

CITATION REPORT

List of articles citing

Phosphatidylinositol-3-OH kinases are Rab5 effectors

DOI: 10.1038/12075

Nature Cell Biology, 1999, 1, 249-52.

Version: 2024-04-24

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

17 You can go your own way: SNX-BAR coat complexes direct traffic at late endosomes.. *Current Opinion in Cell Biology*, 2022, 76, 102087 9 2

16 Axonal transport of Hrs is activity dependent and facilitates synaptic vesicle protein degradation. *Life Science Alliance*, 2022, 5, e202000745 5.8

15 RABENOSYN separation-of-function mutations uncouple endosomal recycling from lysosomal degradation, causing a distinct Mendelian Disorder. *Human Molecular Genetics*, 5.6

14 CRHR1-mediated Akt activation involves endocytosis and soluble adenylyl cyclase activity.

13 The VINE complex is an endosomal VPS9-domain GEF and SNX-BAR coat. 11,

12 The Rab GTPase activating protein TBC-2 regulates endosomal localization of DAF-16 FOXO and lifespan. 2022, 18, e1010328 1

11 A PI(3,5)P2 probe reveals PIKfyve is required for Rab7 acquisition and the delivery and fusion of early macropinosomes to phagosomes. 1

10 The orchestrated signaling by PI3K and PTEN at the membrane interface. 2022, 0

9 Class III PI3K Biology. 2022, 69-93 0
