

CITATION REPORT

List of articles citing

Ionospheric disturbance magnetic field continuation from the ground to the ionosphere using spherical elementary current systems

DOI: 10.1186/bf03352247

Earth, Planets and Space, 1999, 51, 431-440.

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
205	A plasma vortex revisited: The importance of including ionospheric conductivity measurements. 2000 , 105, 24889-24898		14
204	The elementary current method for calculating ionospheric current systems from multisatellite and ground magnetometer data. 2001 , 106, 24843-24855		15
203	Modeling of equivalent ionospheric currents from meridian magnetometer chain data. <i>Earth, Planets and Space</i> , 2001 , 53, 129-137	2.9	19
202	Multisheet modelling of the electrical conductivity structure in the Fennoscandian Shield. <i>Earth, Planets and Space</i> , 2002 , 54, 559-573	2.9	36
201	A traveling convection vortex event study: Instantaneous ionospheric equivalent currents, estimation of field-aligned currents, and the role of induced currents. 2002 , 107, SIA 1-1		27
200	April 2000 magnetic storm: Solar wind driver and magnetospheric response. 2002 , 107, SMP 15-1-SMP 15-21		39
199	Ionospheric equivalent current distributions determined with the method of spherical elementary current systems. 2003 , 108,		84
198	Bursty bulk flow intrusion to the inner plasma sheet as inferred from auroral observations. 2003 , 108,		39
197	Separation of the geomagnetic variation field on the ground into external and internal parts using the spherical elementary current system method. <i>Earth, Planets and Space</i> , 2003 , 55, 117-129	2.9	28
196	One-dimensional upward continuation of the ground magnetic field disturbance using spherical elementary current systems. <i>Earth, Planets and Space</i> , 2003 , 55, 613-625	2.9	29
195	Spatiotemporal scaling properties of the ground geomagnetic field variations. 2006 , 111,		40
194	One-dimensional spherical elementary current systems and their use for determining ionospheric currents from satellite measurements. <i>Earth, Planets and Space</i> , 2006 , 58, 667-678	2.9	21
193	Magnetic satellite missions: where have we been and where are we going?. 2006 , 338, 1002-1011		4
192	Auroral streamers and magnetic flux closure. 2007 , 34,		4
191	Energy input from the exterior cusp into the ionosphere: Correlated ground-based and satellite observations. 2007 , 34,		7
190	Relation of substorm onset to Harang discontinuity. 2008 , 113, n/a-n/a		24
189	Local field-aligned currents in the magnetotail and ionosphere as observed by a Cluster, Double Star, and MIRACLE conjunction. 2008 , 113, n/a-n/a		10

188	Substorm current wedge driven by plasma flow vortices: THEMIS observations. 2009 , 114, n/a-n/a	134
187	Conjugate ionospheric equivalent currents during bursty bulk flows. 2009 , 114, n/a-n/a	15
186	Reconnection Hall current system observed in the magnetotail and in the ionosphere. 2009 , 36,	2
185	Characteristics of Magnetic Variations and Current Wedge in the Sawtooth Event on 30 September 2000. 2010 , 53, 719-730	
184	Local determination of ionospheric plasma convection from coherent scatter radar data using the SECS technique. 2010 , 115, n/a-n/a	12
183	Small and meso-scale properties of a substorm onset auroral arc. 2010 , 115, n/a-n/a	24
182	Flux transport, dipolarization, and current sheet evolution during a double-onset substorm. 2011 , 116,	31
181	A statistical investigation of the Cowling channel efficiency in the auroral zone. 2011 , 116, n/a-n/a	18
180	Auroral electrojets during deep solar minimum at the end of solar cycle 23. 2011 , 116, n/a-n/a	24
179	Application and validation of the spherical elementary currents systems technique for deriving ionospheric equivalent currents with the North American and Greenland ground magnetometer arrays. 2011 , 116,	76
178	Spherical decompositions in a global and local framework: theory and an application to geomagnetic modeling. 2011 , 1, 205-256	31
177	Calculation of Telluric Current in Geomagnetic Induced Problems Using the Finite Element Method. 2011 ,	
176	Observations of an auroral streamer in a double oval configuration. 2011 , 29, 701-716	3
175	Substorms during different storm phases. 2011 , 29, 2031-2043	13
