318   On Some Issues in Large-Eddy Simulations for Chevron Nozzle Jet Flows (invited paper). **2011**,   2

317   Modeling and Simulation of a Jet Impingement on Aircraft Structure. **2011**,   1

316   Affordable Compressible LES of Airfoil-Turbulence Interaction in a Free Jet. **2011**,   9

315   Efficient Parallel Computing with a Compact Finite Difference Scheme for Computational Aeroacoustics. **2011**,   0

314   Numerical Study on Acoustic Radiation from a Supersonic Jet Impinging to an Inclined Plate. **2011**,   10

313   A High-Order Dissipative Scheme for the Hyperviscosity-Based Shock-Capturing Algorithm. **2011**,

312   Investigations of trans/supercritical jet mixing using a high-resolution numerical method. **2011**,   1

311   Wall modeling in large-eddy simulation: predicting accurate skin friction at very high Reynolds number. **2011**,   2

310   Integrated and Multi-fidelity Software Package for Aero- Servo-Thermo-Elasticity and Propulsion (ASTE-P) of Aerospace Vehicles from Subsonic to Hypersonic Flight. **2011**,

309   Mach Number Effects on Vortex Breakdown in Subsonic Flow over a Delta Wing. **2011**,

308   Effective Three-dimensional Layout of Imaginary Body Force for Separation Control. **2011**,   1

307   High-Resolution Numerical Method for Supercritical Flows with Large Density Variations. *AIAA Journal*, **2011**, 49, 2658-2672   2.1   43

306   Progress on Experimental and Numerical Research for Slat Noise in JAXA. **2011**, 10, 443-463   4

305   High-Fidelity Numerical Simulation of a Chevron Nozzle Jet Flow. **2011**, 10, 531-564   16

304   An order-of-magnitude approximation for the hybrid terms in the compressible hybrid RANS/LES governing equations. **2011**, 12, N16   6

303   Fluid-Acoustic Interactions in Acoustic Radiation in Turbulent Cavity Flows. **2011**, 6, 90-106

302   Direct Computation of a Hole-Tone Feedback System at Very Low Mach Numbers. **2011**, 6, 548-561   6

301   A high-resolution scheme for compressible multicomponent flows with shock waves. **2011**, 66, 1207-1225   34

300	Adaptive multi-dimensional filters. **2011**, 49, 128-140		13
299	A spectral FC solver for the compressible Navier‖Stokes equations in general domains I: Explicit time-stepping. **2011**, 230, 6248-6270		43
298	Simulations of Pulsed Actuators for High-Speed Flow Control. **2011**,		3
297	Computational Study of Aerodynamic Characteristics of an Airfoil With DBD Plasma Actuator. **2011**,		2
296	1303 Unmanned Ccombat Air Vehicle Flowfield Simulations and Comparison with Experimental Data. **2011**, 48, 1005-1019		3
295	Two-dimensional viscous flow simulation of a shock accelerated heavy gas cylinder. *Physics of Fluids* , **2011**, 23, 024102	4.4	44
294	Interpolated characteristic interface conditions for zonal grid refinement of high-order multi-block computations. **2012**, 26, 23-43		3
293	An Effective Three-Dimensional Layout of Actuation Body Force for Separation Control. **2012**, 2012, 1-12		13
292	Shock/Boundary Layer Interaction Over a Flexible Panel. **2012**,		7
291	Parallelization of compact finite-difference schemes and filters based on a linear-algebraic transformation. **2012**,		
290	Burst Frequency Effect of DBD Plasma Actuator on the Control of Separated Flow over an Airfoil. **2012**,		8
289	High-Fidelity Simulations of a Hovering Wing. **2012**,		6
288	A Non-Equilibrium Wall-Model for LES of Shock/Boundary Layer Interaction at High Reynolds Number. **2012**,		5
287	High-Fidelity Simulations of a Corrugated Airfoil. **2012**,		
286	Computational Analysis of Vortex Structures Induced by a Synthetic Jet to Control Separated Flows. **2012**, 4, 47-66		8
285	Approach to Prevent Spurious Oscillations in Compressible Multicomponent Flows Using High-Order Methods. **2012**,		2
284	Hybrid LES/RANS Simulations of Transonic Flowfield Around a Rocket Fairing. **2012**,		3
283	A throttling mechanism sustaining a hole tone feedback system at very low Mach numbers. *Journal of Fluid Mechanics*, **2012**, 710, 569-605	3.7	10

282   High-Order and High Accurate CFD Methods and Their Applications for Complex Grid Problems. **2012**, 11, 1081-1102   40

281   Modified Upwinding Compact Scheme for Shock and Shock Boundary Layer Interaction. **2012**, 11, 1022-1042   2

280   Wall-modeling in large eddy simulation: Length scales, grid resolution, and accuracy. *Physics of Fluids*, **2012**, 24, 015105   4.4   216

279   Large-Eddy Simulation of a Supersonic Inlet-Isolator. *AIAA Journal*, **2012**, 50, 1596-1613   2.1   51

278   Approach for simulating gasliquid-like flows under supercritical pressures using a high-order central differencing scheme. **2012**, 231, 6907-6923   54

277   Role of RANS, Hybrid and LES for Wing Flow Simulations at Relatively Low Reynolds Numbers. *Notes on Numerical Fluid Mechanics and Multidisciplinary Design*, **2012**, 45-57   0.3

276   Noise Simulation around NACA0012 Wingtip using Large Eddy Simulation. **2012**, 55, 214-221   5

275   A GPU application for high-order compact finite difference scheme. **2012**, 55, 29-35   22

274   Efficient parallel computing with a compact finite difference scheme. **2012**, 58, 70-87   42

273   An application of delayed detached eddy simulation to tandem cylinder flow field prediction. **2012**, 60, 71-85   29

272   A high-order finite difference method for numerical simulations of supersonic turbulent flows. **2012**, 68, 740-766   18

271   An Optimized Low-Dissipation Monotonicity-Preserving Scheme for Numerical Simulations of High-Speed Turbulent Flows. **2013**, 56, 67-95   30

270   Temperature impact on the turbulence generated by the interaction of twin inline inclined jets in crossflow. **2013**, 49, 629-656   5

269   Simulation of Tonal Noise Generation by Supersonic Impinging Jets. *AIAA Journal*, **2013**, 51, 1593-1611   2.1   27

268   Dynamic non-equilibrium wall-modeling for large eddy simulation at high Reynolds numbers. *Physics of Fluids*, **2013**, 25, 015105   4.4   83

267   Mach-Number Effects on Vortex Breakdown in Subsonic Flows over Delta Wings. *AIAA Journal*, **2013**, 51, 2281-2286   2.1   3

266   Consistent numerical diffusion terms for simulating compressible multicomponent flows. **2013**, 88, 484-495   23

265   Massive Parametric Study by LES on Separated-flow Control around Airfoil using DBD Plasma Actuator at Reynolds Number 63,000. **2013**,   10

264	A Low-Dispersion and Low-Dissipation Implicit Runge-Kutta Scheme. **2013**, 233, 315-323		22
