

CITATION REPORT

List of articles citing

Health effects of endocrine-disrupting chemicals on wildlife, with special reference to the European situation

DOI: 10.1080/10408440091159176

Critical Reviews in Toxicology, 2000, 30, 71-133.

Version: 2024-04-24

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
617	Effects of 17beta-estradiol and testosterone on hepatic mRNA/protein levels and catalytic activities of CYP2M1, CYP2K1, and CYP3A27 in rainbow trout (<i>Oncorhynchus mykiss</i>). 2000 , 168, 91-101		41
616	Activation of mitogen-activated protein kinases by tributyltin in CCRF-CEM cells: role of intracellular Ca(2+). 2000 , 168, 200-7		44
615	Fish as model in pharmacological and biological research. 2001 , 44, 265-80		38
614	Testicular dysgenesis syndrome: an increasingly common developmental disorder with environmental aspects. 2001 , 16, 972-8		1714
