Version: 2024-04-09

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

28 Longitudinal Associations Between Cumulative Physical Activity and Change in Structure and Function of the Left Side of the Heart: The Tromsø Study 2007-2016. **2022**, 9,

1

27 Arrhythmogenesis of Sports: Myth or Reality?. 11,

o

26 Global longitudinal strain differentiates physiological hypertrophy from maladaptive remodeling.. **2022**, 40, 101044

o

25 The role of pre-participation cardiac evaluation in the management of an athlete with premature ventricular contraction-induced cardiomyopathy: a case report.. **2022**, 6, ytacl74

24 Low Risk of Cardiac Complications in Collegiate Athletes After Asymptomatic or Mild COVID-19 Infection. **2022**, Publish Ahead of Print,

23 Physical activity and the heart: from well-established cardiovascular benefits to possible adverse effects. **2022**,

o

22 Differentiating Physiology from Pathology. **2022**, 41, 425-440

o

21 Echocardiographic Assessment of Left Ventricular Function 10 Years after the Ultra-Endurance Running Event Eco-Trail de Paris. 2011. **2022**, 19, 8268

20 Role of the Electrocardiogram in Differentiating Genetically Determined Dilated Cardiomyopathy from Athlete's Heart.

o

19 Soldiers' Heart: A Prospective Study of Cardiac Remodeling in Soldiers Undergoing Progressive Intensity Exercise Training. Publish Ahead of Print,

18 Echocardiographic Characterization of Left Heart Morphology and Function in Highly Trained Male Judo Athletes. **2022**, 19, 8842

17 Strenuous Endurance Exercise and the Heart: Physiological versus Pathological Adaptations. 1-19

16 The electrocardiogram in athletes with left ventricular dilatation and reduced ejection fraction.

15 Normative Values for Sport-Specific Left Ventricular Dimensions and Exercise-Induced Cardiac Remodeling in Elite Spanish Male and Female Athletes. **2022**, 8,

1
