

CITATION REPORT

List of articles citing

Spacecraft Formation Flying: Dynamics and Control

DOI: 10.2514/2.4567

Journal of Guidance, Control, and Dynamics, 2000, 23, 561-566

Source: <https://exaly.com/paper-pdf/32142749/citation-report.pdf>

Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
169	Elementary attitude formation maneuvers via leader-following and behavior-based control. 2000 ,		23
168	A coordination architecture for spacecraft formation control. 2001 , 9, 777-790		656
167	Dynamics and control of spacecraft formation flying in three-body trajectories. 2001 ,		13
166	A multirate predictive approach to orbit control of small spacecraft. 2002 ,		5
165	Adaptive neural control of deep-space formation flying. 2002 ,		7
164	Distributed control of close formation flight.		18
163	Nonlinear Tracking Control for Satellite Formations. <i>Journal of Guidance, Control, and Dynamics</i> , 2002 , 25, 376-386	2.1	58
162	Neurocontrol of Spacecraft Formation Flying in the Elliptic Restricted Three-Body Problem. 2002 ,		3
161	Adaptive output feedback tracking control of spacecraft formation. <i>International Journal of Robust and Nonlinear Control</i> , 2002 , 12, 117-139	3.6	61
160	Fuel optimal manoeuvres for multiple spacecraft formation reconfiguration using multi-agent optimization. <i>International Journal of Robust and Nonlinear Control</i> , 2002 , 12, 243-283	3.6	40
159	Synchronized multiple spacecraft rotations. 2002 , 38, 1359-1364		296
158	PD-fuzzy formation control for spacecraft formation flying in elliptical orbits. <i>Aerospace Science and Technology</i> , 2003 , 7, 561-566	4.9	9
157	Robust coordinated control of satellite formations subject to gravity perturbations.		12
156	Adaptive Neural Control of Deep-Space Formation Flying. <i>Journal of Guidance, Control, and Dynamics</i> , 2003 , 26, 491-501	2.1	69
155	Adaptive learning control-based periodic trajectory tracking for spacecraft formations.		1
154	Nonlinear low-thrust lyapunov-based control of spacecraft formations.		2
153	Lyapunov-based output-feedback distributed control of systems on lattices.		

152	Nonlinear Orbital Dynamic Equations and State-Dependent Riccati Equation Control of Formation Flying Satellites. 2003 , 51, 433-449		23
151	Rotation Formation Flying of Three Satellites Using Tethers. <i>Journal of Spacecraft and Rockets</i> , 2004 , 41, 973-985	1.5	35
150	Stability and control of spacecraft formation flying in trajectories of the restricted three-body problem. <i>Acta Astronautica</i> , 2004 , 54, 433-453	2.9	39
149	Dynamics and Fuzzy Control for Formation Flying with Elliptical Reference Orbits. 2004 ,		1
148	Investigating Virtual Structure Based Control Strategies for Spacecraft Formation Maneuvers. 2004 ,		7
147	Formation Control of the MAXIM L2 Libration Orbit Mission. 2004 ,		17
146	Controlling the Out-of-Plane Motion of a Follower Satellite in a Periodical Relative Trajectory, Using Angular Rate Information. 2004 ,		1
145	Architecture induced by distributed backstepping design. 2004 ,		1
144	MULTIPLE SPACECRAFT FORMATION CONTROL USING H_{∞} METHOD. 2005 , 38, 307-312		1
143	Natural and non-natural spacecraft formations near the L1 and L2 libration points in the SunEarth/Moon ephemeris system. 2005 , 20, 149-173		39
142	Control Strategies for Formation Flight In the Vicinity of the Libration Points. <i>Journal of Guidance, Control, and Dynamics</i> , 2005 , 28, 1210-1219	2.1	40
141	On the optimality of localized distributed controllers.		9
140	Lyapunov-based distributed control of systems on lattices. <i>IEEE Transactions on Automatic Control</i> , 2005 , 50, 422-433	5.9	36
139	Multi-Objective Output-Feedback Control for Satellite Formation Keeping: An LMI Approach. 2006 ,		3
138	H_{∞} synthesis for satellite formation keeping: an LMI approach.		
137	Embedded Model Control Application to Drag-Free and Satellite-to-Satellite Tracking. 2006 ,		1
136	Satellite formation keeping using robust constrained model predictive control.		
135	Sliding mode control for low-thrust Earth-orbiting spacecraft formation maneuvering. <i>Aerospace Science and Technology</i> , 2006 , 10, 636-643	4.9	52

134	Formation Flight of Spacecraft in Earth Orbit via MPC. 2006,			3
133	Correctness Analysis and Optimality Bounds of Multi-spacecraft Formation Initialization Algorithms. 2006,			
132	Distributed attitude consensus among multiple networked spacecraft. 2006,			13
131	Low-Thrust Spacecraft Formation Keeping. <i>Journal of Spacecraft and Rockets</i> , 2006 , 43, 466-475	1.5		10
130	Optimal Reconfiguration of Satellites in Formation. <i>Journal of Spacecraft and Rockets</i> , 2007 , 44, 230-239	1.5		8
129	Satellite Formation Flying Controller Design Using an Optimal Decentralized Approach. 2007,			
128	Sliding-Mode Formation Control for Underactuated Surface Vessels. 2007 , 23, 617-622			116
127	Formation Flying Control in Highly Elliptical Orbits. 2007,			3
126	Control for Satellites Formation Flying. <i>Journal of Aerospace Engineering</i> , 2007 , 20, 10-21	1.4		18
125	Architecture Induced by Distributed Backstepping Design. <i>IEEE Transactions on Automatic Control</i> , 2007 , 52, 108-113	5.9		9
124	Towards Full Formation Control of an Autonomous Helicopters Group. 2007,			1
123	Orbital Rendezvous and Flyaround Based on Null Controllability with Vanishing Energy. <i>Journal of Guidance, Control, and Dynamics</i> , 2007 , 30, 934-945	2.1		50
122	Multiple spacecraft formation control with thetasD method. <i>IET Control Theory and Applications</i> , 2007 , 1, 485-493	2.5		16
121	Distributed attitude alignment in spacecraft formation flying. 2007 , 21, 95-113			186
120	Use of solar radiation pressure to maintain a spatial satellite formation. <i>Acta Astronautica</i> , 2007 , 61, 724-738	2.3		11
119	On the peaking phenomenon in the control of vehicular platoons. 2008 , 57, 528-537			12
118	Full formation control for autonomous helicopter groups. 2008 , 26, 143-156			21
117	Formation Maintenance and Fuel Balancing for Satellites with Impulsive Control. 2008,			1

116	Adaptive Formation Control and Bio-inspired Optimization of a Cluster-based Satellite Wireless Sensor Network. 2008,		
115	Distributed Consensus in Multi-vehicle Cooperative Control. 2008,		1193
114	Optimal Impulsive Relative Orbit Transfer Along a Circular Orbit. <i>Journal of Guidance, Control, and Dynamics</i> , 2008 , 31, 1014-1027	2.1	50
113	Periodic Orbits of Nonlinear Relative Dynamics and Satellite Formation. <i>Journal of Guidance, Control, and Dynamics</i> , 2009 , 32, 1200-1208	2.1	15
112	Spacecraft formation-keeping using a closed-form orbit propagator and optimization technique. <i>Acta Astronautica</i> , 2009 , 65, 537-548	2.9	5
111	Orbital corrections by a single-input impulsive control applied along the geomagnetic field. <i>Acta Astronautica</i> , 2009 , 65, 1826-1830	2.9	4
110	Satellite formation keeping via real-time optimal control and iterative learning control. 2009,		1
109	. <i>IEEE Transactions on Aerospace and Electronic Systems</i> , 2009 , 45, 835-846	3.7	110
108	Long-distance, drag-free, low-thrust, low-Earth-orbit formation control. 2010 , 43, 297-302		
107	Reduced Input Control of an Underactuated Satellite Formation. 2010,		0
106	On the optimality of localised distributed controllers. 2010 , 2, 82		10
105	Experimental test of a robust formation controller for marine unmanned surface vessels. 2010 , 28, 213-230		20
104	Hardware-in-the-Loop Simulation for Spacecraft Formation Flying. 2010 , 2010, 1-13		2
103	Periodic Orbits of Nonlinear Relative Dynamics Along an Eccentric Orbit. <i>Journal of Guidance, Control, and Dynamics</i> , 2010 , 33, 385-395	2.1	6
102	Flyaround Orbit Design for Autonomous Rendezvous Based on Relative Orbit Elements. <i>Journal of Guidance, Control, and Dynamics</i> , 2010 , 33, 1687-1692	2.1	8
101	Satellite Formation and Reconfiguration with Restricted Control Interval. <i>Journal of Guidance, Control, and Dynamics</i> , 2010 , 33, 607-615	2.1	6
100	Fault Tolerant Reconfigurable Satellite Formations Using Adaptive Variable Structure Techniques. <i>Journal of Guidance, Control, and Dynamics</i> , 2010 , 33, 969-984	2.1	60
99	Relative Control of a Virtual Telescope Using Global Positioning System and Optical Metrology. <i>Journal of Guidance, Control, and Dynamics</i> , 2010 , 33, 1281-1287	2.1	2

98	Decentralized control for satellite formation using local relative measurements only. 2010 ,		7
97	Intersatellite Separation Mechanism for the JC2Sat Formation-Flying Missions. <i>Journal of Spacecraft and Rockets</i> , 2011 , 48, 654-663	1.5	5
96	Finite-gain L ₂ stabilization of satellite formation flying with input saturation. 2011 ,		1
95	Adaptive Output Feedback Control of Spacecraft Formation Flying Using Chebyshev Neural Networks. <i>Journal of Aerospace Engineering</i> , 2011 , 24, 361-372	1.4	13
94	Optimal Pulse Strategies for Relative Orbit Transfer Along a Circular Orbit. <i>Journal of Guidance, Control, and Dynamics</i> , 2011 , 34, 1329-1341	2.1	10
93	Distributed Fault Detection and Isolation of Continuous-Time Non-Linear Systems. 2011 , 17, 603-620		36
92	A Decomposition-Based Approach to Linear Time-Periodic Distributed Control of Satellite Formations. 2011 , 19, 481-492		29
91	A new adaptive formation control scheme for a constellation of satellites with parametric uncertainties. 2011 ,		2
90	Formation control for the next generation Earth-gravimetry missions. 2011 , 44, 5136-5141		
89	Distributed control of a class of interconnected systems in a string. <i>IET Control Theory and Applications</i> , 2011 , 5, 963-975	2.5	5
88	Long-distance, drag-free, low-thrust, LEO formation control for Earth gravity monitoring. <i>Acta Astronautica</i> , 2011 , 69, 571-582	2.9	13
87	Input-to-state stability of model-based spacecraft formation control systems with communication constraints. <i>Acta Astronautica</i> , 2011 , 68, 1847-1859	2.9	6
86	An observer based distributed controller for formation flying of satellites. 2011 ,		2
85	Nonlinear Adaptive Control for Low Earth Orbit Formation Flying. 2011 ,		
84	Tuning functions-based output feedback adaptive spacecraft formation flying despite disturbances. 2012 , 226, 15-29		8
83	Formation flying in elliptic orbits with the J ₂ perturbation. 2012 , 12, 1563-1575		1
82	I/O Based Variable Structure Model Reference Adaptive Satellite Formation Control in Elliptic Orbits. 2012 ,		
81	Dynamics analysis of satellite cluster non-coplanar orbit transfer based on geometric method. 2012 , 84, 252-259		2

80	Top-Level Control of Disaggregated Satellites: Cluster Maintenance and Scatter/Re-gather Maneuvers. 2012,			1
79	. <i>IEEE Transactions on Aerospace and Electronic Systems</i> , 2012 , 48, 2302-2314	3.7		38
78	Feedback Control for Formation Flying Maintenance Using State Transition Matrix. 2012 , 59, 177-192			4
77	Variable-Structure Model Reference Adaptive Formation Control of Spacecraft. <i>Journal of Guidance, Control, and Dynamics</i> , 2012 , 35, 104-115	2.1		12
76	Nonlinear Control of Formation Flying with State Constraints. <i>Journal of Guidance, Control, and Dynamics</i> , 2012 , 35, 1919-1925	2.1		14
75	Impulsive Control for Formation Flight About Libration Points. <i>Journal of Guidance, Control, and Dynamics</i> , 2012 , 35, 484-496	2.1		28
74	Internal Model Principle Based Nonlinear Robust Satellite Formation Control Despite Disturbances. 2012,			
73	Robust adaptive tracking control of distributed delay systems with actuator and communication failures. 2012 , 14, 1282-1298			8
72	In-Plane Motion Control of Hill-Clohessy-Wiltshire Equations by Single Input. <i>Journal of Guidance, Control, and Dynamics</i> , 2013 , 36, 1512-1522	2.1		6
71	Estimation, Intervention and Interaction of Multi-agent Systems. 2013 , 39, 1796-1804			6
70	Discrete-time LQ optimal control of satellite formations in elliptical orbits based on feedback linearization. <i>Acta Astronautica</i> , 2013 , 83, 125-131	2.9		3
69	The fault tolerant GNC system architecture for space station spacecrafts. 2013,			
68	Zero, minimum and maximum relative radial acceleration for planar formation flight dynamics near triangular libration points in the Earth-Moon system. <i>Advances in Space Research</i> , 2014 , 54, 1838-1857	2.4		6
67	. <i>IEEE Transactions on Aerospace and Electronic Systems</i> , 2014 , 50, 3230-3243	3.7		1
