

Use of the Internet to enhance construction communication System

International Journal of Project Management

17, 107-111

DOI: [10.1016/s0263-7863\(97\)00077-x](https://doi.org/10.1016/s0263-7863(97)00077-x)

Citation Report

#	ARTICLE	IF	CITATIONS
1	An Intranet-based cost control system. <i>Advances in Engineering Software</i> , 2001, 32, 87-94.	3.8	29
2	An application of the Internet-based project management system. <i>Automation in Construction</i> , 2001, 10, 239-246.	9.8	101
5	Communication Patterns in Construction at Construction Manager Level. <i>Journal of Construction Engineering and Management - ASCE</i> , 2003, 129, 570-577.	3.8	52
6	Web-based Centralized Multiclient Cooperative Contractor Registration System. <i>Journal of Computing in Civil Engineering</i> , 2003, 17, 28-37.	4.7	13
7	Knowledge Mining of Information Sources for Research in Construction Management. <i>Journal of Construction Engineering and Management - ASCE</i> , 2003, 129, 182-191.	3.8	10
8	An example of developing a business model for information and communication technologies (ICT) adoption on construction projects – the National Museum of Australia project. <i>Engineering, Construction and Architectural Management</i> , 2003, 10, 179-192.	3.1	13
9	Web-based Construction Information Management System. <i>Construction Economics and Building</i> , 2003, 3, 43-52.	0.9	11
10	Alignment between ICT and communication in construction projects. <i>International Journal of Human Resources Development and Management</i> , 2004, 4, 346.	0.1	8
11	Interorganizational communication and ICT in construction projects: a review using metatriangulation. <i>Construction Innovation</i> , 2005, 5, 159-177.	2.7	23
12	Exploratory factors influencing information and communication technology diffusion and adoption within Australian construction organizations: a micro analysis. <i>Construction Innovation</i> , 2005, 5, 135-157.	2.7	7
13	Exploratory factors influencing information and communication technology diffusion and adoption within Australian construction organizations: a micro analysis. <i>Construction Innovation</i> , 2005, 5, 135-157.	2.7	80
14	Factors affecting ICT diffusion. <i>Engineering, Construction and Architectural Management</i> , 2005, 12, 21-37.	3.1	81
15	The Impact of ICT on Professional Practice in the Nigerian Construction Industry. <i>Electronic Journal of Information Systems in Developing Countries</i> , 2006, 24, 1-19.	1.4	30
16	A system integration framework through development of ISO 10303-based product model for steel bridges. <i>Automation in Construction</i> , 2006, 15, 212-228.	9.8	38
17	Managing information flows for quality improvement of projects. <i>Measuring Business Excellence</i> , 2007, 11, 30-40.	2.4	26
