

CITATION REPORT

List of articles citing

Numerical simulation and experimental validation of blood flow in arteries with structured-tree outflow condition

DOI: 10.1114/1.1326031

Annals of Biomedical Engineering, 2000, 28, 1281-99.

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
607	Dynamics of cerebral blood flow regulation explained using a lumped parameter model. 2002 , 282, R611-22		65
606	Effective equations describing the flow of a viscous incompressible fluid through a long elastic tube. 2002 , 330, 661-666		8
605	Short-term cardiovascular oscillations in man: measuring and modelling the physiologies. 2002 , 542, 669-83		230
604	In vivo validation of a one-dimensional finite-element method for predicting blood flow in cardiovascular bypass grafts. 2003 , 50, 649-56		78
603	Mathematical analysis of the quasilinear effects in a hyperbolic model blood flow through compliant axi-symmetric vessels. 2003 , 26, 1161-1186		99
602	Effective Equations Modeling the Flow of a Viscous Incompressible Fluid through a Long Elastic Tube Arising in the Study of Blood Flow through Small Arteries. 2003 , 2, 431-463		56
601	On deriving lumped models for blood flow and pressure in the systemic arteries. 2003 , 1786-1789		3
600	Blood flow through axially symmetric sections of compliant vessels: new effective closed models. 2004 , 2004, 3696-9		
599	A one-dimensional thermo-fluid model of blood circulation in the human upper limb. 2004 , 47, 2735-2745		42
598	A Hyperbolic System of Equations of Blood Flow in an Arterial Network. 2004 , 64, 637-667		3
597	A Closed-Loop Lumped Parameter Computational Model for Human Cardiovascular System. 2005 , 48, 484-493		42
596	Blood flow and structure interactions in a stented abdominal aortic aneurysm model. 2005 , 27, 369-82		117
595	A two-dimensional effective model describing fluid-structure interaction in blood flow: analysis, simulation and experimental validation. 2005 , 333, 867-883		17
594	Fundamental study of ultrasonic-measurement-integrated simulation of real blood flow in the aorta. <i>Annals of Biomedical Engineering</i> , 2005 , 33, 415-28	4.7	27
593	Computational analysis of biomechanical contributors to possible endovascular graft failure. 2005 , 4, 221-34		49
592	NUMERICAL AND EXPERIMENTAL STUDY ON THE RELATIONSHIP BETWEEN BLOOD CIRCULATION AND PERIPHERAL TEMPERATURE. 2005 , 05, 39-53		7
591	A DIRECTOR THEORY APPROACH FOR MODELING BLOOD FLOW IN THE ARTERIAL SYSTEM: AN ALTERNATIVE TO CLASSICAL 1D MODELS. 2005 , 15, 871-906		20

590	Fluid-structure interaction effects on sac-blood pressure and wall stress in a stented aneurysm. 2005 , 127, 662-71	71
589	Self-Consistent Effective Equations Modeling Blood Flow in Medium-to-Large Compliant Arteries. 2005 , 3, 559-596	35
588	Analysis of a Geometrical Multiscale Blood Flow Model Based on the Coupling of ODEs and Hyperbolic PDEs. 2005 , 4, 215-236	56
587	A patient-specific computational model of fluid-structure interaction in abdominal aortic aneurysms. 2005 , 27, 871-83	139
586	Effects of blood flow and vessel geometry on wall stress and rupture risk of abdominal aortic aneurysms. 2006 , 30, 283-97	26
585	Fluid structure interaction of patient specific abdominal aortic aneurysms: a comparison with solid stress models. 2006 , 5, 33	117
584	Modeling Viscoelastic Behavior of Arterial Walls and Their Interaction with Pulsatile Blood Flow. 2006 , 67, 164-193	76
583	Simulation of hemodynamic responses to the valsalva maneuver: an integrative computational model of the cardiovascular system and the autonomic nervous system. 2006 , 56, 45-65	68
582	Physiological Systems Modeling. 2006 ,	
581	Effects of major endoleaks on a stented abdominal aortic aneurysm. 2006 , 128, 59-68	27
580	Numerical Study on Variation of Feedback Methods in Ultrasonic-Measurement-Integrated Simulation of Blood Flow in the Aneurysmal Aorta. 2006 , 49, 144-155	10
579	A numerical coupling model to analyze the blood flow, temperature, and oxygen transport in human breast tumor under laser irradiation. 2006 , 36, 1336-50	60
578	Analysis of biomechanical factors affecting stent-graft migration in an abdominal aortic aneurysm model. 2006 , 39, 2264-73	104
577	Reliable CFD-based estimation of flow rate in haemodynamics measures. 2006 , 32, 1545-55	24
576	Blood flow in compliant arteries: an effective viscoelastic reduced model, numerics, and experimental validation. <i>Annals of Biomedical Engineering</i> , 2006 , 34, 575-92	4-7 71
575	Computational analysis of type II endoleaks in a stented abdominal aortic aneurysm model. 2006 , 39, 2573-82	38
574	Pulsatile blood flow in the entire coronary arterial tree: theory and experiment. 2006 , 291, H1074-87	61
573	A hybrid one-dimensional/Womersley model of pulsatile blood flow in the entire coronary arterial tree. 2007 , 292, H2623-33	62
