and reduced order nonlinear observers.		1
598	Results on discrete-time control-Lyapunov functions.		3
597	Model predictive control when a local control Lyapunov function is not available.		7
596	Stabilization of inertia wheel pendulum using output feedback back-stepping.		1

595	A note on stabilization via communication channel in the presence of input constraints.		7
594	Results on converse Lyapunov theorems for difference inclusions.		7
593	Quantitative Aspects of the Input-to-State-Stability Property. 2004 , 215-230		5
592	Measurement feedback controller design to achieve input to state stability. 2004 ,		
591	Results on stabilization of nonlinear systems under finite data-rate constraints. 2004 ,		4
590	An approach to integral input-to-state stabilization via satisficing strategy.		
589	Recent developments in decentralized nonlinear control.		2
588	Discrete-time asymptotic controllability implies smooth control-Lyapunov function. <i>Systems and Control Letters</i> , 2004 , 52, 349-359	2.4	32
587	Smooth Lyapunov functions and robustness of stability for difference inclusions. <i>Systems and Control Letters</i> , 2004 , 52, 395-405	2.4	85
586	Stabilizability by state feedback implies stabilizability by encoded state feedback. <i>Systems and Control Letters</i> , 2004 , 53, 249-258	2.4	91
585	Supervisory control with state-dependent dwell-time logic and constraints. <i>Automatica</i> , 2004 , 40, 269-275	57	44
584	A unifying framework for global regulation via nonlinear output feedback: from ISS to iISS. <i>IEEE Transactions on Automatic Control</i> , 2004 , 49, 549-562	5.9	153
